ecret of the universe. The object of Jnana-Yoga is the ame as that of Bhakti and Râja Yogas, but the method s different. This is the Yoga for the strong, for those who are neither mystical nor devotional, but rational, as the Bhakti-Yogi works his way to complete oneness vith the Supreme through love and devotion, so the nana-Yogi forces his way to the realisation of God by he power of pure reason. He must be prepared to now away all old idols, all old beliefs and superstitions. ll desire for this world or another, and be determined nlý to find freedom. Without Jnana (knowledge) liberaon cannot be ours. It consists in knowing what we ally are, that we are beyond fear, beyond birth, beyond eath. The highest good is the realisation of the Self. It beyond sense, beyond thought. The real "I" cannot grasped. It is the eternal subject and can never beome the object of knowledge, because knowledge is nly of the related, not of the Absolute. All sensenowledge is limitation, it is an endless chain of cause nd effect. This world is a relative world, a shadow of e real; still, being the plane of equipoise where happiess and misery are about evenly balanced, it is the only ane where man can realise his true Self and know

Om Tat Sat! To know the Om is to know the

This world is "the evolution of nature and the anifestation of God". It is our interpretation of Brahan or the Absolute, seen through the veil of Mâyâ or

at he is Brahman.

These were originally recorded by a prominent American sciple of the Swami, Miss S E Waldo. Swami Saradananda, hite he was in America (1896) copied them out from her notetok—Ed.

appearance. The world is not zero, it has a certain reality: it only oppears because Brahman is.

How shall we know the knower? The Vedant says. "We are It. but can never know It, because It can never become the abject of knowledge". Modern science also says that It cannot be known. We can, however have glimpses of It from time to time. When the delusion of this world is once broken, it will come back to us, but no longer will it hold any reality for us. We shall know it as a mirage. To seach behind the mirage, is

the aim of all religions. That man and God are one is the constant teaching of the Vedas, but only few are able to penetrate behind the veil and reach the realisation of this truth. The first thing to be got rid of by him who would be a Inani ia fear. Fear is one of our worst enemies. Next, believe in nothing until you know it. Constantly tell yourself, "I am not the body, I am not the mind, I

am not thought. I am not even consciousness: I am the Atman". When you can throw away all, only the true Self will remain. The Juani's meditation is of two aorts: (1) to deny and think away everything we are not; (2) to insist upon what we really are—the Atman, the One Self-Existence, Knowledge and Bliss. The true

rationalist must go on and fearlessly follow his reason to its farthest limits. It will not answer to stop anywhere on the road. When we begin to deny, oll must go until we reach what cannot be thrown away or denied, which is the real "I". That "I" is the witness of the universe, it is unchangeable, eternal, infinite. Now, layer after layer of ignorance covers it from our eyes, but it remains

ever the same. Two birds aat on one tree. The bird at the top was calm, majestic, beautiful, perfect. The lower bird was

always hopping from twig to twig, now eating sweet fruits and being happy, now eating bitter fruits and being miserable. One day, when he had eaten a fruit more bitter than usual, he glanced up at the calm majestic unner hird and thought. "How I would like to be like him!" and he hopped up a little way towards him. Soon he forgot all about his desire to be like the upper bird, and went on as before, eating sweet and bitter fruits and being happy and miserable. Again he looked up, again he went up a little nearer to the calm and majestic upper hird. Many times was this repeated, until at last he drew very near the unner bird : the brilliancy of his plumage dazzled him, seemed to absorb him, and finally, to his wonder and surprise, he found there was only one bird-he was the upper bird all the time and had but just found it out. Man is like that lower bird. but if he perseveres in his efforts to rise to the highest ideal he can conceive of he, too, will find that he was the Self all the time and the other was but a dream. To separate ourselves utterly from matter and all belief in its reality is true Inana. The Inami must keep over in his mind the "Om Tat Sat", that is, Om the only real existence. Abstract unity is the foundation of Inana-Yoga. This is called Advaitism ("without dualism or dvaitism"). This is the corner-stone of the Vedanta philosophy, the Alpha and the Omega. "Brahman alone is true, all else is false and I am Brahman." Only by telling ourselves this until we make it a part of our very being, can we rise beyond all duality, beyond both good and evil, pleasure and pain, joy and sorrow, and know ourselves as the One, eternal, unchanging, infinite-the "One without a second".

The Jnana-Yogi must be as intense as the narrowest section. The must absolutely control his mind, be able to be a Buddhist or a Christian, to have the power to consciously divide himself into all these different ideas and yet hold fast to the eternal harmony. Constant drill slone can enable us to

get this control. All variations are in the One, but we must learn not to identify ourselves with what we do, and to hear nothing, see nothing, talk of nothing but the thing in hand. We must put in our whole soul and be intense. Day and night tell yourself, "I am He, I am He".

15

The greatest teacher of the Vedanta philosophy was Shankaracharya. By solid reasoning he extracted from the Vedas the truths of Vedanta, and on them built up the wonderful system of Inana that is taught in his commentaries. He unified all the conflicting descriptions of Brahman and showed that there is only One Infinite Reality. He showed, too, that as man can only travel alowly on the upward road, all the varied presentations are needed to suit his varying capacity. We find something akin to this in the teachings of Jesus, which he evidently adapted to the different abilities of his hearers. First he taught them of a Father in heaven and to pray to Him. Next he rose a step higher and told them. "I am the vine, you are the branches", and lastly he gave them the highest truth: "I and my Father are one". and "The Kingdom of fleaven is within you" Shankara taught that three things were the great gifts of God: (1) human body. (2) thirst after God, and (3) a teacher who can show us the light. When these three great gifts are ours, we may know that our redemption is at hand. Only knowledge can free and save us, but with knowleder must ro virtue.

The essence of Vedanta is that there is but One Being and that every soul is that Being in full, not a part of that Being All the sun is reflected in each dew-drop. Appearing in time, space, and causality, this Being is man, as we know him, but behind all appearance is the One Reality Unselfshores is the dental of the lower or apparent self. We have to free ourselves from this miserable dream that we are these bodies. We must know the truth, "I am He". We are not drops to fall into the ocean and be lost; each one is the whole, infinite orean, and will know it when released from the fetters of illusion. Infinity cannot be divided, the "One without a second" can have no second, all is that One. This knowledge will come to all, but we should struggle to attain it now, because until we have it, we cannot really give mankind the best help. The livanmukta ('the living free or one who knows) alone is able to give real love, real charity, real truth, and it is truth alone that makes us free. Desire makes alayes of us, it is an insatiable tyrant and gives its victims no rest; but the livanmukta has conquered all desire by rising to the knowledge that he is the One and there is nothing left to wish for.

The mind brings before us all our delusions—body, sex, creed, casta, bondage; so we have to tell the truth to the mind incessantly, until it is made to realise it. Our real nature is all bliss, and all the pleasure we know is but a reflection, an atom, of that bliss we get from touching our real nature. That is beyond both pleasure and pain, it is the "witness" of the universe, the unchanging reader before whom turn the leaves of the book of blife.

Through practice comes Yoga, through Yoga comes knowledge, through knowledge love, and through love bliss.

"Me and mine" is a superstition; we have lived ir its olong that it is wellnigh impossible to ahake it off. Still we must get rid of it if we would rise to the highest. We must be bright and cheerful, long faces do not make teligion. Religion should be the most joyful thing in the world, because it is the best. Asceticism cannot make us holy. Why should a man who loves God and who it

these teachings which make this poem so wonderful practically the whole of the Vedanta philosophy is included in them. The Vedas teach that the soul is infinite and in no way affected by the death of the body. The soul is a circle whose circumference is nowhere, but whose centre is in some body. Death (so-called) is but a change of centre. God is a circle whose circumference is nowhere and whose centre is everywhere, and when we can get out of the narrow centre of body, we shall reading ford-our true Sell.

The present is only a line of demarcation between the past and the future; so we cannot rationally say that we care only for the present, as it has no existence apart from the past and the future. It is all one complete whole, the idea of time being merely a condition imposed upon us by the form of our understanding.

### 11

Infan teaches that the world should be given upbut not on that account to be abandoned To be in the world, but not of it, is the true test of the Sannyāsin. This idea of retunciation has been in some form common to nearly all religions. Janna demands that we look upon all alike, that we ace only "sameness". Praise and blame, good and bad, even heat and cold, must be equally acceptable to us. In India there are many holy men of whom this is literally true. They wander on the snowchal heights of the Himalays or over the burning desert ands, entirely unclothed and apparently entirely unconscious of saw difference in temperature.

We have first of all to give up this supersition of body; we are not the body. Next must go the further supersition that we are mind. We are not mind, it is but the "silken body", not any part of the soul. The mere word "body", applied to neatly all things, includes something common among all bodies. This is existence.

mind, memory, thought, or even consciousness as we know it. From it are all thines It is That, through which for because of which) we see, hear, feel, and think. The roal of the universe is to realise oneness with the "Om" or One Existence The Joani has to be free from all forms, he is neither a Hindu, a Buddhist, nor a Christian, but he is all three. All action is renounced. given up to the Lord then no action has power to bind. The Inam is a tremendous rationalist, he denies everything. He tells himself day and might, "There are no beliefs, no sacred words, no heaven, no hell, no creed, no church-there is only the Atman" When everything has been thrown away uptil what cannot be thrown away is reached, that is the Self. The Juans takes nothing for granted, he analyses by pure reason and force of will, until he reaches Nirvana which is the extinction of all relativity. No description or even conception of this mate is possible. Inana is never to be judged by any earthly result. Be not like the vulture which soors almost beyond eight, but which is ever ready to swoop downwards at the eight of a bit of carrion. Ask not for healing, or longevity, or prosperity, ask only to be free. We are "Existence, Knowledge, Bliss" (Sachchida-

mands). Esistence is the last generalisation in the universe; so, we exist, we know it; and blies is the natural result of existence without alloy. Now and then we know a moment of supreme bliss, when we ask nothing, give nothing, and know nothing but blies. Then it passes and we again see the panorama of the universe going on before us and we know it is but a "mosaic work set upon God, who is the background of all things". When we return to earth and see the Absolute as relative, we exe Sachchidannada as I rimity—Father, Son. Holy Ghost Sat-the creating principle: Chit-ethe guiding principle: Ananda-whe realising principle, which joins us again to the One. No one can know "existence" (Sat) except VIII.—2

through "knowledge" (Chit), and hence the force of the saying of Jesus. No man can see the Father save through the Son. The Vedanta teaches that Nirvana can be attained here and now, that we do not have to wait for death to reach it. Nirvana is the realisation of the Self, and after having once, if only for an instant, known this. never again can one be deluded by the mirage of personality. Flaving eyes, we must see the apparent, but all the time we know it for what it is, we have found out its true nature. It is the "screen" that hides the Self which is unchanging. The screen opens and we find the Self behind it-all change is in the screen. In the saint the screen is thin and the Reality can almost ahine through; but in the sinner it is thick, and we are apt to lose sight of the truth that the Atman is there. as well as behind the saint

All reasoning ends only in finding Unity, so we first use analysis, then synthesis. In the world of Science, the forces are gradually narrowed down in the search for one underlying force. When physical science can perfectly grasp the final unity, it will have reached an end. for reaching unity we find rest. Knowledge is final.

Religion, the most precious of all sciences, long age discovered that final unity, to reach which is the object of Janan-Yogs. There is but one Self in the Universe, of which all lower aelves are but manifestations. The Self, however, is infinitely more than all of its manifestations. All is the Self or Brahman. The saint, the sinner, the lamb, the tiger, even the murderer, as far as they have any reality, can be nothing else, because there is nothing else. "That which exists is One, sages call It variously," Nothing can be higher than this knowledge, and in those purified by Yoga it comes in flashes to the soul. The more one has been purified and prepared by Yoga and meditation, the clearer are these flashes of realisation. This was dis-

covered 4,000 years ago, but has not yet become the property of the race; it is still the property of some individuals only.

### I۷

All men, so-called, are not yet really human beings. Every one has to judge of this world through his own mind. The higher understanding is extremely difficult. The concrete is more to most people than the abstract. As an illustration of this, a atory is told of two men in Bombay-one a Hindu and the other a Jain-who were playing chess in the house of a rich merchant of Bombay. The house was near the sea, the game long , the ebb and flow of the tide under the balcony where they sat attracted the attention of the players. One explained it by a legend that the gods in their play threw the water into a great pit and then threw it out again. The other said: No, the code draw it up to the top of a high mountain to use it, and then when they have done with it, they throw it down again. A young student present began to laugh at them and said, "Do you not know that the attraction of the moon causes the tides?" At this. both men turned on him in a fury and enquired if he thought they were fools. Did he suppose that they believed the moon had any ropes to pull up the tides, or that it could reach so far? They utterly refused to accept any auch foolish explanation. At this juncture the host entered the room and was appealed to by both parties. He was an educated man and of course knew the truth, but seeing plainly the impossibility of making the chess-players understand it, he made a sign to the student and then proceeded to give an explanation of the tides that proved eminently satisfactory to his ignorant hearers. "You must know," he told them, "that afar off in the middle of the ocean, there is a huge mountain of sponge-you have both seen aponge, and know what

I mean. This mountain of sponge absorbs a great deal of the water and then the sea falls; by and by the gods come down and dance on the mountain and their weight squeezes all the water out and the sea rises again.

This, gentlemen, is the cause of the tides, and you can

ans, gentemen, is the cause of the bides, and you can easily see for yourselves how reasonable and simple is this explanation." The two men who ridiculed the power of the moon to cause the bides, found nothing incredible in a mountain of sponge, danced upon by the gods! The gods were real to them, and they had actually seen sponge; what was more likely than their joint effect upon the sea!

"Comfort" is no test of truth; on the contrary, truth is often far from being "comfortable" If one intends to really find truth, he must not cling to comfort. It is hard to let all go, but the Inani must do it. He must become pure, kill out all desires and cease to identify himself with the body. Then and then only, the higher truth can shine in his soul. Sacrifice is necessary, and this immolation of the lower self is the underlying truth that has made sacrifice a part of all religions. All the propitiatory offerings to the gods were but dimly understood types of the only sacrifice that is of any real value, the surrender of the apparent self, through which alone we can realise the higher Self, the Atman. The Juani must not try to preserve the body, nor even wish to do so. He must be strong and follow truth, though the universe fall. Those who follow "fads" can never do this. It is a life-work, nay, the work of a hundred lives! Only the few daze to realise the God within, to renounce heaven and Personal God and all hope of reward. A fum will is needed to do this; to be even vacillating is a sign of tremendous weakness. Man always is perfect. or he never could become so; but he had to realise it. If man were bound by external causes, he could only be

mortal. Immortality can only be true of the uncondi-

tioned. Nothing can act on the Atmass—the idea is pure delusion; but man must identify himself with That, not with body or mind. Let him know that he is the witness of the universe, then he can enjoy the beauty of the wonderful panorana passing before him. Let him even tell himself. 'I am the universe, I am Brahman'. When man really identifies himself with the One, the Atman everything is possible to him and all matter becomes his servant. As Shri Ramakrishna has said: After the butter is chumed, it can be put in water or milk and will never mix with either; so when man has once realised the Self, he can no more be contaminated by the world.

"From a balloon, no minor distinctions are visible. so when man rises high enough, he will not see good and evil people." "Once the pot is burned, no more can it be shaped; so with the mind that has once touched the Lord and has had a baptism of fire, no more can it be changed." Philosophy in Sanskrit means "clear vision". and religion is practical philosophy. Mere theoretic, apeculative philosophy is not much regarded in India There is no church, no creed, no dorma. The two great divisions are the "Dvaitists" and the "Advaitists". The former say, "The way to salvation is through the mercy of God; the law of causation once act in motion, can never be broken; only God who is not bound by this law, by His mercy helps us to break it". The latter say, "Behind all this nature is something that is free; and finding that which is beyond all law, gets us freedom : and freedom is salvation". Dualism is only one phase. Advaitism goes to the ultimate. To become pure is the shortest path to freedom. Only that is ours which we earn. No authority can save us, no beliefs. If there is a God, all can find Him. No one needs to be told it is warm; each one can discover it for himself. So it should be with God. He abould he a fact in the consciousness of all men. The Hindus do not recognise "sin", as it

the Atman.

is understood by the Western mind. Evil deeds are not "sins", we are not offending some Ruler in committing these: we are simply injuring ourselves, and we must suffer the penalty. It is not a sin to put one's finger in the fire, but he who does so will surely suffer just as much as if it were. All deeds produce certain results, and "every deed returns to the doer". "Trinitanianism" is an advance on "Unitarianism" (which is dualism. God and man for ever separate). The first step upwards is when we recognise outselves as the children of God: whe last step is when we realise outselves as the One.

### 1

The question why there cannot be eternal bodies is in itself illogical, as "body" is a term applied to a certain combination of elements, changeable and in its very nature impermanent. When we are not passing through changes, we will not have bodies (so-ealled). "Matter" beyond the limit of time, space, and causality, will not be matter at all. Time and space exist only in us, we are the One Permanent Being All forms are transitory. that is why all religious say, "God has no form". Menander was a Greco-Bactrian king He was converted to Buddhism about 150 BC by one of the Buddhist missionary monks and was called by them "Milinda". He asked a young monk, his teacher, "Can a perfect man (such as Buddha) be in error or make mistakes?" The young monk's answer was: The perfect man can remain in ignorance of minor matters not in his esperience, but he can never be in error as to what his insight has actually realised. He is perfect here and now. He knows the whole mystery, the Essence of the universe. but he may not know the mere external variations through which that Essence is manifested in time and space. He knows the clay itself, but has not had experience of every

shape it may be wrought into. The perfect man knows the Soul itself, but not every form and combination of its manifestation. He would have to attain more relative knowledge put as we do, though on account of his immense power, he would learn it for more quickly.

immense power, he would learn it far more quickly.

The tremendous "search-light" of a perfectly controlled mind, when thrown on any subject, would rapidly reduce it to possession. It is very important to understand this, because it saves so much foolish explanation as to how a Buddha or a Jeaus could be mistaken in ordinary relative knowledge, as we well know they were. The disciples should not be blamed as having put down the sayings eroneously. It is humbug to say that one thing is true and snother untrue in their statements. Accept the whole secount, or reject it. How can use pick out the true from the false?

If a thing statement and the same is can happen again if

any human being has ever realised perfection, we too can do so. If we cannot become perfect here and now. we never can in any state or beaven or condition we may imagine. If leaus Christ was not perfect, then the religion bearing his name falls to the ground. If he was perfect, then we too ean become perfect. The perfect man does not reason or "know", as we emint "knowing", for all our knowledge is mere comparison. and there is no comparison, no classification, possible in the Absolute. Instinct is less liable to error than reason. but reason is higher and leads to intuition, which is higher still. Knowledge is the parent of intuition, which, like instinct, is also unerring, but on a higher plane. There are three grades of manifestation in living beings: (1) sub-conscious-mechanical, unerring; (2) consciousknowing, erring; (3) super-conscious-intuitional, unerring; and these are illustrated in an animal, man, and God. For the man who has become perfect, nothing remains but to apply his understanding. He lives only

to help the world, desiring nothing for himself. What distinguishes is negative—the positive is ever wider and wider. What we have in common is the widest of all, and that is "being".

"Law is a mental shorthand to explain a series of phenomena;" but haw as an entity, so to speak, does not exist. We use the word to express the regular succession of certain occurrences in the phenomenal world. We must not let law become a superstition, a something inevitable, to which we must submit. Error must accompany reason, but the very struggle to conquererror makes us gods. Disease is the struggle of nature to cast out something wrong; so sin is the struggle of nature to cast out something wrong; so sin is the struggle of the divine in us to throw off the animal. We must "sin" (that is, make mistakes) in order to rise to Godhood.

Do not ply suryone, Look upon all as your couals.

cleanse yourself of the primal sin of inequality. We are all equal and must not think. "I am good and you are bad, and I am trying to reclaim you". Equality is the sign of the free. Jesus came to publicans and sinners and lived with them. He never set himself on a pedestal Only sinners see sin. See not man, see only the Lord. We manufacture our own heaven and can make a heaven even in hell. Sinners are only to be found in hell, and as long as we see them around us, we are there ourselves. Spirit is not in time, nor in space. Realise "I am Existence Absolute, Knowledge Absolute, Bliss Absolute-I am He, I am He". Be glad at birth, he glad at death, reinice always in the love of God. Get rid of the bondage of body; we have become slaves to it and learnt to hug our chains and love our slavery ; so much so that we long to perpetuate it, and go on with "body" "body" for ever. Do not cling to the idea of "body", do not look for a future existence in any way like this one; do not love or want the body. even of those dear to us. This life is our teacher, and

dying only makes room to begin over again. Body is our schoolmaster, but to commat suicide is folly, it is only killing the "schoolmaster". Another will take his place. So until we have learnt to transcend the body, we must have it, and losing one, will get another. Still, we must have it, and losing one, will get another. Still, we must not identify ourselves with the body, but look upon it only as an instrument to be used, in reaching perfection Hamman, the devotee of Rama summed up his philosophy in these words: When I identify myself with the body, O Lord, I am Thy creature ternally separate from Thee, When I identify myself with the soul, I am a spark of that Divine Fire which Thou at I But when I identify myself with he Aman, I and Thou at one.

Therefore the Juani strives to realise the Self and nothing else,

### VΙ

Thought is all important, for "what we think we become". There was once a Sannyasin, a holy man. who sat under a tree and taught the people. He drank milk and ate only fruit, and made endless "Pranayamas". and felt himself to be very holy. In the same village lived an evil woman. Every day the Sannyasin went and wamed her that her wickedness would lead her to hell. The poor woman, unable to change her method of life which was her only means of livelihood, was still much moved by the terrible future depicted by the Sannyasin, She wept and prayed to the Lord, begging Him to forgive her because she could not help herself. By and by both the boly man and the evil woman died. The angels came and bore her to heaven, while the demons claimed the soul of the Sannyasin. "Why is this I" he exclaimed, "have I not lived a most holy life. and preached boliness to everybody) Why should I be taken to hell while this wicked woman is taken to heaven?" "Because," answered the demons, "while she

was forced to commit unholy acts, her mind was always fixed on the Lord and she sought deliverance, which has now come to her. But you, on the contrary, while you performed only holy acts, had your mind always fixed on the wickedness of others. You saw only sin, and thought only of sin, so now you have to go to that place where only sin is." The moral of the story is obvious: The outer life avails little. The heart must be pure and the pure heart sees only good, never evil. We should never try to be guardians of mankind, or to stand on a pedestal as saints reforming sinners. Let us rather purify ourselves, and the result must be that in so doing we shall help others.

Physics is bounded on both sides by metaphysics. So it is with reason-it starts from non-reason and ends with non-reason. If we push inquiry far enough in the world of perception, we must teach a plane beyond perception. Reason is really stored up and classified perception, preserved by memory. We can never imagine or reason beyond our sense-perceptions. Nothing beyond reason can be an object of sense-knowledge. We feel the limited character of season, yet it does bring us to a plane where we get a glimpse of something beyond. The question then arises: 'Has man an instrument that transcends reason? It is very probable that in man there is a power to seach beyond reason, in fact the saints in all ages assert the existence of this power in themselves. But it is impossible in the very nature of things to translate spiritual ideas and perceptions into the language of reason; and these saints, each and all, have declared their anability to make known their spiritual experiences. Language can, of course, supply no words for them, so that it can only be amerted that these are actual expenences and can be had by all. Only in that way can they become known, but they can never be described. Religion is the science which learns the

transcendental in nature through the transcendental in man. We know as yet but little of man, consequently but little of the universe. When we know more of man, we shall probably know more of the universe. Man is the epitome of all things and all knowledge is in him. Only for that infinitesimal portion of the universe, which comes into sense-perception, are we able to find a reason : never can we give the reason for any fundamental principle. Giving a reason for a thing is simply to classify it and put it in a pigeon-hole of the mind. When we meet a new fact, we at once strive to put it in some existing category and the attempt to do this is to reason. When we succeed in placing the fact, it gives a certain amount of satisfaction, but we can never so beyond the physical plane in this classification. That man can transcend the limits of the senses, is the emphatic testimony of all past ages. The Upanishads told 5,000 years ago that the realization of God could never be had through the senses. So far, modern agnosticism agrees, but the Vedas go further than the negative side and assert in the plainest terms that man can and does transcend this sense-bound, frozen universe. He can, as it were, find a hole in the ice, through which he can pass and reach the whole ocean of life. Only by so transcending the world of sense, can he reach his true Self, and realise what he really is. Inâna is never sense-knowledge. We cannot know

Brahman, but we gre Brahman, the whole of It, not a piece. The unextended can never be divided. The apparent variety is but the reflection seen in time and space, as we see the sun reflected in a million dewdrops, though we know that the sun itself is one and not many. In Inana we have to lose sight of the variety and see only the Unity. Here there is no subject, no object, no knowing, no thou or he or L only the one,

absolute Unity. We are this all the time; once free ever free. Man is not bound by the law of causation Pain and misery are not in man, they are but as th passing cloud throwing its shadow over the sun, but th cloud passes, the sun is unchanged; and so it is wit man. He is not born, he does not die, he is not in tim and space. These ideas are mere reflections of the mind but we mistake them for the reality and so lose sigh of the glorious truth they obscure. Time is but th method of our thinking, but we are the eternally presen tense. Good and evil have existence only in relation to us. One cannot be had without the other, because neither has meaning or existence apart from the other As long as we recognise duality, or separate God and man, so long we must see good and evil. Only by going to the centre, by unifying ourselves with God can we escape the delusions of the senses. When we let go the eternal fever of desire, the endless thirst that gives us no rest, when we have for ever quenched desire, we shall escape both good and evil, because we shall have tanscended both. The satisfaction of desire only increases it, as oil poured on fire but makes it burn more fiercely. The farther from the centre, the faster goes the wheel, the less the test. Draw near the centre, check desire, stamp it out, let the false self go, then our vision will clear and we shall see God. Only through renunciation of this life and of all life to come (heaven etc.), can we reach the point where we stand firmly on the true Self. While we hope for anything, desire still rules us. Be for one moment really "hopeless", and the mist will clear. For what to hope when one is the all of existence? The secret of Juana is to give up all and be sufficient unto ourselves. Say 'not", and you become "not"; say 'is'. and you become "is". Worship the Self within, naught

else exists, all that binds us is Mâyâ-delusion.

# DISCOURSES ON INANA-1

The Self is the condition of all in the universe, "pro-It can never be conditioned. As soon arrived know that we are it, we are free, As mortals we are not and never can be free. Free mortality is a contradiction in terms, for mortality implies change and only the changeless can be free. The Atman alone is free, and that is our real essence. We feel this inner freedom : in spite of all theories, all beliefs, we know it, and every action proves that we know it. The will is not free, its apparent freedom is but a reflection from the Real. If the world were only an endless chain of cause and effect, where eould one stand to help it? There must needs be a piece of dry land for the rescuer to stand on, else how can he drag anyone out of the rushing stream and save him from drowning? Even the fanatic who cries "I am a worm", thinks that he is on the way to become a saint. He sees the saint even in the worm.

There are two ends or aims of human life, teal knowing (Viināna) and bliss Without freedom, these two are impossible. They are the touchstone of all life. We should feel the Eternal Unity so much, that we should weep for all sinners, knowing that it is we who are sinning. The eternal law is self-sacrifice, not selfassertion. What self to assert, when all is One? There are no "rights", all is love. The great truths that Jesus taught have never been lived. Let us try his method and see if the world will not be saved. The contrary method has nearly destroyed it. Selflessness only, not selfishness, can solve the question. The idea of "right" is a limitation; there is really no "mine" and "thine" for I am thou and thou art I. We have "responsibility", not "rights". We should say, "I am the universe", not "I am John" or "I am Mary". These limitations are all delusions and are what holds us in bondage, for as soon as I think, "I am John", I want exclusive posses-

24 sion of certain things and begin to say "me and mine" and continually make new distinctions in so doing. our bondage goes on increasing with every fresh disting tion and we get farther and farther away from the centre Unity, the undivided Infinite. There is only one Individed ual, and each of us is That. Oneness alone is love an fearlessness; separation leads us to hatred and fear. One ness fulfils the law. Here, on earth, we strive to enclose little spaces and exclude outsiders, but we cannot do the in the sky, though that is what sectarian religion trie to do when it says, "Only this way leads to salvation all others are wrong". Our aim should be to wipe ou these little enclosures to widen the boundaries until the are lost sight of, and to realise that all religious lead to God. This little puny self must be sacrifieed. This i the truth symbolised by baptism into a new life, the death of the old man, the birth of the new-the perishing of the false self, the realisation of the Atman, the on-Self of the universe. The two great divisions of the Vedas are Karma

Kanda-the portion pertaining to doing or work, and Jaana-Kanda-the portion treating of knowing, true knowledge. In the Vedas we can find the whole process of the growth of religious ideas. This is because when a higher truth was reached, the lower perception that led to it, was still preserved. This was done, because the sages realised that the world of creation being eternal, there would always be those who needed the first steps to knowledge, that the highest philosophy, while open to all, could never be grasped by all. In nearly every other religion, only the last or highest realisation of truth has been preserved, with the natural consequence that the older ideas were lost, while the newer ones were only understood by the few and gradually came to have no

meaning for the many. We see this result illustrated in the growing revolt against old traditions and authorities. instead of accepting them, the man of today boldly challenges them to give reasons for their claims, to make clear the grounds upon which they demand acceptance. Much in Christianity is the mere application of new names and meanings to old pagan beliefs and customs. If the old sources had been preserved and the reasons for the transitions fully explained, many things would have been clearer. The Vedas preserved the old ideas and this fact necessitated huge commentaries to explain them and why they were kept, It also led to many superstitions, through clinging to old forms after all sense of their meaning had been lost. In many ceremonials. words are repeated which have survived from a now forgotten language and to which no real meaning can now he attached. The idea of evolution was to be found in the Vedas long before the Christian era : but until Darwin said it was true, it was regarded as a mere Hindu superstition.

All external forms of prayer and worship are included in the Kama-Kanda. These are good when performed in a spirit of unselfashness and not allowed to degenerate into mere formslity. They purify the heart. The Kama-Yogi wants everyone to be saved before himself. His only salvation is to help others to advation. "To serve Kitshna's servants is the highest worship." One great saint prayed, "Let me go to hell with the sins of the whole would, but let the world be saved." This true worship leads to intense self-secrifice. It is told of one sage that he was willing to give all his virtues to his dog, that it might go to heaven, because it had long been faithful to him, while he himself was content to go to hell.

The Jana-Kanda teaches that knowledge slone can save, in other words, that he must become "wise unto salvation". Knowledge is first objective, the Knower knowing Himself. The Self, the only subject,

is in manifestation seeking only to know Itself. The better the mirror, the better reflection it can give; so man is the best mirror, and the puter the man, the more clearly he can reflect God. Man makes the mistake of separating himself from God and identifying himself with the body. This mistake arises through Mâyâ, which is not exactly delusion but might be said to be seeing the real as something else and not as it is. This identifying of ourselves with the body leads to inequality, which inevitably leads to struggle and jealousy, and so long as we see inequality, we can never know happiness. "Ignorance and inequality are the two assures of all misery," says Janes.

When man has been sufficiently buffeted by the

world, he awakes to a desire for freedom; and searching for means of escape from the dreary round of earthly existence, he seeks knowledge, learns what he really is. and is free. After that he looks at the world as a huge machine, but takes good care to keep his fingers out of the wheels. Duty ceases for him who is free : what power can constrain the free being? He does good, because it is his nature, not because any funcied duty commands it. This does not apply to those who are still in the bondage of the senses Only for him, who has transcended the lower self, is this freedom. He stands on his own soul. obers no law, he is free and perfect. He has undone the old superstitions and got out of the wheel Nature is but the mirror of our own selves. There is a Lmit to the working power of human beings, but no limit to desire ; so we strive to get hold of the working powers of others and erior the from of their labours, escaping work ourselves Inventing machinery to work for us can perer increase well-being, for in gratifying desire, we only find it, and then we want more and more, without end Dring all filed with impostified desires, we have to be been arein and again in the vain search for estimaction

"Eight millions of bodies have we had, before we reached the human," say the Hindus. Juana says. "Kill desire and so get rid of it". That is the only way. Cast out all causation and realise the Atman. Only freedom can produce true morality. If there were only an endless chain of cause and effect, Nirvâns could not be. It is extinction of the seeming self, bound by this chain. That is what constitutes freedom, to set beyond causality.

Our true nature is cood, it is free, the pure being that can never be or do wrong. When we read God with our eyes and minds, we call Him this or that; but in reality there is but One, all variations are our interpretations of that One. We become nothing; we regain our true Self. Buddhs's summary of misery as the outcome of "ignorance and caste" (inequality) has been adopted by the Vedantists, because it is the best ever made. It manifests the wonderful insight of this greatest among men. Let us then be brave and sincere whatever path we follow with devotion, must take us to freedom. Once lsy hold of one link of the chain and the whole must come after it by degrees. Water the root of the tree and the whole tree is watered. It is of little advantage to waste time to water each leaf. In other words, seek the Lord and getting Him we get all. Churches, doetrines, forms-these are merely the hedges to protect the tender plant of religion; but later on they must all be broken down, that the little plant may become a tree. So the various religious sects, Bibles, Vedas, and scriptures are just "tubs" for the little plant; but it has to get out of the tub and fill the world.

We must learn to feel ourselves as much in the sun, in stears, as here. Spirit is beyond all time and space; every eye seeing is my eye; every mouth praising the Lord is my mouth; every sinner is 1. We are confined nowhere, we are not body. The universe is our body. We are just the pure crystal reflecting all, but itself

VIII-3

ever the same. We are magicians waving magic wands and creating scenes before us at will, but we have to no behind appearances and know the Self. This world is like water in a kettle, beginning to boil : first a bubble comes, then another, then many, until all is in ebullition and passes away in steam. The great teachers are like the bubbles as they begin-here one, there one; but in the end every creature has to be a bubble and escape. Creation, ever new, will bring new water and go through the process all over again. Buddha and Christ are the two greatest "bubbles" the world has known. They were great souls, who having realised freedom helped others to escape. Neither was perfect, but they are to be judged by their virtues, never by their defects. Jesus fell short, because he did not always live up to his own highest ideal; and above all, because he did not give woman an equal place with man. Woman did everything for him, yet not one was made an apostle. This was doubtless owing to his Semitic origin. The great Aryans, Buddha among the rest, have always put woman in an equal position with man. For them sex in religion did not exist. In the Vedas and Upanishads, woman taught the highest truths and received the same veneration as men.

# VIII

Both happiness and misery are chains, the one golden, the other iron; but both are equally strong to bind us and hold us back from realising our true nature. The Atman knows neither happiness nor misery. These are merely "states", and states must ever change. The nature of the soul is blies and peace unchanging. We have not to get it; we have it: let us wash away the dross from our eyes and see it. We must stand ever on the Self and look with perfect calmness upon all the panorame of the world. It is but baby's play and ought never to distubul us. If the mind is pleased by praise.

it will be pained by blame. All pleasures of the senses or even of the mind are evanescent, but within ourselves is the one true unrelated pleasure, dependent on nothing outside. "The pleasure of the Self is what the would calls religion." The more our blins is within, the more spiritual we are. Let us not depend upon the world for pleasure.

Some poor fishwives, overtaken by a violent storm, found refuge in the garden of a rich man. He received them kindly, fed them, and left them to rest in a summerhouse, surrounded by exquisite flowers which filled all the air with their rich perfume. The women lay down in this sweet-smelling paradise, but could not sleep. They missed something out of their lives and could not be happy without it. At lest one of the women arose and went to the place where they had left their fish baskets, brought them to the summer-house, and then once more happy in the familiar smell, they were all soon sound saleen.

Let not the world be our "fish basket" which we have to depend upon for enjoyment. This is Tāmasīka, or being bound by the lowest of the three qualities (or Gunas). Next higher come the egotistical who talk always about ""." ""." sometimes they do good work and may become spiritual. These are Rājaiska or active. Highest come the interospective nature (Sātvika), those who live only in the Self. These three qualities are in every human being in varying proportions, and different once predominate at different times. We must strive to overcome Tamas with Rajas and then to submerge both in Sattva.

Creation is not a "making" of something, it is the struggle to regain equilibrium, as when atoms of cork are thrown to the bottom of a pail of water: they rush to the top singly and in clusters, and when all have reached the top and equilibrium has been regained, all

motion or "life" eeases. So with creation ; if equilibrium were teached, all change would cease and life, so-called, would end. Life must be accompanied with evil, for when the balance is regained, the world must end, as sameness and destruction are one. There is no possibility of ever having pleasure without pain, or good without evil, for living itself is just the lost equilibrium. What we want is freedom, not life, nor pleasure, nor good. Creation is eternal, without beginning, without end, the ever moving ripple in an infinite lake. There are yet unreached depths and others where stillness has been regained, but the ripple is ever progressing, the struggle to regain the balance is eternal. Life and death are but different names for the same fact, they are the two sides of one coin. Both are Maya, the inexplicable atate of striving at one point to live and a moment later to die. Beyond all this is the true nature, the Atman. We enter into creation, and then, for us, it becomes living. Things are dead in themselves, only we give them life, and then, like fools, we turn round and are afraid of them or enjoy them! The world is neither true nor untrue, it is the shadow of truth.

"Imagination is the gilded shadow of ruth," says the poet. The internal universe, the Real, is infinitely greater than the external one, which is but the shadowy projection of the true one. When we see the "rope", we do not see the "serpent", and when the "seepent" is, the "rope" is not. Both cannot exist at the same time; so while we see the would we do not realise the Self, it is only an intellectual concept. In the realisation of Brahman, the personal "I" and all sense of the world we off Brahman, the personal "I" and all sense of the world is lost. The Light does not know the darkness, because it has no existence in the light; so Brahman is all. While we recognize a God, it is really only the Self that we have separated from ourselves and worthip as outside of us; but all the time it is our own true Self, then

and only God. The nature of the bruta is to remain where he is, of man to seek good and avoid eril, of God to neither seek nor avoid, but just to be blistiful eternally. Let us be Gods, let us make our hearts Lke an occan, to go beyond all the tifles of the world and see it only as a picture. We can then enjoy it without being in any way affected by it. Why look for good in the world, what can we find there? The best it has to offer is only as if children playing in a mud puddle found a few glass beads. They look them again and have to begin the acasch anew. Infinite strength is religion and God. We see anly souls if we are free, there is immortality only if we are free, there is immortality only if we are free, there is God only if He is free

Until we give up the world manufactured by the ero, never can we enter the Kingdom of Heaven. None ever did, none ever will. To give up the world is to utterly forcet the ego, to know it not at all, hving to the body but not being ruled by it. This tascal ego must be obliterated. Power to help mankind is with the allent ones who only live and love and withdraw their own personality entirely. They never any "me" or "mine", they are only blessed in being the instruments to help others. They are wholly identified with God. asking nothing and not consciously doing anything. They are the true livanmuktas-the absolutely selfless, their little personality thoroughly blown away, ambition nonexistent. They are all principle, with no personality. The more we sink the "little self", the more God comes Let us get rid of the little "I" and let only the great "I" live in us. Our best work and our greatest influence is when we are without a thought of self. It is the "desireless" who bring great sesults to pass. Bless men when they revile you. Think how much good they are doing by helping to stamp out the false evo. Hold fast to the real Self, think only pure thoughts, and you will

accomplish more than a regiment of mere preachers.
Out of purity and silence comes the word of power.

Expression is necessarily degeneration, because spirit can only be expressed by the "letter", and as St Faul said, "the letter killeth". Life cannot be in the "letter" which is only a reflection. Yet, principle must be clothed in matter to be "known". We lose sight of the Real in the covering and come to consider that as the Real. instead of as the symbol. This is an almost universal mistake. Every great Teacher knows this and tries to guard against it; but humanity, in general, is prone to worship the seen rather than the unseen. This is why a succession of prophets have come to the world, to point again and again to the principle behind the personality and to give it a new covering suited to the times. Truth remains ever unchanged, but it can only be presented in a "form"; so from time to time a new "form" or expression is given to Truth, as the progress of mankind makes them ready to receive it. When we free ourselves from name and form, especially when we no longer need a body of any kind, good or had, coarse or fine, then only do we escape from bondage. "Eternal progression" would be eternal bondage. We must get beyond all differentiation and reach eternal "sameness" or homogeneity or Brahman. The Atman is the unity of all personalities and is unchangeable, the "One without a second". It is not life, but it is coined into life. It is beyond life and death and good and bad. It is the Absolute Unity. Dare to seek Truth even through hell. Freedom can never be true of name and form, of the related. No form can say, "I am free as a form". Not until all ides of form is lost, does freedom come. If our freedom burts others, we are not free there. We must not hurt others. While real perception is only one.

relative perceptions must be many. The fountain of all howeledge is in every one of us—in the ant as in the lighest angel. Real religion is one, all quarter is with the forms, the symbols, the "illustrations". The millicanum exics already for these who find it. The ruth is, we have foot conselves and think the world to be lost. Tool I Hearters not thou? In then own heart day and right, is saming that Grenal Music-Sacheddisanada, Solam, Solam, (Existence, Knowledge, and Eliss I am He I am Hell 1.

He, I am Helt" To try to think without a phantaim is to try to make the impossible possible. Each shought has two partsthe tlinking and the word, and we must have both Neither idealists nor materialists are able to explain the world; to do that, we must take both siles and expression. All knowledge is of the seffected as we can only see our own faces reflected to a minor. So, no one can know his Self or Syshman : but each to that Self and must see it reflected in order to make it an object of knowledge. This seeing the illustrations of the unseen Principle is what leads to idolatry-so-called The range of idols is wider than is usually supposed. They range from wood and stone to creat personalities as lesus or Buddha. The introduction of idole into India was the tends of Buddha's constantly inveighing against a Personal God. The Vedas knew them not, but the reaction against the loss of God as Greator and Friend led to making idols of the great teachers, and Buddha himself became an idol and is worshipped as such by millions of people. Violent attempts at reform always end in retarding true reform. To worship is inherent in every man's nature; only the highest philosophy can rise to pure abstraction. So man will ever personify his God in order to worship I fim. This is very good, as long as the symbol, be it what it may, is worshipped as a symbol of the Divinity behind and not in and for itself. Above

all, we need to free ourselves from the supersition of believing because "it is in the bools". To try to make everything—science, religion, philosophy, and all—conform to what any book says, is a most horrible tyranny. Book-worship is the worst form of idolatry. There was once a stag, proud and free, and he talked in a lordly fashion to his child, "Look at me, see my powerful horns! With one thrust I can kill a man; it is a fine thing to be a stag!" Just then the sound of the huntsman's bugle was heard in the distance, and the stag precipiately fled, followed by his wondering child. When they had

reached a place of aafety, he enquired, "Why do you fly before man, O my father, when you are so atrong and brave?" The stag answered: My child, I know I am atrong and powerful, but when I hear that sound. something seizes me and makes me flee whether I will or no. So with us. We hear the "bugle sound" of the laws laid down in the books, habits and old superstitions lay hold of us : and before we know it, we are fast bound and forget our real nature which is freedom. Knowledge exists eternally. The man who discovers a spiritual truth is what we call "inspired", and what he brings to the world is revelation. But revelation, too. is eternal and is not to be ervatallised as final and then blindly followed. Revelation may come to any man who has fitted himself to receive it. Perfect purity is the most essential thing, for only "the pure in heart shall see God". Man is the highest being that exists and this is the greatest world, for Lere can man realise freedom. The highest concept we can have of God is man. Every attribute we give Him belongs also to man, only in a lesser derree. When we rise higher and want to get out of this concept of God, we have to get out of the body.

cot of much and imagination, and leave this world out of sight. When we rise to be the Absolute, we are no larger in the world, all is Subject, without object

Discourses on finite long

Man is the area of the only "world" we can ever know Those who have arrained "sameness" or perfection, are said to be "living in God". All hatred is "killing the sell by the self'; therefore, love is the law of life. To rise to this is to be perfect , but the more "perfect" we are, the less work can we do. The Sittriks see and know that all this world is more child's play and do not trouble themselves about that We are not much disturbed when we see two purposes fighting and biting each other. We know it is not a serious matter. The perfect one knows that this world is Maya Life is called Samalra-it is the result of the conflicting forces acting upon us. Materialism says, 'The worce of freedom is a delusion". Idealism says, "The voice that tells of bondage is but a dream" Vedanta says, "We are free and not free at the same time". That means that we are never free on the earthly plane, but ever free on the spiritual side. The Self is beyond both freedom and bondage. We are Besliman, we are immortal knowledge beyond the senses, we are bliss absolute

# SIX LESSONS ON RAJA-YOGA<sup>3</sup>

Rája-Yoga is as much a science as any in the world. It is an analysis of the mind, a gathering of the facts of the super-sensuous world and so building up the spiritual world. All the great spiritual teachers the world has known said, "I see and I know". Jesus, Paul, and Peter all claimed actual perception of the spiritual truths they taught.

This perception is obtained by Yoga.

This perception is obtained by Yoga. Neither memory nor consciousness can be the limitation of existence. There is a super-conscious state. Both it and the unconscious state are sensationless, but with a vast difference between them—the difference between ignorance and knowledge. Present Yoga as an appeal to reason, as a science.

Concentration of the mind is the source of all knowledge.

Yoga teaches us to make matter our slave, as it ought to be. Yoga means "yoke", "to join", that is, to join the soul of man with the supreme Soul or God.

The mind acts in and under consciousness. What we call consciousness is only one link in the infinite chain

that is our nature.

This "I" of ours covers just a little consciousness and a vast amount of unconsciousness, while over it, and mostly unknown to it, is the super-conscious plane.

Through faithful practice, layer after layer of the mind opens before us, and each reveals new facts to us. We see as it were new worlds created before us, new

powers are put into our hands, but we must not stop

God alone is our goal Failing to reach God, we die,

Three things are necessary to the student who wishes to succeed.

First. Gave up all ideas of engegment in this world and the next, care only for God and Truth. We are here to know turth, not for enjoyment. Leave that to brures who enjoy as we never can. Man is a thinking leting and must strucyle on until he conquers ideath, wall be seen the light. He must not spend himself in win taking that hears no frust. Worsday of society and regular opinion is idolatify. The soul has no sex, no tourity, no place, no time.

Second Intense desire to know Truth and God Be eager for them, long for them as a drowning man long for breati. Want only God, take nothing else, let not "seeming" cheat you any longer. Turn from all and seek only God.

Third. The six trainings First—Restraining the middle from going outward Scond—Restraining the senser. Dirid-Turning the mind inward fourth—suffering everything without murmuring fulth—Fastening the middle to ne idea. Take the subject before you and think it out; never leave it. Do not count time. Sixth—Think containly of your real nature. Get rid of superstition. Do not hypnotise yourself into a belief in your own inferiority. Day and night tell yourself what you was inferiority out realess featurally realizely your owners.

Without these disciplines, no results can be gained We can be conscious of the Absolute, but we can never express it. The moment we try to express it, we hmit it and it ceases to be Absolute.

with God

We have to go beyond sense limit and transcend even reason, and we have the power to do this.

After practising the first lesson in breathing a week, the pupil reports to the teacher.

# FIRST LESSON

This is a lesson seeking to bring out the individuality. Each individuality must be cultivated. All will meet at the centre "Imagination is the door to inspiration and the basis of all thought." All prophets, poets, and discoverers have had great imaginative power. The explanation of nature is in us; the stone falls outside, but gravitation is in us, not outside. Those who stuff themselves, those who starve themselves, those who alcep too much, those who aleep too little, cannot become Yogis, Ignorance, fickleness, jealousy, laziness, and excessive attachment are the great enemies to success in Your practice. The three creat requisites are:

First Purity, physical and mental; all uncleanness. all that would draw the mind down, must be abandoned.

Second. Patience: At first there will be wonderful manifestations, but they will all cease. This is the hardest period, but hold fast, in the end the gain is sure if you have patience

Third Perseverance: Persevere through thick and thin, through health and sickness, never miss a day in practice

The best time for practice is the junction of day and night, the calmest time in the tides of our bodies, the zero point between two states. If this cannot be done, practise upon rising and going to bed. Great personal cleanliness is necessary-a daily bath.

After bathing, six down and hold the seat firm, that

is, imagine that you sit as firm as a rock, that nothing can move you. Hold the head and shoulders and the hips in a straight line, keeping the spinal column free: all action is along it, and it must not be impaired.

Begin with your toes and think of each part of your body as perfect; picture it so in your mind, touching each part if you prefer to do so. Pass upward bit by bit until you reach the head, thinking of each as perfect, lacking nothing. Then think of the whole as perfect, an instrument given to you by God, to enable you to attain Truth, the vessel in which you are to cross the ocean and reach the shores of eternal truth. When this has been done, take a long breath through both nostrils, throw it out seguin, and then hold it out as long as you comfortably can. Take four such breaths, then breathe naturally and pray for illumination.

"I meditate on the glory of that being who created this universo; may be illuminate my mind." Sit and meditate on this ten or fifteen minutes.

Tell your experiences to no one but your Guru.

Talk as little as possible.

Keep your thoughts on virtue; what we think we tend to become.

Holy meditation helps to burn out all mental impurities. All who are not Yogis are slaves; bond after bond must be broken to make us free.

All can find the reality beyond. If God is true, we must feel him as a fact, and if there is a soul, we ought to be able to see it and feel it.

The only way to find if there be a soul is to be something which is not the body.

The Yogis class our organs under two chief heads: organs of sense and organs of motion, or knowledge and setion.

The internal organ or mind has four aspects. First—Manas, the cognitating or thinking faculty, which is usually

almost entirely wasted, because uncontrolled; properly governed, it is a wonderful power. Second—Buddhi, the will (sometimes ealled the intellect). Third—Ahamkira, the self-conscious egotism (from Aham). Fourth—Chita, the substance in and through which all the faculties act, the floor of the mind as it were, or the sea in which the various faculties are ware.

Yoga is the science by which we stop Chitta from assuming, or becoming transformed into, several faculties. As the reflection of the moon on the sea is broken or blurned by the waves, so is the seffection of the Atman, the true Self, broken by the mental waves. Only when the sea is stilled to mirror-like eslumes can the reflection of the moon be seen, and only when the "mind-stuff", the Chitta, is controlled to absolute eslumes, is the Self to be recognised.

The mind is not the body, though it is matter in a finer form. It is not eternally bound by the body. This is proved as we get occasionally lossened from it. on learn to do this at will by controlling the senses

When we can do that fully, we shall control the universe, because our world is only what the senses bring us Freedom is the test of the higher being. Spiftual Ele begins when you have loosened yoursell from the centrol of the senses. He whose senses rule him is world!y—is a slave.

If we could entirely stop our mind stuff from breaking irro waves, it would put an end to our bodies. For millions of years we have worked so hard to manufacture these bodies that in the simight we have forgotten our real purpose in getting them, which was to become perfect. We have grown to think that body-making is the end of our efforts. The is Mayl. We rount break the delacon and return to our original aim and realise

are not the body, it is our servant.

Learn to take the mind out and to see that it is

separate from the body. We endow the body with sensition and life and then think it is alive and real. We have worn it so long that we forget that it is not identical with us. Yoga is to help us put off our body when we please and see it as our servant, our instrument, not our ruler. Controlling the mental powers is the first great aim in Yoga practices. The second is concentrating them in full force upon any subject.

You cannot be a Yogi if you talk much.

### SECOND LESSON

This Yoga is known as the eightfold Yoga, because it is divided into eight principal parts. These are: First—Yama. This is most important and has to govern

First—Yama. This is most important and has to govern the whole life; it has five divisions: 1st. Not injuring any being by thought, word, or

deed.

2nd. Non-covetousness in thought, word, or deed.

2nd. Non-covetousness in thought, word, or deed 3rd. Perfect chastity in thought, word, or deed.

4th. Perfect truthfulness in thought, word, or deed.

5th. Non-receiving of gifts.

Second-Niyama. The bodily care, bathing daily,

dietary, etc.
Third-Asana, Fosture, Hips, shoulders, and head must be held straight, leaving the spine free.

Fourth—Prânâyâma. Restraining the breath (in order to get control of the Prâna or vital force).

Fifth—Pratyahara. Turning the mind inward and restraining it from going outward, revolving the matter in the mind in order to understand it.

Sixth-Dhâranâ. Concentration on one subject.

Seventh-Dhyana. Meditation.

Eighth—Samādhi. Illumination, the aim of all our efforts

Yama and Niyama are for lifelong practice; as for the others, we do as the leech does, not leave one blade of grass before firmly grasping another. In other words, we have thoroughly to understand and practise one step, before taking another.

The subject of this lesson is Pranayama, or controlling the Prana. In Raja-Yoga breathing enters the psychic
plane and brings us to the spiritual. It is the fly-wheel
of the whole bodily system. It acts first upon the lungs,
the lungs act on the heart, the heart acts upon the circulation, this in turn upon the brain, and the brain upon the
mind. The will can produce an outside sensation, and
the outside sensation can arouse the will. Our wills are
weak; we do not realise their power, we are so much
bound up in matter. Most of our action is from outside
in. Outside nature throws us off our balance and we
cannot (as we ought) throw nature of her balance. This
is all wrong; the stronger power is really within.

The great sainta and teachers were those who had conquered this world of thought within themselves and so spake with power. The story<sup>2</sup> of the minister confined in a high tower, who was released through the efforts of his wife who brought him a beetle, honey, a silken thread, a cord, and a rope, illustrates the way we gain control of our mind by using first the physical regulation of the breath as the silken thread. That enables us to lay hold of one power after another until the rope of concentration delivers us from the prison of the body and we are free. Reaching freedom, we can discard the means used to brings us there.

Pranayama has three parts:

Ist. Puraka—inhaling.

2nd. Kumbhaka-restraining.

3rd. Rechaka-exhaling.

<sup>&</sup>lt;sup>1</sup> For the story see The Complete Works of Swami Vivekenands. Vol. 1, p. 143.

There are two currents passing through the brain and circulating down the sides of the apine, crossing at the base and returning to the brain. One of these currents, called the "sun" (Fingala), starts from the left hemisphere of the brain, crosses at the base of the brain to the right side of the apine, and recrosses at the base of the prine, like one-half of the figure eight.

The other current, the "moon" (Idâ), reverses this action and completes this figure eight, Of course, the lower part is much longer than the upper. These currents flow day and night and make deposits of the great life forces at different points, commonly known as "plexunes"; but we are rarely conscious of them By concentration we can learn to feel them and trace them over all parts of the body. These "sun" and "moon" currents are intimately connected with breathing, and by regulating this we get control of the body.

In the Katha Upanishad the body is described as the chariot, the mind is the reins, the intellect is the charioteer. the senses are the horses, and the objects of the senses their road. The self is the rider, seated in the charlot. Unless the rider has understanding and can make the charioteer control his homes, he can never attain the goal . but the senses, like vicious steeds, will draw him where they please and may even destroy him These two currents are the great "check rein" in the hands of the charioteer, and he must get control of this to control the horses. We have to get the power to become moral; until we do that we cannot control our actions You alone enables us to carry into practice the teachings of morality. To become moral is the object of Yoga. All great teachers were Yogis and controlled every current. The Yogis arrest these currents at the base of the spine and force them through the centre of the spinal column They then become the current of knowledge, which only exists in the Yogi.

VIII\_4

Second Lesson in Breathing: One method is not for all This breathing must be done with rhythmic regularity, and the easiest way is by counting; as that is purely mechanical, we repeat the sacred word "Om" a certain number of time; instead.

The process of Pranayama is as follows: Close the right nostril with the thumb and then slowly inhale through the left nostril, repeating the word "Om" four times.

Then firmly close both nostrils by placing the forefinger on the left one and hold the breath in, mentally repeating "Om" eight times

Then, removing the thumb from the right nostril, exhale slowly through that, repeating "Om" four times.

As you close the exhalation, draw in the abdomen forably to expel all the sir from the lungs. Then slowly inhale through the inght nostril, keeping the left one closed, repeating "Om" four times. Next close the tight nostril with the thumb and hold the breath while repeating "Om" eight times. Then unclose the left nostril and slowly exhale, repeating "Om" four times, drawing in the abdomen as before. Repeat this whole operation twice at each sitting, that is, making four Pranayamas, two for each nostril. Before taking your aeat it is well to begin with prayer.

This needs to be practised a week, then gradually increase the duration of breathings, keeping the same ratio, that is, if you repeat "On" six times at inhalation, then do the same at exhalation and twelve times during Kumbhaka. These exercises will make us more spiritusl, more pure, more boly. Do not be led aside into any byways or seek after power. Love is the only power that stays by us and increases. He who seeks to come to God through Raja-Yogs must be strong mentally, physically, morally, and spiritually. Take every step in that Ighs.

Of hundreds of thousands only one soul will say. "I will go beyond and I will penetrate to God". Few can feeth truth: but to accomplish anything, we must be willing to die for Truth.

## THIRD LESSON

Kundalini: Realise the soul not as matter, but as it is. We are thinking of the soul as body, but we must separate it from sense and thought. Then alone can we know we are immortal. Change implies the duality of cause and effect, and all that changes must be mortal. This proves that the body cannot be immortal, nor can the mind, because both are constantly changing Only the unchangeable can be immortal, because there is nothing to act upon it.

We do not become it, we are it, but we have to clear away the veil of ignorance that hides the truth from us. The body is objectified thought: The 'sun' and 'moon' currents bring energy to all parts of the body. The surplus energy is stored at certain points (plezuses) along the spinal column commonly known as nerve

These currents are not to be found in dead bodies and can only be traced in a healthy organism.

The Yogi has an advantage, for he is able not only to feel them, but actually to see them. They are luminous in his life and so are the great nerve centres.

There is conscious as well as unconscious action. The Yogis possess a third kind, the amper-conscious, which in all countries and in all ages has been the source of all teligious knowledge. The super-conscious state makes no mistakes, but whereas the action of the instinct would be purely mechanical, the Jorner is beyond consciousness.

in thought, word, and deed is a sine qua non. The same laws apply to the married and the single. If one wastes the most potent forces of one's being, one cannot become spiritual.

All history teaches us that the great seers of all ages were either monks and ascetics or those who had given up married life; only the pure in life can see God.

Just before making the Pranagama, endeavour to visualise the triangle. Close your eyes and picture it vividly in your imagination. See it surrounded by flames and with the serpent coiled in the middle. When you can clearly see the Kundalini, place it in magination at the base of the spine, and when restraining the breath in Kumbhaka, throw it forcibly down on the head of the serpent to awaken it. The more powerful the imagination, the more quickly will the real result be attained and the Kundalini be awakened. Until it does, imagine it does it yo feel the currents and try to force them through the Ssalurmas. This hastees their action.

#### FOURTH LESSON

Hefore we can control the mind we must study it.
We have to seize this unstable mind and drag it from its wanderings and fix it on one idea. Over and over again this must be done. By power of will we must set hold of the mind and make it ston and reflect upon

the glory of God.

The easiest way to get hold of the mind is to sit

quiet and let it drift where it will for a while. Hold fast to the idea, "I am the witness watching my mind drifting. The mind is not I". Then ace it think as if it were a thing entirely apart from yourself. Identify yourself with God, never with matter or with the mind.

Thoughts being sectures we should not create them. We have to exclude all theory's from the mind and make it a blank as fars as a thought comes we have to banish it. To be able to accomplish this, we must transcend matter and go beyond our body. The whole life of man is really an effort to do this.

Each sound has its own meaning. In our nature these two things are connected

The highest ideal we have is God. Meditain on Him. We cannot know the Knower, but we are He

Seeing evil, we are creating it. What we are, we see outside, for the world is our mirror. This little body

is a little mirror we have created, but the whole universe is our body. We must think this all the time, then we shall know that we cannot die or burt another, because he is our own. We are birthless and deathless and we ought only to love.

"This whole universe is my body; all health all happiness is mine, because all is in the universe." Say, "I me the universe." We finally learn that all action is from its to the misror.

# FIFTH LESSON

Pratyfikira and Difranti, Krishna aspa. All who seek me by whatever means will reach me. All must reach me." Pratyfikira is a gathering toward, an attempt to get ledd of the mind and focus at on the desired object. The first step is to let the mind drift, watch it; see what it drifts, be only the witness. Wind in not sould or spirit. It is only matter to a fine form and we own it and can learn to manipulate at through the better charging.

The hode is the objective size of what we call raind (whitefive). We, the Self, are beyond both hode and mind; we are "Atman", the eternal unchargeable we ness. The hode is cristall and through:

When the breath is flowing through the left nostril, it is the time for rest; when through the right, for work; and when through both, the time to meditate. When we are calm and breathing equally through both nostrils, we are in the right condition for quiet meditation. It is no use trying to concentrate at first. Control of thought will come of itself.

After sufficient practice of closing the nostrils with the thumb and forefinger, we shall be able to do it by the power of will, through thought alone.

Prânâyâma is now to be slightly changed. If the student has the name of his "lahs" (Chosen Ideal), he should use that instead of "Om" during inhelation and exhalation, and use the word "Hum" (pronounced Hoom) during Kumbhaks.

Throw the restrained breath forcibly down on the head of the Kundalini at each repetition of the word Hum and imagine that this awakens her. Identify your-self only with God. After a while thoughts will announce their coming, and we shall learn the way they begin and be aware of what we are going to think, just as on this plane we can look out and see a person coming. This stage is reached when we have learned to separate ourselves from our minds and see ourselves as one and thought as something apart. Do not let the thoughts grapp you is stand aside and they will die away.

Follow these holy thoughts; go with them: and when they melt away, you will find the feet of the Omnipotent God. This is the super-conscious state: when the idea melts, follow it and melt with it.

Haloes are symbols of inner light and can be seen by the Yogi. Sometimes we may see a face as if surrounded by flames and in them read the character and judge without erring. We may have our lists come to us as a vision, and this symbol will be the one upon which we can rest easily and fully concentrate our minds. We can imagine through all the senses, but we do so mostly through the eyes. Even imagination is half material. In other words, we cannot think without a phantasm. But since animals appear to think, yet have no words, it is probable that there is no inseparable connection between thought and images.

Try to keep up the imagination in Yega, being eareful to keep it pure and holy. We all have our peculiarities in the way of imaginative power; follow the way most natural to you; it will be the easiest.

We are the results of all reincarnations through Karma; "One lamp lighted from another," says the Buddhist—different lamps, but the same light.

Be cheeful, be brave, bathe daily, have patience, putty, and perseverance, then you will become a Yogi in truth. Never try to hurry, and, if the higher powers come, remember that they are but aide-paths. Do not let them temps you from the main road; you them aside and hold fast to your only true aim—God. Seek only the Eternal, finding which we are at test for ever; having the all, nothing is left to attive for, and we are for ever in free and perfect existence—Existence absolute. Knowledge subsulte. Blis absolute. Blis absolute.

# SIXTH LESSON

Sushumna: It is very useful to meditate on the Sushumna. You may have a vision of it come to you and this is the best way. Then meditate for a long time on that. It is a very fine, very brilliant thread, this living passage through the spinal cord, this way of salvation through which we have to make the Kundalini itself.

In the language of the Yogi, the Sushuman has its ends in two lotuses, the lower lotus surrounding the triangle of the Kundalini and the top one in the brain surrounding the pineal gland; between these two are four other lotuses, stages on the way:

# WOMEN OF INDIA

(Delivered at the Shakespeare Club House, in Pasadena, California, on January 18, 1900)

SWAM VIVEKANANDA: "Some persons desire to ask questions about Hindu Philosophy before the lecture and to question in general about India after the lecture, but the chief difficulty is I do not know what I am to lecture on. I would be very glad to lecture on any subject, either on Hindu Philosophy or on anything concerning the race, its history, or its literature. If you, ladies and gentlemen, will suggest anything, I would be very glad."

QUESTIONER: "I would like to ask, Swami, what special principle in Hindu Philosophy you would have us Americans, who are a very practical people, adopt, and what that would do for us beyond what Christianity can do."

SWAMI VIVEKANANDA: "That is very difficult for me to decide; it rests upon you. If you find anything which you think you ought to adopt, and which will be helpful, you should take that. You see I am not a missionary and I am not going about convening people to my idea. My principle is that all such ideas are good and great : so that some of your ideas may suit some people in India, and some of our ideas may suit some neonle here : so ideas must be cast abroad, all over the world."

QUESTIONER: "We would like to know the result of your philosophy; has your philosophy and religion lifted

your women above our women?" SWAMI VIVEKANANDA: "You see, that is a very invid-

ious question: I like our women and your women too." QUESTIONER: "Well, will you tell us about your women, their customs and education, and the position they hold in the family?"

SWAMI VIVEKANANDA: "Oh. yes: those things I would be very glad to tell you. So, you want to know about Indian women tonight, and not philosophy and other things?"

# THE LECTURE

I must begin by saying that you may have to best with me a good deal, because I belong to an Order of people who never marry; so my knowledge of women in all their relations, as mother, as wife, as daughter and sister, must necessarily not be so complete as it may be with other men. And then, India, I must remember, is a vast continent, not merely a country, and is inhabited by many different races. The nations of Europe are nearer to each other, more similar to each other, than the races in India. You may get just a rough idea of it if I tell you that there are eight different languages in all India. Different languages-not dialects-each having a literature of its own. The Hindi language, alone, is spoken by 100,000,000 people; the Bengali by about 60,000,000. and so on. Then, again, the four northern Indian languages differ more from the southern Indian languages than any two European languages from each other. They are entirely different : as much different as your language differs from the lapanese : so that, you will be astonished to know, when I go to southern India, unless I meet some people who can talk Sanskrit. I have to speak to them in English. Furthermore, these various races differ from each other in manners, customs, food, dress, and in their methods of thought

Then, again, there is caste. Each caste has become. as it were, a separate racial element. If a man lives long enough in India, be will be able to tell from the eatures what caste a man belongs to. Then, between tastes, the manners and customs are different. And all hese castes are exclusive; that is to say, they would neet socially, but they would not eat or drink together. nor intermarry. In these things they remain separate. They would meet and be friends to each other, but there it would end.

Although I have more opportunity than many other men to know wothen in genetal, from my position and my occupation as a preacher, continuously travelling from one place to another, and coming in contact with all grades of society—fand women, even in nothern india, where they do not appear before men, in many places would break this law for religion and would come to hear us preach and talk to us—still, it would be hazardous on my part to assert that I know everything about the women of India.

So I will try to place before you the ideal. In each nation, man or woman represents an ideal coenceusly or unconsciously being worked out. The individual is the external expression of an ideal to be embodited. The collection of each individuals is the nation, which also represents a great ideal; towards that it is moving And, therefore, it is rightly assumed that to understand a nation you must first understand is ideal, for each nation refuses to be judged by any other standard than its own.

All growth, progress, well-being, or degradation is but relative. It refers to a certain standard, and each man to be understood has to be referred to that standard of his perfection. You see this more markedly in nations: what one nation thinks good might not be so regarded by another nation. Cousin-marriage is quite permissible in this country. Now, in Idaia, it is illegal; not only so, it would be classed with the most horrible incest Widow-marriage is perfectly legitimate in this country Among the higher causes in India it would be the greatest degradation for a woman to many twice. So, you see, we work through such different ideas that to judge one people by the other's standard would be neither just not prescribelle. Therefore, we must know what the ideal.

## SWAMI VIVEKANANDA'S WORKS

56

is that a nation has raised before itself. When speaking of different nations, we start with a general idea that there is one code of ethics and the same kind of ideals for all races; practically, however, when we come to judge of others, we think what is good for us must be good for everybody; what we do is the right thing, what we do not do, of course in others would be outrareous. I don't mean to say this as a criticism, but just to bring the truth home. When I hear Western women denounce the confining of the feet of Chinese ladies, they never seem to think of the corsets which are doing far more injury to the race This is just one example; for you must know that cramping the feet does not do onemillionth part of the injury to the human form that the corset has done and is doing-when every organ is displaced and the spine is curved like a screent. When measurements are taken, you can note the curvatures. do not mean that as a criticism but just to point out to you the situation, that as you stand aghast at women of other races, thinking that you are supreme, the very reason that they don't adopt your manners and customs shows that they also stand aghast at you.

Therefore, there is some misunderstanding on both sides. There is a common platform, a common ground of understanding, a common bumanity, which must be the basis of our work. We ought to find out that complete and perfect human nature which is working only in parts, here and there. It has not been given to one man to have everything in perfection. You have a part to play: I, in my humble way, another; here is one who plays a little part; there, another. The perfection is the combination of all these parts. Just as with individuals, so with races. Each race has a part to play; each tace has one side of human nature to develop. And we have to take all these together; and, possibly in the distant future, some race will arise in which all these marvellous

individual race perfections, attained by the different races, within the world has not yet dreamed. Beyond saying that, I have no criticam to offer about anybody. I have travelled not a little in my life. I have kept my eyes open; and the more I go about the more my mouth is closed. I have no criticam to offer.

Now, the ideal woman in lada as the mother, the mother first, and the mother last. The word woman calls up to the mind of the Hindu, snotherhood, and God is called Mother. As children, every day, when we are boys, we have to go easily in the monting with a little cup of water and place it before the mother, and mothet dilin her too into it and we drink is

In the West, the woman is wife The idea of womanhood is concentrated there—as the wife To the ordinary man in India, the whole force of womanhood is concentrated in motherhood In the Western home, the wife rules In an Indian home, the mother rules II a mother comes noto a Western home she has to be subordinate to the wife. Index to the wife belongs the home A mother always lives in our homes the wife must be subordinate to her. See all the difference of ideas

Now, I only suggest companisons. I would state facts so that we may compare the two sides. Make this companison. If you sak, "What is an Indian woman as wife?" the Indian saks, "Where is the American woman as mother? What is ahe, the sill-glottous, who gave me this body? What is she who kept me in her body for nine month? Where is she who would give me twenty times her life, if I had need? Where is she whose love mover dies, however wicked, however vile I am? Where is she, in companison with Irt, who goes to the divorce court the reoment I treat her al title hadip? ON American women, where is she?" I will not find her in your country. I have not found the son who tranks mother.

is first. When we die, even then, we do not want our wives and our children to take her place. Our mother —we want to die with our head on her lap once more, if we die before her. Where is ahe? Is woman a name to be coupled with the physical body only? Ay! the flindu mind fears all those ideals which say that the flesh must cling unto the flesh. No, no! Woman! thou shalt not be coupled with anything connected with the flesh. The name has been called holy once and for ever, for what name is there which no lust can ever approach, no carnality ever come near, than the one word mother? That is the ideal in India.

I belong to an Order very much like what you have in the Mendicant Friars of the Catholic Church; that is to say, we have to go about without very much in the way of dress and beg from door to door, live thereby, preach to people when they want it, sleep where we can get a place-that way we have to follow. And the rule is that the members of this Order have to call every woman "mother"; to every woman and little girl we have to say "mother"; that is the custom. Coming to the West, that old habit remained and I would say to ladies, "Yes, mother", and they are horrified. I couldn't understand why they should be horrified. Later on, I discovered the reason: because that would mean that they are old. The ideal of womanhood in India is motherhood -that marvellous, unselfish, all-suffering, ever-forgiving mother. The wife walks behind-the ahadow. She must imitate the life of the mother; that is her duty. But the mother is the ideal of love: she rules the family. she possesses the family. It is the father in India who thrashes the child and spanks when there is something done by the child, and always the mother puts herself between the father and the child. You see it is just the opposite here. It has become the mother's business to spank the children in this country and poor father comes

in between. You see, ideals are different. I don't mean this as any citicism. It is all good—this what you do. but our way is what we have been taught for ages. You never hear of a mother cursing the child; ahe is forguing, always forgiving. Instead of 'Our Father in Heaven', we say 'Mother' all the time; that ides and that word are ever associated in the Hindu mind with Infinite Lowe, the mother's love being the nearest approach to God's love in this mortal world of ours. 'Mother, O Mother, be merciful; I am wicked! Many children have been wicked, but there never was a wicked mother,'' so says the creat saint Ramprasid.

There she inthe Hindu mother. The son's wife comes in as her daughter; just as the mother's own daughter married and went out, so her son married and brought in another daughter, and she has to fall in line under the government of the queen of queens, of his mother. Even I, who never married, belonging to an Order that never marries, would be disgusted if my wife, supposing I had married, dared to displease my mother I would be disgusted. Why? Don't I worship my mother? Why should not her daughter-in-law? Whom worship, why not she? Who is she, then, that would try to ride over my head and govern my mother) She has to wait till her womanhood is fulfilled; and the one thing that fulfils womanhood, that is womanliness in woman, is motherhood. Wait till she becomes a mother, then she will have the asme right. That, according to the Hindu mind, is the great mission of woman-to become a mother. But oh, how different! Oh, how different! My father and mother fasted and prayed, for years and years, so that I would be born. They pray for every child before it is born Says our great law-giver, Manu. giving the definition of an Arjan, "He is the Arjan who is born through prayer". Every child not born through prayer is illegitimate, according to the great 1711-5

law-giver. The child must be prayed for. Those children that come with curses, that alip into the world, just in a moment of inadvertence, because that could not be prevented-what can we expect of such progeny? Mothers of America, think of that I Think, in the heart of your hearts, are you ready to be women? Not any question of race or country, or that false aentiment of national pride. Who dares to be proud in this mortal life of ours, in this world of woes and miseries? What are we before this infinite force of God? But I ask you the question tonight: Do you all pray for the children to come? Are you thankful to be mothers, or not? Do you think that you are sanctified by motherhood, or not? Ask that of your minds. If you don't, your marriage is a lie, your womanhood is false, your education is superstition, and your children, if they come without prayer, will prove a curse to humanity.

See the different ideals now coming before us. From motherhood comes tremendous responsibility. There is the basia, start from that. Well, why is mother to be worshipped so much? Because our books teach that it is the pre-natal influence that gives the impetus to the child for good or evil. Go to a hundred thousand colleges, read a million books, associate with all the learned men of the world-better off you are when born with the right stamp. You are born for good or evil. The child is a born god or a born demon; that is what the books say-Education and all these things come afterwards-are a mere bagatelle. You are what you are born, Born unhealthful, how many drug stores, swallowed wholesale, will keep you well all through your life? How many people of good, healthy lives were born of weak parents. were born of aickly, blood-poisoned parents? How many? None-none. We come with a tremendous impetus for good or evil: horn demons or born gods. Education or other things are a bagatelle.

Thus say our books: direct the pre-natal influence. Why should mother be worshipped? Because she made herself nure. She underwent harsh penances cometimes to keen herself as pure as purity can be. For, mind you, no woman in India thinks of giving up her body to any man : it is her own. The English, as a reform, have introduced at present what they call "Restitution of conjugal rights", but no Indian would take advantage of it. When a man comes in physical contact with his wife, the circumstances she controls, through what prayers and through what yows! For that which brings forth the child is the holiest symbol of God himself It is the greatest prayer between man and wife, the prayer that is poing to bring into the world another soul fraught with a tremendous power for good or for evil. Is it a joke? ls it a simple nervous satisfaction? Is it a brute enjoyment of the body? Says the Hindu: no. a thousand times, no l

But then, following that, there comes in another idea. The idea we started with was that the ideal is the love for the mother—herself all suffering, all-forbearing. The worship that is accorded to the mother has its fountainhead there. She was a saint to bring me into the world; ahe kept her body pure, her mind pure, her food pure, her dothes pure, her imagination pure, for years, because I would be born. Because ahe did that she deserves worship. And what follows? Linked with motherhood is wifehood.

You Western people are individualistic. I want to do this thing because I like it; will elbow every one. Why? Because I like to, I want my own satisfaction, so I marry this woman, Why? Because I like her. This woman marries me. Why? Because ahe likes me. There it ends. She and I are the only two persons in the whole, infinite world; and I marry her and ahe marries me—nobody else is niqued, nobody else responsible.

Your Johns and your Janes may go into the forest and there they may live their lives; but when they have to live in society, their maringe means a tremendous amount of good or evil to us. Their children may be veritable demons, burning, murdering, robbing, stealing, drinking, hideous, vile.

So, what is the basis of the Indian's social order? It is the caste law. I am born for the caste, I live for the caste. I do not mean myself, because, having joined an Order, we are outside. I mean those that live in civil society. Born in the caste, the whole life must be lived according to caste regulation. In other words, in the present-day language of your country, the Western man is born individualistic, while the Hindu is socialistic -entirely socialistic. Now, then, the books say: if I allow you freedom to go about and marry any woman you like, and the woman to marry any man she likes what happens? You fall in love : the father of the woman was. perchance, a lunatic or a consumptive. The girl falls in love with the face of a man whose father was a roaring drunkard. What says the law then? The law lays down that all these marriages would be illegal. The children of drunkards, consumptives, lunatics, etc., shall not be married. The deformed, humpbacked, crazy, idioticno marriage for them, absolutely none, save the law.

But the Mohammedan comes from Arabia and he has his own Arabian law; so the Arabian desert law has been forced upon us. The Englishman comes with his law; he forces it upon us, so far as he can. We are conquered. He says, "Tomorrow I will marry your sister." What can we do? Our law says, those that are born of the same family, though a hundred degrees distant, must not marry, that is illegitimate, it would deteriorate or make the race sterile. That must not be, and there it stops. So, I have no volce in my marriage, nor my sister. It is the caste that determines all that.

We are married sometimes when children. Why? Because the caste says; if they have to be married anyway without their consent, it is better that they are married very early, before they have developed this love; if they are allowed to grow up apart, the boy may like some other girl, and the girl some other boy, and then something evil will hannen; and so, save the caste, stop it there. I don't eare whether my sister is deformed, or cood-looking, or bad-looking; she is my sister, and that is enough; he is my brother, and that is all I need to know. So, they will love each other. You may say, "Oh, they lose a great deal of enjoyment—those exquisite emotions of a man falling in love with a woman and a woman falling in love with a man. This is a sort of tame thing, loving each other like brothers and sisters, as though they have to." So be it; but the Hindu says, "We are socialistic. For the sake of one man's or woman's exquisite pleasure we don't want to load misery on hundred of others."

There they are—married. The wife comes home with her hurband; that is called the second marriage. Marriage at an early age is considered the first marriage and they grow up separately with women and with their parents. When they are grown, there is a second secremony performed, called a second marriage. And then they live together, but under the same roof with his mother and father. When the becomes a mother, she takes her place in turn as queen of the family group.

Now comes another, peculiar Indian institution [1]

have just told you that in the first two or three castes the widows are not allowed to marry. They cannot, even if they would. Of course, it is a hardship on many. There is no denying that not all the widows like it very much, because non-marrying entail upon them the life of a student. That is to say, a student must not eat meat or fish, nor drink wine, nor desse screept in white clothes. and ao

and so on; there are many regulations. We are a nation of monks—always making penance, and we like it. Now. you ace. a woman never diriks wine or eats meat. It was a hardship on us when we were students, but not on the girls. Our women would feel degraded at the idea of eating meat. Men eat meat sometimes in some castes; women never. Still, not being allowed to marry must be a hardship to many; I am sure of that.

But we must go back to the idea; they are intensely socialistic. In the higher castes of every country you will find the statistics show that the number of women is always much larger than the number of men. Why? Because in the higher castes, for generation after generation, the women lead an easy life. They "neither toil nor spin, yet Solomon in all his glory was not arrayed like one of them". And the poor boys, they die like flies. The girl has a cat's nine lives, they say in India. You will read in the statistics that they outnumber the boys in a very short time, except now when they are taking to work quite as hard as the boys. The number of sirls in the higher castes is much larger than in the lower. Conditions are quite opposite in the lower castes. There they all work hard; women a little harder, sometimes, because they have to do the domestic work. But, mind you, I never would have thought of that, but one of your American travellers, Mark Twain, writes this about India: "In spite of all that Western critics have said of Hindu customs. I never saw a woman harnessed to a plough with a cow or to a cart with a dog, as is done in some European countries. I saw no woman or girl at work in the fields in India. On both sides and ahead (of the railway train) brown-bodied naked men and boys are ploughing in the fields. But not a woman, In these two hours I have not seen a woman or a girl working in the fields. In India, even the lowest caste never does any hard work. They generally have an easy lot compared to the same class in other nations; and as to ploughing, they never do it."

Now, there you are. Among the lower classes the number of men is larger than the number of women; and what would you naturally expect? A woman gets more chances of marriage, the number of men being larger.

Relative to such questions as to widows not marrying : among the first two castes, the number of women is discrepantionately large, and here is a dilemma. Either you have a non-marriageable widow moblem and misery. or the non-husband-setting young lady problem. To face the widow problem, or the old maid problem? There you are : either of the two. Now, go back again to the idea that the Indian mind is socialistie. It says, "Now look here! we take the widow problem as the lesser one." Why? "Because they have had their chance : they have been married. If they have lost their chance. at any rate they have had one. Sit down, be quiet, and consider these poor girls-they have not had one chance of marriage." Lord bless you! I remember once in Oxford Street, it was after ten o'clock, and all those ladies coming there, hundreds and thousands of them shopping; and some man, an American, looks around and he says, "My Lord! how many of them will ever get husbands. I wonder!" So the Indian mind said to the widows, "Well, you have had your chance, and now we are very, very sorry that such mishaps have come to you, but we cannot help it ; others are waiting."

Then, religion comes into the question; the Hindu religion comes in as a comfort. For, mind you, our religion teaches that marriage is something bad, it is only for the weak. The very spiritual man or woman would not marry at all. So the religious woman says, "Well, the Lord has given me a better chance. What is the use of marrying? Thank God, worship God, what is the

use of my loving man?" Of course, all of them cannot put their mind on God. Some find it simply impossible. They have to suffer; but the other poor people, they should not suffer for them. Now I leave this to your

judgment : but that is their idea in India. Next, we come to woman as daughter. The great difficulty in the Indian household is the daughter. The daughter and caste combined rain the poor Hindu, because, you see, she must marry in the same caste. and even inside the caste exactly in the same order; and so the poor man sometimes has to make himself a beggar to get his daughter married. The father of the boy demands a very high price for his son, and this poor man sometimes has to sell everything just to get a husband for his daughter. The great difficulty of the Hindu's life is the daughter. And, curiously enough the word daughter in Sanskrit is "duhita". The real derivation is that, in ancient times, the daughter of the family was accustomed to milk the cows, and so the word "duhita" comes from "duh", to milk; and the word "daughter" really means a milkmaid. Later on, they found a new meaning to that word, "duhita", the milkmaid-she who milks away all the milk of the family. That is the second meaning.

These are the different relations held by our Indian women. As I have told you, the mother is the greater in position, the wife is next, and the daughter comes after them. It is a most intricate and complicated series of gradation. No foreigner can understand it, even if he lives there for years. For instance, we have three forms of the personal pronoun; they are a sort of verbin in our language. One is very respectful, one is midding and the lowest is just like thou and three. To children and servants the last is addressed. The middling one is used with equals. You see, these are to be applied in all the intricate relations of life. For example, to my

elder sister I always throughout my life use the pronoun aponi, but she never does in speaking to me; she says tumi to me She should not, even by mistake, say apani to me, because that would mean a curse Love, the love toward those that are superior, should always be expressed in that form of language. That is the custom. Similarly, I would never dare address my elder sister or elder brother, much less my mother or father, as tu or tum or tums. As to calling our mother and father by name, why, we would never do that. Before I knew the customs of this country. I received such a shock when the son, in a very refined family, got up and called the mother by name! However, I got used to that That is the custom of the country. But with us, we never pronounce the name of our parents when they are present It is always in the third person plural, even before them.

Thus we see the most complicated mesh-work in the social life of our men and our women and in our degrees of relationship. We don't speak to our waves before our elders: it is only when we are alone or when inferiors are present. If I were married, I would speak to my write before my younger sister, my nephews or nisces: but not before my elder sister or paents I cannot talk to my sisters about their husbands at all. The idea is, we are a monastic race. The whole social organisation has that one idea before it. Marriage is thought of a something impure, something lower. Therefore, the subject of low would never be talked of. I cannot read a novel before my sister, or my brothers, or my mother, or even before others. I close the book.

Then again, eating and drinking is all in the same cetegory. We do not eat before superiors Our women never eat before men, except they be the children or infeniors. The wife would die rather than, as she says. "munch" before her husband. Sometimes, for instance, bothers and sisters may eat together; and if I and my

sister are eating, and the husband comes to the door.

my sister stops, and the poor husband flies out.

68

These are the customs peculiar to the country. A few of these I note in different countries also. As I never married myself, I am not perfect in all my knowledge about the wife. Mother, sisters—I know what they are; and other people's wives I aw; from that I gather what I have told you.

As to education and culture, it all depends upon the man. That is to say, where the men are highly cultured, there the women are; where the men are not, women are not. Now, from the oldest times, you know, the primary education, seconding to the old Hindu customs, belongs to the village system. All the land from time immemorial was nationalised, as you say—belonged to the Government. There never is any private right in land. The revenue in India comes from the land, because every man holds so much land from the Government. This land is held in common by a community, it may be of five, ten, twenty or a hundred families. They govern the whole of the land, pay a certain amount of revenue to the Government, maintain a physician. a village schoolmaster, and so one.

Those of you who have read Hethert Spencer of education that was tried in Europe and which in some parts proved a success; that is, there is one schoolmaster, whom the village keeps. These primary schools are very rudimentary, because our methods are so simple. Each boy brings a little mat; and his paper, to begin with, is palm leaves. Palm leaves first, paper is too costly. Each provided in the part of the par

A little book on ethics, taught by an old man, we learned by heart, and I remember one of the lessons:

"For the good of a village, a man ought to give up his family:

For the good of a country, he ought to give up

his village: For the good of humanity, he may give up his

country :

For the good of the world, everything "

Such verses are there in the books. We get them by heart, and they are explained by teacher and purpl! These things, we learn, both boys and girls together. Later on, the education differs. The old Sankrit universities are mainly composed of boys. The girls very rarely go up to those universities, but there are a few exceptions.

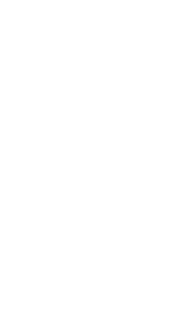

In these modern days there is a creater impetus towards higher education on the European lines, and the trend of opinion is strong towards women getting this higher education. Of course, there are some people in India who don't want it, but those who do want it carried the day. It is a strange fact that Oxford and Cambridge are closed to women today, so are Harvard and Yale : but Calcutta University opened its doors to women more than twenty years ago. I remember that the year I graduated several girls came out and graduated -the same standard, the same course, the same in everything as the boys; and they did very well indeed. And our religion does not prevent a woman being educated at all. In this way the girl should be educated; even thus she should be trained; and in the old books we find that the universities were equally resorted to by both girls and boys, but later the education of the whole nation was neglected. What can you expect under foreign rule? The foreign conqueror is not there to do good to us; he wants his money. I studied hard for twelve

years and became a graduate of Calcutta University; now I can scarcely make \$500 a month in my country Would you believe it? It is actually a fact. So these educational institutions of foreigners are simply to get a lot of useful, practical slaves for a little money—to turn out a host of clerks, postmasters, telegraph operators, and so on. There it is

As a result, education for both boys and gills is neglected. entirely neglected. There are a great many things that should be done in that Iand, but you must always remember, if you will kindly excuse me and permit me to use one of your own proverby. What is asuce for the goose is asuce for the gander? Your foreign born ladics are always crying over the hardships of the Hindu moman, and never care for the hardships of the Hindu moman, They are all weeping salt tears. But who are the little girls married to? Some one, when told that they are all married to old men, asked. "And what do the young men do? What! are all the girls married to old men, only to old men?" We are born old—perhaps all the men there.

The ideal of the Indian sace is freedom of the soul. This world is nothing. It is a vision, a dream. This life is one of many millions fike it. The whole of this nature is Maya, is phantasm, a pest house of phantasms. That is the philosophy. Babies smile at life and think it so heautiful and good, but in a few years they will have to revert to where they began. They began life crying, and they will leave it crying. Nations in the vigour of their youth think that they can do anything and everything: "We are the good of the earth. We are the chosen people." They think that God Almighty has given them a charter to rule over all the world, to advance. His plans, to do anything they like, to turn the world upside down. They have a chaster to rob, nurder, kill: God has given them this, and they do that because they

and all that? Does that give life? Those that have fine institutions, they die. And what of institutions, those tinplate Western institutions, made in five days and broken on the sixth? One of these little handful nations cannot keep alive for two centuries together. And our institu-

tions have stood the test of ages. Says the Hindu, "Yes, we have buried all the old nations of the earth and stand here to bury all the new races also, because our ideal is not this world. but the other, Just as your ideal

is, so shall you be. If your ideal is mortal, if your ideal is of this earth, so shalt thou be. If your ideal is matter.

expansion. And so soon as that was touched. Rome fell to pieces, passed out. The mission of Greece was intellect, as soon as that was touched, why, Greece passed out. So in modern times, Spain and all these modern countries. Each nation has a mission for the world. So long as that mission is not hurt, that nation lives, despite every difficulty. But as soon as its mission is destroyed, the nation collapses

Now, that vitality of India has not been touched yet They have not given up that, and it is still strong—in spite of all their superstations. Hideous superstitions are there, most revolting some of them. Never mind The national life-current is still there—the mission of the race.

The Indian nation never will be a powerful conquering people-never. They will never be a great political power; that is not their business, that is not the note India has to play in the great harmony of nations. But what has she to play? God, and God alone She elings unto that like grim death. Still there is hope there.

So then, after your analysis, you come to the conclusion that all these things, all this poverty and misery, are of no consequence—the man is living still, and therefore there is hope

Well I You see religious activities going on all through the country. I don't recall a year that has not given bitth to several new sects in India. The stronger the current, the more the whirlpools and eddies. Sects are not signs of decay, they are a sign of life. Let sects multiply, till the time comes when every one of us is a sect, each individual. We need not quartel about that.

Now, take your country. (I don't mean any criticism). Here the social laws, the political formation, everything, is made to facilitate mass is journey in this life. He may live very happily so long as he is on this earth. Look at your streets—how dean! Your beautiful cities! And in how many ways a man can make

Standing on this principle, we look in and we see—what? India is no longer a political power; it is an enslaved race. Indians have no say, no voice in their own government; they are three hundred millions of slaves—nothing more! The average income of a man in India is two shillings a month. The common state of the vast mass of the people is starvation, so that, with the least decrease in income, millions die. A Ettle famine means death. So there, too, when I look on that side of India, I see ruin—hooeless ruin.

But we find that the Indian race never stood for wealth. Although they acquired immense wealth, perhaps more than any other nation ever acquired, yet the nation did not stand for wealth. It was a powerful race for ages, yet we find that that nation never stood for power, never went out of the coumty to conquer. Quite contra within their own boundaries, they never fought anybody. The Indian nation never stood for imperial glory. Wealth and power, then, were not the ideals of the race.

What then? Whether they were wrong or right this not the question we discuss—that nation, smong all the children of men, has believed, and believed intensely, that this life is not real. The real is God i and they must cling unto that God, through thick and thin. In the midst of their degradation, religion came first. The Hindu man drinks religiously, sleeps religiously, walks religiously, marries religiously, robs religiously.

Did you ever see such a country If you want to get up a gang of robbers, the leader will have to preach some sort of religion, then formulate some bogus metaphysics, and say that this method is the clearest and quickest way to get God. Then he finds a following. Otherwise, not. That shows that the vitality of the race the mission of the race is religion; and because that has not been touched, therefore that race lives.

See Rome. Rome's mission was imperial power,

all the rest of the people will be happy as well, that is good; but if the millions have to be ground down, that is unjust. Better that the one great man should suffer for the salvation of the world.

In every nation you will have to work through their methods. To every man you will have to speak in his own language. Now, in England or in America, if you want to preach religion to them, you will have to work through political methods-make organisations, societies, with voting, ballotting, a president, and so on, because that is the language, the method of the Western race. On the other hand, if you want to speak of politics in India, you must speak through the language of religion. You will have to tell them something like this: "The man who eleans his house every morning will acquire such and such an amount of merit, he will so to heaven. or he comes to God " Unless you put it that way, they won't listen to you. It is a question of language. The thing done is the same. But with every race, you will have to speak their language, in order to reach their hearts. And that is quite just. We need not fret about that.

In the Order to which I belong we are called Sannyasins. The word means "a man who has renounced". This is a very, very, very sentent Order. Even Buddhs, who was 560 years before Christ, belonged to that Order. He was one of the reformers of his Order That was all. So ancient! You find it mentioned away back in the Vedes, the oldest book in the world. In old India there was the regulation that every man and woman, rowards the end of their Eves, must get out of social life alongether and think of nothing except God and their own salvation. This was to get ready for the great event—deth. So old people used to become Sannyasins in those early days Later on, young people began to give up the world. And young people

money! How many channels to get enjoyment in this life! But, if a man here should say, "Now look hert. I shall sit down under this tree and mediate: I don't want to work", why, he would have to go to jail. See? There would be no chance for him at all. None. A man can live in this society only if he falls in line. He has to join in this rush for the enjoyment of good in this life, or he dies.

Now let us go back to India. There, if a man say.

"I shall go and sit on the top of that mountain and look

at the tip of my nose all the rest of my days", everybody

ays. "Go, and God-speed to you!" He need not speak

a word. Somebody brings him a little cloth, and he is all

right But if a man say. "Behold, I am going to enjoy

a little of this life", every door is closed to him.

I say that the ideas of both countries are unjust. I see no reason why a man here should not sit down and look at the up of his nose if he likes. Why should every body here do just what the majority does? I see no reason.

Nor why, in India, a man should not have the gods of this life and make money. But you see how those wast millions are forced to accept the opposite point of view by tyranny. This is the tyranny of the signal This is the tyranny of the spiritual, tyranny of the tyranny of the printing tyranny of the wise. And the tyranny of the wise, mind you, is much more powerful than the tyranny of the ignorant. The wise, the intriferrual, when they take to forcing their opinions upon other than the tyranny of the ignorant. The misc how and barriers which it is not in the power of the ignorant to lereak.

Now, I say that this thing has got to stop. There is no the in sacrificing millions and millions of people to produce one spiritual giant. If it is possible to make society where the spiritual giant will be produced and intellectual scholarship, scarcely studied books; but when he was a boy he was seized with the tremendous idea of getting truth direct. First he tried by studying his own religion. Then he got the idea that he must get the truth of other religious, and with that idea he joined all the sects, one after anothes. For the time being he did exactly what they told him to do-lived with the devotees of these different sects in turn, until interpenetrated with the particular ideal of that sect. After a few years he would go to another sect. When he had gone through with all that, he came to the conclusion that they were all good. He had no enticism to offer to any one , they are all so many paths leading to the same goal. And then he said. "That is a glorious thing, that there should be so many paths, because if there were only one path, perhaps it would suit only an individual man. The more the number of paths, the more the chance for every one of its to know the truth. If I cannot be taught in one language, I will try another, and so on " Thus his benediction was for every selicion.

Now, all the ideas that I preach are only an attempt to echo his ideas. Nothing is mine originally except the wicked once, everything I say which is false and wicked. But every word that I have ever uttered which is true and good, is simply an attempt to echo his voice. Read his life by Prof. Max Mulfer.

Well, there at his feet I conceived these ideas—there with a some other young ment. I was just a boy I went there when I was about sisteen. Some of the other boys were still younger, some a little older—about a dozen or more. And together we conceived that this ideal had to be apread. And not only spread, but made practical. That is to say, we must show the spirituality of the Hindus, the mercifulness of the Buddhits, the activity of

the Order are not priests. There is an absolute difference between the priests and the Sannyasins. In India priesthood. like every other business in a social life, is a hereditary profession. A priest's son will become priest, just as a carpenter's son will be a carpenter, or a blacksmith's son a blacksmith. The priest must always be married. The Hindu does not think a man is complete unless he has a wife. An unmarried man has no next

In India it is really like an adoption. The teacher is more than my own father, and I am truly his child, his son in every respect. I owe him obedience and reverence first, before my own father even; because, they say, the father gave me this body, but he showed me the way to salvation, he is greater than father. I adopt my disciples Sometimes the teacher will be a young man and the disciple a very old man. But never mind, he is the son. my son, my daughter, and so on.

and he calls me "Father", and I have to address him as Now, I happened to get an old man to teach me. and he was very peculiar. He did not go much for

hope of the family, the only one who could do anything to help them. I had to stand between my two worlds. On the one hand. I would have to see my mother and brothers starve unto death; on the other, I had believed that this man's ideas were for the good of India and the world, and had to be preached and worked out-And so the fight went on in my mind for days and months. Sometimes I would pray for five or six days and nights together, without stopping. Oh, the agony of those days! I was living in hell! The natural affections of my boy's heart drawing me to my family-I could not bear to see those who were the nearest and dearest to me suffering. On the other hand, nobody to sympathise with me. Who would sympathise with the imaginations of a boy? Imaginations that caused so much suffering to others! Who would sympathise with me? None-except one.

That one's sympathy brought blessing and hope. She was a woman. Our teacher, this great monk, was married when he was a boy and she a mere child. When he became a young man, and all this religious zeal was upon him, she came to see him. Although they had been married for long, they had not seen very much of each other until they were grown up. Then he said to his wife, 'Rehold, I am your husband; you have a right to this body. But I cannor live the sex life, although I have married you. I leave it to your judgment.' And she wept and said, 'God apeed you! The Lord bless you! Am I the woman to degrade you? If I can, I will help you. Go on in your work.'

That was the woman. The husband went on and became a monk, in his own way; and from a distance the wife went on helping so much as she could. And later, when the man had become a great spiritual giant she came—really, she was the first disciple—and she spent the rest of her life taking care of the body of this

our practical lives. "We shall start a universal religion now and here," we said, "we will not wait." Our teacher was an old man who would never touch

a coin with his hands. He took just the little food offered, just so many yards of cotton cloth, no more. He could never be induced to take any other gift. With all these marvellous ideas, he was strict, because that made lim free. The monk in India is the friend of the prince today, dines with him; and tomorrow he is with the beggar, sleeps under a tree. He must come into could with everyone, must always move about. As the saying is, "The rolling stone gathers no moss". The last fourteen years of my life, I have never been for three months at a time in any one place—continually rolling.

So do we all.

Now, this handful of boys got hold of these ideas
and all the practical results that sprang out of these ideas.

Universal religion, great sympathy for the poor, and all
that, are very good in theory, but one must practise.

Then came the sad day when our old teacher died. We nursed him the best we could. We had no friends. Who would listen to a few boys, with their crank notions? Nobody. At least, in India, boys are nobodies. but think of it—a dozen boys, telling people vast, big idest, saying they are determined to work these ideas out in life. Why, everybody laughed. From laughter, it kame serious 1 it became persecution. Why, the parents of the boys came to feel like spanking every one of us. And the more we were desided, the more determined we became.

Then came a terrible time—for me personally and for all the other boys as well. But to me came such misfortune! On the one side was my mother, my brother. My father died at that time, and we were left poor, Ohvery poor, almost starving all the time. I was the obly

hopeful-the tremendous laithfulness to each other, the tremendous love between us, I have got a hundred men and women around me, if I become the devil himself tomorrow, they will say, 'Here we are still! We'll never give you up!" That is a great blessing in happiness, in misers, in famine, in pain, in the grave, in heaven or in hell who never gives me un is my friend Is such friendship a joke? A man may have aslvation through such (nendship. That brings salvation if we can fore like that If we have that faithfulness why there is the emence of all concentration. You need not worship any gods in the world if you have that faith. that strength, that love. And that was there with us all throughout that hard time. That was there. That made us so from the Himsleyes to Cane Comonn. from the Indus to the Brahmanutra

This band of boys began to travel about Gradually we began to draw attention; ninery per cent was anaponism, very luttle of it was helpful. For we had one fault: we were boys—in poverty and with all the roughness of boys. He who has to make his own way in life is a bit rough, he has not much time to be smooth and stave and polite—"my lady and my centleman", and all that. You have seen that in life, always, If le is a tough diamond, he has not much polish, he is a jewel in an indifferent cashet.

And there we were "No compromise!" was the watchword. "This is the ideal and this has got 10 be carried out. If we meet the king, though we due, we must give him a bit of our minds, if the peasant, the same." Naturally, we met with antaconiam.

But, mind you, this is life's experience, if you really want the good of others, the whole suiverse may stand against you and cannot hurt you. It must crumble before your power of the Lord Himself in you if you are sincers and really unselfish. And those boys were that,

man He never knew whether he was living or dying, or anything. Sometimes, when talking, he would get to excited that if he sat on live charcoals he did not know it Live charcoals! Forgetting all about his body, all the time

Well, that lady. his wife, was the only one who sympathised with the idea of those boys. But she was powerless. She was poorer than we were. Never mind! We plunged into the breach. I believed, as I was living, that these ideas were going to rationalise India and bring better days to many lands and foreign races. With that behef, came the realisation that it is better that a few persons suffer than that such ideas should die out of the world What if a mother or two brothers die? It is a sacrifice. Let it be done. No great thing can be done without sacrifice. The heart must be plucked out and the bleeding heart placed upon the altar. Then great things are done. Is there any other way? None have found it | appeal to each one of you. to those who have accomplished any great thing Oh, how much it has cost! What arony! What tomme! What terrible suffering is behind every deed of success. in every life. You know that, all of you.

And thus we went on, that hand of boys. The only

Wind thus we went on, that hand of boys. The conthing we get from those around us was a kick and a current-tlat was all. Of course, we had to beg from dow to doer for our food; got hips and have—the refuse of everything—a piece of bread here and there. We got hold of a broken-down old house, with hissing colors bring inderneals; and because that was the cheaped, we went into that house and hereth there.

This we went on for some years, in the meanwhile making examicans all over India, trying to bring about the idea gradually. Ten years were spent without a 1st of life! Ten more years! A thomsand times despond each cause; but there was one thing a ways to keep us you send me, I am going. I have not much to lose, and I don't care if I lose that." It was very difficult to find the money, but after a long atruggle they got together just enough to pay for my passage—and I came. Came one of two months earlier, so that I found myself diffing about in the atreets here, without knowing anybody.

But finally the Parlament of Religions opened and I met kind friends, who helped me right along I worked a little, collected funds, stanced two papers, and so on. After that I went over to England and worked there. At the same time I carried on the work for India in America.

My plan for India, as it has been developed and centralised, is this: I have told you of our lives as monks there, how we go from door to door, so that religion is brought to everybody without charge, except, perhaps, a broken piece of bread. That is why you see the lowest of the low in India holding the most exalted religious ideas. It is all through the work of these monks. But ask a man. "Who are the English?"-he does not know. He says perhaps. "They are the children of those giants they speak of in those books, are they not?" "Who governs you?" "We don't know." "What is the government?" They don't know But they know philosophy. it is a practical want of intellectual education about life on this earth they suffer from. These millions and millions of people are ready for life beyond this worldis not that enough for them? Certainly not. They must have a better piece of bread and a better piece of rag on their bodies. The great question is, How to get that better bread and better rag for these sunken millions.

First. I must tell you, there is great hope for them, because, you see, they are the gentlest people on earth. Not that they are timid. When they want to fight, they fight like demons. The best soldiers the English have are recruited from the peasantry of India. Death is a

They came as children, pure and fresh from the badd of nature. Said our Master: I want to offer at the altar of the Lord only those flowers that have not even been smelled, fruits that have not been touched with the fingers. The words of the great man sustained mall. For he saw through the future life of those boy that he collected from the streets of Calcutta, so to say. People used to laugh at him when he said. "You will see—this boy, that boy, what he becomes". His faith was unalterable: "Mother showed it to me. I may be weak, but when She says this is so—She can never make mistakes—if must be so."

So things went on and on for ten years without any light, but with my health breaking all the time. It tells on the body in the long run : sometimes one meal at nine in the evening, another time a meal at eight in the morning, another after two days, another after three days -and always the poorest and roughest thing. Who is going to give to the beggar the good things be has? And then, they have not much in India. And most of the time walking, climbing snow peaks, sometimes ten miles of hard mountain climbing, just to get a meal. They eat unleavened bread in India, and sometimes they have it stored away for twenty or thirty days, until it is harder than bricks; and then they will give a square of that. I would have to go from house to house to collect sufficient for one meal. And then the bresd was so hard, it made my mouth bleed to eat it. Literally, you can break your teeth on that bread. Then I would put it in a pot and pour over it water from the river-For months and months I existed that way-of course it was telling on the bealth,

Then I thought, I have tried India; it is time for me to by another country. At that time your Parliament of Religions was to be beld, and someone was to be sent from India. I was just a vagabond, but I asid. "If

Now there is no reason why they should suffer such distress—these people; oh, so pure and good! We hear so much talk about the sunken sufficient, and the degraded women of India—but none come to our help. What do they say? They say, "You can only be helped, you can only be good by ceasing to be what you are. It is useless to help Hindus". These people do not know the history of taces. There will be no more India if they change their religion and their institutions, because that is the vitality of that race. It will disappear; so, really, you will have nobody to help.

Then there is the other meat point to learn; that you are growing in your own life, I am growing in my own. It is possible that I can give you a push in your life, howing that, in the long run, all roads lead to Rome. It is a steady growth. No national civilisation is perfect yet. Give that civilisation a push, and it will arrive at its own goal; don't strive to change it. Take away a nation's instinutions, customs, and manners, and what will be left? They hold the nation together.

But here comes the very learned foreign man, and he says, "Look here: you give up all those intitutions and customs of thousands of years, and take my tornfool tin pot and be happy". This is all nonsense

We will have to help each other, but we have to go one step faither: the first thing is to become unselfish in help. "If you do just what I tell you to do, I will help you. Otherwise not." Is that help?

And so, if the Hindus want to help you spiritually, there will be no question of limitations: perfect unselfishness. I give, and there it ends. It is gone from me. My mind, my powers, my everything that I have to give, is given; given with the idea to give, and no more. I have seen many times people who have robbed half the world, and they rave \$20,000 "to convert the heather."

thing of no importance to them. Their attitude is, "Twenty times I have died before, and I shall die many times after this. What of that?" They never turn back. They are not given to much emotion, but they make very good fighters.

Their instinct, however, is to plough. If you rob them, murder them, tax them, do anything to them, they will be quiet and gentle, so long as you leave them free to practise their religion. They never interfere with the religion of others. "Leave us liberty to worship our gods, and take everything else !" That is their attitude. When the English touch them there, trouble starts. That was the real cause of the 1857 Mutiny-they would not bear religious repression. The great Mohammedan governments were simply blown up because they touched the Indians' religion.

But aside from that, they are very peaceful, very quiet, very gentle, and, above all, not given to vice. The absence of any strong drink, oh, it makes them infinitely superior to the mobs of any other country. You cannot compare the decency of life among the poor in ladia with life in the slums here. A slum means poverty, but poverty does not mean sin, indecency, and vice in India. In other countries, the opportunities are such that only the indecent and the lazy need be poor. There is no reason for poverty unless one is a fool or a blackguardthe sort who want city life and all its luxuries. They won't go into the country. They say, "We are here with all the fun, and you must give us bread". But that is not the case in India, where the poor fellows work hard from morning to sunset, and somebody else takes the bread out of their hands, and their children go bungry. Notwithstanding the millions of tons of wheat raised in India, scarcely a grain passes the mouth of a peasant He lives upon the poorest corn, which you would not feed to your canary birds.

meet him at the plough, at the factory, just wherever he is? Go along with him, like his shadow. But there are these hundreds and thousands of monks, educating the people on the spiritual plane; why not let these men do the same work on the intellectual plane? Why should they not talk to the masses a little about history—about many things? The ears are the best educators. The best principles in our lives were those which we heard from our mothers through our ears. Books came much later, Book-leaming is nothing. Through the ears we get the best formative principles. Then, as they get more and more interested, they may come to your books too. First, let it roll on and on—that is my idea.

Well. I must tell you that I am not a very great believer in monastic systems. They have great merits, and also great defects. There should be a perfect balance between the monastics and the householders. monasticism has absorbed all the power in India. represent the greatest power. The monk is greater than the prince. There is no reigning sovereign in India who dates to sit down when the "yellow cloth" is there. He gives up his seat and stands. Now, that is bad, so much power, even in the hands of good men-although these monastics have been the bulwark of the people. They stand between the priestcraft and knowledge. They are the centres of knowledge and reform. They are just what the prophets were among the lews. The prophets were always preaching against the priests, trying to throw out superstitions. So are they in India. But all the same so much power is not good there; better methods should be worked out. But you can only work in the line of least resistance. The whole national soul there is upon monasticism. You go to India and preach any religion as a householder: the Hindu people will turn back and go out. If you have given up the world, however, they say, "He is good, he has given up the world. He is

monks in the method of education. For instance, I send one of my men, and he goes about with a camera is has to be taught in those things himself. In India, you will find every man is quite illiterate and that teaching requires tremendous centres. And what does all that mean? Money. From the idealistic plane you come to everyday work. Well? I have worked hard, four year in your country, and two in England. And I am vey shankful that some friends came to the rescue. Ose who is here today with you, is amongst them. ## BUDDHA'S MESSAGE TO THE WORLD

(Delivered in San Francisco, on March 18, 1900)

Buddhism is historically the most important religion historically, not philosophically—because it was the most tremendous religious movement that the world ever saw, the most gigantic spiritual wave ever to burst upon human society. There is no civilisation on which its effect has not been felt in some way or other.

The followers of Buddha were most enthusiastic and very missionary in spirit. They were the first among the adherents of various religions not to remain content with the limited sphere of their Mother Church. They spread far and wide. They travelled east and west, north and south. They reached into darkest Tibet; they went into Persia. Asia Minor: they went into Russia. Poland, and many other countries of the Western world. They went into China, Korea, Japan; they went into Burma, Siam, the East Indies, and beyond. When Alexander the Great, through his military conquests, brought the Mediterranean world in contact with India. the wisdom of India at once found a channel through which to spread over vast portions of Asia and Europe. Buddhist priests went out teaching among the different nations; and as they taught, superstition and priestcraft began to vanish like mist before the sun.

To understand this movement properly you should know what conditions prevailed in India at the time Buddha came, just as to understand Christianity you have to grasp the state of Jewish society at the time of Christ. It is necessary that you have an idea of Indian society six hundred years before the birth of Christ, by which time Indian civilisation had already completed its growth.

When you study the civilisation of India, you find

You have become thoroughly befuddled. The less you understand, the better you feel! The prophets have been giving warnings against the priests and their superstitions and machinations: but the vast mass of people have not yet lessned to heed these warnings—education is yet to come to them.

Men must have education. They speak of democracy, of the equality of all men, these days. But how will a man know he is equal with all? He must have a strong brain, a clear mind free of nonsensical ideas; he must pierce through the mass of superstitions encrusting his mind to the pure truth that is in his inmost Self. Then he will know that all perfections, all powers, are already within himself, that these have not to be given him by others. When he realises this, he becomes free that moment, he achieves equality. He also realises that every one else is equally as perfect as he, and he does not have to exercise any power, physical, mental or moral, over his brother meo. He abandons the idea that there was ever any man who was lower than himself. Then he can talk of equality : not until then. Now, as I was telling you, among the Jews there

was a continuous struggle between the priests and the prophets; and the priests sought to monopolise power and knowledge, till they themselves began to lose them and the chains they had put on the feet of the people were on their own feet. The masters always become slaves before long. The culminastion of the struggle was the victory of Jesus of Nazareth. This triumph is the history of Christianity. Christ at last succeeded in overthrowing the mass of witchersft. This great prophet killed the dragon of priestly selfashness, rescued from its eluthers the jewel of truth, and gave it to all the world, so that whosoever desired to possess it would have absolute freedom to do so, and would not have to wait on the pleasure of any priest or priests.

The Jews were never a very philosophical race: they had not the subtlety of the Indian brain nor did they have the Indian's psychic power. The priests in India, the Brahmins, possessed great intellectual and psychic powers. It was they who began the spiritual development of India, and they accomplished wonderful things. But the time came when the free spirit of development that had at first actuated the Brahmins disappeared. They began to arrogate powers and privileges to themselves. If a Brahmin killed a man he would not be punished. The Brahmin, by his very birth, is the lord of the universe! Even the most wicked Brahmin must be worthoused!

But while the priests were flourishing, there existed also the poet-prophets called Sannyasins All Hindus, whatever their castes may be, must, for the sake of attaining spirituality, give up their work and prepare for death. No more is the world to be of any interest to them. They must go out and become Sannyasins. The Sannyasins have nothing to do with the two thousand ceremonies that the priests have invented: Pronounce certain words—ten syllables, twenty syllables, and so on—all these things are nonsense.

So these poet-prophets of ancient India repudiated the ways of the priest and declared the pure truth. They tried to break the power of the priests, and they succeeded a little. But in two generations their disciples went back to the superstitious—roundabout ways of the prests—became pnests themselves: "You can get truth only through us!" Truth became crystallized again, and again prophets came to break the encurstations and free the truth, and so it went on. Yes, there must be all the time the man, the prophet, or else humanity will die.

You wonder why there have to be all these roundabout methods of the priests. Why can you not come directly to the truth? Are you ashamed of God's truth that you have to hide it behind all kinds of intricate ceremonies and formulas? Are you ashamed of God that you cannot confess His truth before the world? Do you call that being religious and apiritual? The priests are the only people fit for the truth! The masses are not fit for it! It must be dishered! Water it down a little!

Take the Sermon on the Mount and the Gita—they are simplicity itself. Even the streetwalker can understand them. How grand! In them you find the truth clearly and simply revealed. But no, the priests would not accept that truth can be found so directly. They speak of two thousand heatwaren and two thousand helds. If people follow their prescriptions, they will go to heaven! If they do not obey the rules, they will go to heaven!

But the people shall learn the truth. Some are afraid that if the full truth is given to all, it will but them. They should not be given the unqualified truth—so they say. But the world is not much better off by compromising truth. What worse can it be than it is already? Bring truth out! If it is real, it will do good. When people protest and propose other methods, they only make apologies for witchersfit.

India was full of it in Boddha's day. There were the masses of people, and they were debarred from all knowledge. If just a word of the Vediss entered the ear of a man, terrible punishment was visited upon him. The priests had made a secret of the Vedas—the Vedas that contained the spiritual trutha discovered by the ancient Hindust.

At last one man could bear it no more. He had the brain, the power, and the heart-a heart as infinite as the broad aky. He felt how the masses were being led by the priests and how the priests were glorying in their power, and he wanted to do something about it. He did not want any power over any one, and he wanted

to break the mental and spiritual bonds of men. His heart was large. The heart, many around us may have, and we also want to help ethers. But we do not have the brain; we do not know the ways and means by which help can be given. But this man had the brain to discover the means of breaking the bondages of souls. He learned why men suffer, and he found the way out of suffering. He was a man of accomplishment, he worked everything out; he taught one and all without distinction and made them realize the peace of enlightenment. This was the man Buddha.

You know from Arnold's noem. The Light of Asia, how Buddha was born a prince and how the misery of the world struck him deeply; how, although brought up and living in the lap of luxury. he could not find comfort in his parsonal happiness and security; how he renounced the world, leaving his princers and new-horn son behind; how he wandered saarching for truth from teacher to tescher; and how he at last attained to enlightenment. You know about his long mission, his diacetics, his organisations. You all know these things:

Buddha was the triumph in the struggle that had been going on between the priests and the prophets in India. One thing can be said for these Indian priests—they were not and never are intolerant of religion; they never have persecuted religion. Any man was allowed to preach against them. Theirs is such a religion; they never molested any one for his religious views. But they suffered from the peculiar weaknesses of all priests: they also sought power, they also promulgated rules and regulations and made religion unnecessarily complicated, and thereby undermined the strength of those who followed their religion.

Buddha cut through all these excrescences. He preached the most tremendous truths. He taught the very gist of the philosophy of the Vedas to one and all without distinction, he taught it to the world at largebecause one of his great messages was the equality of man. Men are all equal. No concession there to anybody! Buddha was the great preacher of equality. Every man and woman has the same right to attain spirituality—that was his teaching. The difference hetween the priests and the other castes he abolished. Even the lowest were entitled to the highest attainments; he opened the door of Nirvāna to one and all. His teaching was bold even for India. No amount of preaching can ever spock the Indian soul, but it was hard for India to awallow Buddha's doctrine. How much harder it must be for you!

His doctrine was this. Why is there misery in our life? Because we are selfish. We desire things for our selves—that is why there is misery. What is the way out? The giving up of the self. The self does not exist it explains the personneal world, all this that we perceive, is all that exists. There is nothing called soul underlying the cycle of Life and death. There is the stream of thought, one thought following another in succession, each thought coming into existence and becoming non-existent at the same moment, that is all, there is no third tent at the same moment, that is all, there is no third of the thought, no soul. The body is changing all the rime, so is mind, consciousness. The self therefore is a delasion. All selfishness comes of holding on to the self, to the illustry self. If we know the truth that there is no welf, then we will be karpy and make of tere larger.

The was what Budd's taught. And he did no merely take he was ready to give up his own life for the world. He said, It sacrificing an animal is good sacrificing a man is better." and he offered himself as sacrifice. He said. "This animal sacrifice is anothe softenession Cod and sunfaire the two big supersitions. God is only a supersition invented by the priess he time is Cod, as these bealtime presch, why is them so much misery in the world? He is just like me, a slave to the law of causation. If he is not bound by the law of causation, then why does he create? Such a God is not at all satisfactory. There is the ruler in heaven that rules the universe according to his sweet will and leaves us all here to die in misery—the never has the goodness to look at us for a moment. Our whole life is continuous suffering: but this is not sufficient punishment—after death we must go to places where we have other punishments. Yet we continually perform all kinds of rites and ceremonies to please this creator of the world!"

Buddha asid: "These ceremonials are all wrong. There is but one ideal in the world. Destroy all delusions; what is true will remain. As soon as the clouds are gone, the sun will shine." How to kill the self? Become perfectly unselfah, ready to give up your life even for an ant. Work not for any superstition, not to please any God. not to get any reward, but because you are seeking your own release by killing your self. Worship and prayer and all that, these are all nonsense. You all say, "If thank God"—but where Goes He live? You do not know, and yet you are all going crazy about God.

Hindus can give up everything except their God. To deny God is to cut off the very ground from under the feet of devotion. Devotion and God the Hindus must cling to. They can never relinquish these. And here, in the teaching of Buddba, are no God and no soul-simply work. What for? Not for the self, for the self is a delusion. We shall be ourselves when this delusion has vanished. Very few are there in the world that can rise to that height and work for work's sake.

Yet the religion of Buddha spread fast. It was because of the marvellous love which, for the first time in the history of humanity, overflowed a large heart and devoted itself to the service not only of all men but of all living things—a love which did not care for anything except to find a way of release from suffering for all beings.

Man was loving God and had forgotten all about his brother man. The man who in the name of God can give up his very life, can also turn around and kill his brother man in the name of God. That was the state of the world. They would sacrifice the son for the glory of God, would rob nations for the glory of God, would kill thousands of beings for the glory of God, would derench the earth with blood for the glory of God. This was the first time they turned to the other God—man. It is man that is to be loved. It was the first wave of intense love for all men—the first wave of true unadulterated wisdom—that, starting from India, gradually inundated eountry after country, north, south, east, west.

This teacher wanted to make truth shine as truth. No softening, no compromise, no pandering to the priests, the powerful, the kings. No bowing before supersitious traditions, however hoary; no respect for forms and books just because they came down from the distant past. He rejected all scriptures, all forms of religious practices. Even the very language, Sanskrit, in which religion had been traditionally taught in India, he rejected, so that his followers would not have any chance to imble the supersitions which were associated with it.

There is another way of looking at the truth we have been discussing: the Hindu way. We claim that Buddha's great doctrine of selflesness can be better understood if it is looked at in our way. In the Upanishads there are already the great doctrine of the Atman and the Brahman. The Atman, Self, is the same as Brahman, the Lord. This Self is all that is; It is the only reality. Mäyå, delusion, makes us see It as different. There is one Self, not many. That one Self shines in

various forms. Man is man's brother because all men are one. A man is not only my brother, say the Vedas, he is myself. Hurting any part of the universe, I only lurr myself. I am the universe. It is a delusion that I think I am Mr. So-and-so-that is the delusion.

The more you approach your real Self, the more this delusion vanishes The more all differences and divisions disappear, the more you realise all as the one Divinity, God exists; but He is not the man sitting upon a cloud, He is pure Spirit Where does He reside? Nearer to you than your very self. He is the Soul. How can you perceive God as separate and different from yourself? When you think of Him as some one separate from yourself, you do not know Him. He is you yourself. That was the doctrine of the prophets of India.

It is selfahness that you think that you see Mr So and-so and that all the world is different from you. You believe you are different from me. You do not take any thought of me. You go home and have your dinner and sleep. If I die you still eat, drink, and are merry. But you cannot really be happy when the rest of the world is suffering. We are all one. It is the delusion of separateness that is the root of misery. Nothing exists but the Self is there is nothing else

Buddha's idea is that there is no God, only man himself. He repudiated the mentality which underlies the prevalent ideas of God. He found it made men weak and supersitious. If you pray to God to give you everything, who is it, then, that goes out and works? God comes to these who work hard. God helps them that help themselves. An opposite idea of God weakens our nerves. softens our muscles, makes us dependent. Everything independent is happy; everything dependent is miserable. Man has infinite power within himself, and he can realise himself as the one

infinite Self. It can be done; but you do not believe it. You pray to God and keep your powder dry all the time.

Buddha taught the opposite. Do not let men weep. Let them have none of this praying and all that. God is not keeping shop. With every breath you are praying in God. I am talking; that is a prayer. You are intenting; that is a prayer. Is there ever any movement of yours, mental or physical, in which you do not participate in the infinite Divine Energy? It is all a constant prayer. If you call only a set of words prayer, you make prayer superficial. Such prayers are not much good; they can exactely bear any real fruit.

Is prayer a magic formula, by repeating which, even if you do not work hard, you gain miraculous results? No. All have to work hard; all have to reach the depths of that infinite Energy. Behind the poor, behind the rich, there is the same infinite Energy. It is not that one man works hard, and another by repeating a few words achieves results. This universe is a constant prayer. If you take prayer in this sense, I am with you Words are not necessary. Better is silent prayer.

The vast majority of people do not understand the majority of the doctrine. In India any compromise regarding the Self means that we have given power into the hands of the priests and have forgotten the great teachings of the prophets. Buddha knew this; so he brushed aside all the priestly doctrines and practices and made man stand on his own feet. It was necessary for him to go against the accustomed ways of the people; the lad to bring about revolutionary changes. As a result this sacrificial religion passed away from India for ever, and was neces travised.

and was never revived.

Bud-limm apparently has passed away from Inda; but really it has not. There was an element of danger in the teaching of Baddha-it was a reforming religion In order to bring about the tremendous spir trul change.

he did, he had to give many negative teachings. But if a religion emphasies the negative side too much, it is in danger of eventual destruction. Never can a reforming sect auvive if it is only reforming: the formative elements alone—the real impulse, that is, the principles—live on and on. After a reform has been brought about, it is the positive side that should be emphasised: after the building is finished the acafolding must be taken away.

It so happened in India that as time went on, the lollwers of Buddha emphasised the negative aspect of bis steachings too much and thereby caused the eventual downfall of their religion. The positive aspects of truth were sufficiently of forces of negation; and thus India repudiated the destructive tendencies that flourished in the name of Buddhirm. That was the decree of the Indian national thought.

The negative elements of Buddhism—there is no God and no soul—died out. I can say that God as the only being that exists; it is a very positive attacement. He is the one reality. When Buddha says thete is no soul, I say, 'Man, thou art one with the universe; thou art all things,'' How positive! The reformative element died out; but the formative element has lived through all time. Buddha taught kindness towards lower beings; and since then there has not been a sect in India that has not taught charity to all beings, even to animals. This kindness, this mercy, this charity—greater than any doctrine—ser what Buddhism left to us.

The life of Buddha has an expecial appeal. All my life I have been very found of Buddha, but not of his doctnine. I have more veneration for that character than for any other—that boldness, that fearlessness, and that tremendous love! I he was born for the good of men, Others may seek God, others may seek truth for themselves; he did not even care to know truth for himself. He sought truth because people were in masery

How to help them, that was his only concern. Throughout his life he never had a thought for himself. How can we ignorant, selfish, narrow-minded human beings ever understand the sreatness of this man?

And consider his marvellous brain! No emotionalism. That giant brain never was superstitious. Believe not because an old manuscript has been produced, because it has been handed down to you from your forefathers. because your friends want you to-but think for yourself; search truth for yourself; realise it yourself. Then if you find it beneficial to one and many, give it to people. Soft-brained men, weak-minded, chickenhearted, cannot find the truth. One has to be free, and as broad as the sky. One has to have a mind that is crystal clear; only then can truth shine in it. We are so full of superstitions! Even in your country where you think you are highly educated, how full of narrownesses and superstitions you are! Just think, with all your claims to civilisation in this country, on one occasion I was refused a chair to sit on, because I was a Hindu.

Six hundred years before the birth of Clarist, at the time when Buddha lived, the people of India must have had wonderful education. Extremely free-minded they must have been. Great masses followed him. Kings gave up their thrones; queens gave up their thrones; propels were able to appreciate and embrace his teachings or revolutionary, so different from what they had been taught by the priests through the sges. But their minds have been unusually free and broad.

And consider his death. If he was great in life, he was also great in death. He are food offered to him by a member of a race similar to your American Indians. Hindus do not touch them because they eat everything indiscriminately. He told his disciples, "Do not eat this food, but I cannot refuse it. Go to the man and tell him he has done me one of the greatest aervices of my

of realisation. Of all the teachers of the world, he was the one who taught us most to be self-teliant, who freed us not only from the bondages of our false selves but from dependence on the saviable being or beings called a God or gods. He invited every one to enter into that state of freedom which he called Nirvana. All must

attain to it one day; and that attainment is the complete fulfilment of men.

## DISCIPLESHIP

(Delivered in San Francisco, on March 29, 1900)

My subject is "Discipleship". I do not know how you will take what I have to say. It will be rather difficult for you to accept it—the ideals of teachers and disciples in this country vary so much from those in ours. An old proverb of India comes to my mind: "There are hundreds of thousands of teachers, but it is hard to find one disciple." It seems to be true. The one important thing in the attainment of spirituality is the attitude of the pupil. When the right attitude is there, illumination comes easily.

What does the disciple need in order to receive the truth? The great sages say that to attain truth takes but the twinkfing of an eye—it is just a question of knowing. The dream breaks—how long does it take? In a second the dream is gone. When the illusion vanishes, how long does it take? Just the twinkling of an eye. When I know the truth, nothing happens except that the faise-hood vanishes away: I took the rope for the anake, and now I see it is the rope. It is only a question of balf a second and the whole thing is done. Thou art. That. Thou art the Reality. How long does it take to know this? If we are God and always have been so, not to know this is most autonishing. To know this is the only natural thing. It should not take ages to find out what we have always been and what we now are.

Yet it seems difficult to realise this self-evident truth. Ages and ages pass before we begin to catch a fain glimpse of it. God is Het, Kod is Het, We write about this; we feel in our immost heart that this is so, that every thing else than God is nothing—here today, gone to morrow. And yet most of us remain the same all though

ife. We cling to untruth and we turn our back upon ruth. We do not want to attain truth. We do not want anyone to break our dream. You see, the teachers are not wanted. Who wants to learn? But if anyone wants to relieve the truth and overcome illusion, if he wants to receive the truth from a teacher, he must be a true disciple.

It is not easy to be a disciple: great preparations are necessary; many conditions have to be fulfilled. Four principal conditions are laid down by the Vedantists

The first condition is that the atudent who wants to know the truth must give up all desires for gain in this world or in the life to come.

The truth is not what we see. What we see is not

truth as long as any desire erceps into the mind. God is true, and the world is not true. So long as there is in the heart the least desire for the world, truth will not come. Let the world fall to run around my ears. I do not care. So with the next life. I do not care to go to leaven. What is heaven? Only the continuation of this earth. We would be better and the little foolish dreams we are dreaming would break sconer if there were no beaven, no continuation of this sully life on earth. By going to heaven we only prolong the miserable fillusions.

What do you gain in heaven? You become gods.

to become spiritual in heaven; there is too much comfort and enjoyment there—the dwellers in heaven are disinclined to give up their fun.

They say there will be no more weeping in heaven. I do not trust the man who never weeps: he has a big block of granite where the heart should be. It is evident that the heavenly people have not much sympathy. There are vast masses of them over there, and we are miserable creatures suffering in this horrible place. They could pull us all out of it; but they do not. They do not weep. There is no sorrow or misery there; therefore they do not care for anyone's misery. They drink their neetar, dances go on; beautiful wives and all that.

Going beyond these things, the disciple should say. "I do not care for anything in this life nor for all the heavens that have ever existed—I do not care to so to any of them. I do not want the sense-life in any form—this identification of myself with the body. As I feel now, I am this body—thus huge mass of fieth. This is what I feel I am. I refuse to believe that."

The world and the heavens, all these are bound upwith the senses. You do not care for the earth if you do not have any senses. Heaven also is the world Earth, heaven, and all that is between have but one name searth.

Therefore the disciple, knowing the past and the present and thinking of the future, knowing what preperity recase, what happiness means, gives up all these and seeks to know the truth and truth alone. This is the first condition.

The second condition is that the disciple must be able to control the internal and the external senses and must be established in several other agricult virtues

The external senses are the visible organs aimsted in different parts of the body; the internal senses are imangible. We have the external eyes, cars, nose, and so on ; and we have the corresponding internal senses. We are continually at the beck and call of both these groups of senses. Corresponding to the senses are sense-objects. If any sense-objects are near by, the senses compel us to perceive them ; we have no choice or independence. There is the big nose. A little fragrance is there : I have to smell it. If there were a bad odour. I would say to myself, "Do not smell it" ; but nature says, "Smell", and I smell st. Just think what we have become! We have bound ourselves. I have eyes. Anything going on, good or bad, I must see. It is the same with hearing If anyone speaks unpleasantly to me. I must hear it. My sense of bearing compels me to do so, and how miserable I feel! Curse or praisemen has got to hear. I have seen many deaf people who do not usually hear, but snything about themselves they alwaye heart

All these senses, external and internal, must be under the disciple's control. By hard practice he has to arrive at the stage where he can assert his mind against the senses, sgainst the commands of nature. He should be able to say to his mind, "You are mine : I order you, do not see or hear anything", and the mind will not see or hear anything-no form or sound will react on the mind. In that state the mind has become free of the domination of the senses, has become separated from them. No longer is it strached to the senses and the body. The external things cannot order the mind now t the mind refuses to attach itself to them. Besutiful fragrance is there. The disciple says to the mind, "Do not smell", and the mind does not perceive the fragrance. When you have arrived at that point, you are just beginning to be a disciple. That is why when everybody says. I know the truth". I say, "If you know the truth you must have self-control ; and if you have control of yourself show it by controlling these organe"

Next, the mind must be made to quiet down. It is rushing about. Just as I sit down to meditate, all the vilest subjects in the world come up. The whole things in auseating. Why should the mind think thoughts I do not want it to think? I am as it were a slave to the mind. No apiritual knowledge is possible so long as the mind is resites and out of control. The disciple has to learn to control the mind. Yes, it is the function of the mind to think. But it must not think if the disciple does not want it to; it must stop thinking when he commands it to. To qualify as a disciple, this state of the mind is very necessary.

Also, the disciple must have great power of endurance. Life seems comfortable; and you find the mind behaves well when everything is going well with you. But if something goes wrong, your mind loses its balance. That is not good. Bear all evil and misery without one murmur of hurt, without one thought of unhappiness, resistance, remedy, or retaliation. That is true endurance; and that you must accourse.

Good and evil there always are in the world. Many forest there is any evil—at least they try to forget—and when evil comes upon them they are foverwhelmed by it and feel bitter. There are others who deny that there is any evil at all and consider everything good. That also is a weakness: that also proceeds from a fear of evil. It something is evil-smelling, why sprinkle it with rose water and call it fragrant? Yes, there are good and evil in the world—God has put evil in the world. But you do not have to whitewash Him. Why there is evil is none of your business. Please have faith and keep quiet.

When my Master, Shri Ramakriahna, fell ill. a Brahmin suggested to him that he apply his tremendous mental power to cure himself; he said that if my Master would only concentrate his mind on the diseased part of the body, it would heal. Shri Ramskrighna answered, "What! Bong down the roind that I've given to God to that the body!" He refused to think of body and disease. Hat mind was core musily conversions of God, it was deducated to Him unterly. He would not use it for any other purpose.

minds? I can see the ideal, but how much of that ideal? None of this consciousness of the body, of the little self of its pleasures and pains, its hurts and comforts, none of these can reach that atmosphere. By thinking only of the spirit and keeping the mind out of matter all the time. I can catch a glimpse of that ideal. Material thought and forms of the sense-world have no place in that ideal. Take them off and put the mind upon the spirit. Forget your life and death, your pains and pleasures, your rame and fame, and realise that you are neither body nor mind but the pure spirit.

When I say "I". I mean this spirit Close your eyes and see what picture appears when you think of your "I" is it the picture of your body that comes, or of your mental nature? If so, you have not realised your true "I" yet. The time will come, however, when as aoon as you say "I" you will see the universe, the infinite being. Then you will have realised your true Self and found that you are infinite. That is the truth: you are the spirit, you are not matter There is such a thing as Illusion—an it one thing as taken for another; matter is taken for spirit, this body for soul. That is the tremendous illusion—it has to go

In taken for spirit, this poory for soul, line semitremendous illusion. It has to go.

The nest qualification is that the disciple must have faith in the Guru (teacher). In the West the teacher aimply gives intellectual knowledge, that is all. The relationship with the teacher is the greatest in life. My dearest and nearest relative in life is my Guru; text, my mother, then my father. My first reverence is to the Guru. If my father says, "Do this", and my Guru says. "Do not do this". I do not do it. The Guru frees my soul. The father and mother give me this body; but the Guru gives me relatifi in the soul

We have certain peculiar beliefs. One of these is that there are some souls, a few exceptional ones, who are already free and who will be born here for the good of the world, to help the world. They are free already; they do not care for their own salvation—they want to help others. They do not require to be taught anything. From their childhood they know everything; they may speak the highest truth even when they are babies six months old.

Upon these free souls depends the spiritual growth of mankind. They are like the first lamps from which other lamps are lighted. True, the light is in everyone, but in most men it is hidden. The great souls are shining lights from the beginning. Those who come in contact with them have as it were their own lamps lighted. By this the first lamp does not lose anything ; vet it communicates its light to other lamps. A million lamps are lighted ; but the first lamp goes on shining with undiminished light. The first lamp is the Guru, and the lamp that is lighted from it is the disciple. The second in turn becomes the Guru, and so on. These great ones whom you call Incamations of God are mighty spiritual giants. They come and set in motion a tremendous spiritual current by transmitting their power to their immediate disciples and through them to generation after generation of disciples.

A bishop in the Christian Church, by the laying on of hands, claims to transmit the power which he is supposed to have received from the preceding bishops. The bishop says that Jesus Christ transmitted his power to his immediate disciples and they to others, and that that is how the Christ's power has conce to him. We hold that every one of us, not bishops only, ought to have such power. There is no reason why each of you cannot be a whicle of the mighty current of suirituals.

But first you must find a teacher, a true teacher, and you must remember that he is not just a man. You may set a teacher in the body; but the real teacher is not in the body; he is not the physical man—he is not as he

appears to your eyes. It may be the teacher will come to you as a human being, and you will receive the power from him. Sometimes he will come in a dream and transmit things to the world. The power of the teacher may come to us in many ways. But for us ordinary mortals the teacher must come, and our preparation must con till he comes.

We attend lectures and read books, argue and reason about God and soul, religion and salvation. These are not spirituality, because spirituality does not exist in books or in theories or in philosophies. It is not in learning or reasoning, but in actual inner crowth. Even parrots can learn things by heart and repeat them. If you become learned, what of it? Asses can carry whole libraries. So when real light will come, there will be no more of this learning from books-no book-learning. The man who cannot write even his own name can be perfectly religious, and the man with all the libraries of the world in his head may fail to be. Learning is not a condition of spiritual growth; sebolarship is not a condition. The touch of the Guru, the transmittal of spiritual energy, will quicken your heart. Then will begin the growth. That is the real baptism by fire. No more stopping. You go on and go on. Some years ago one of your Christian teachers, a

Some years ago one of your Christian teachers, a friend of mine, said, "You believe in Christ?" "Yes," I answered, "but perhaps with a little more reverence." "Then why don't you be baptised? "How could I be baptised? By whom? Where is the man who can give true baptism? What is baptism? Is it sprinkling some water over you, or dipping you in water, while muttering formulas?

Baptism is the direct introduction into the life of the spirit. If you receive the real baptism, you know you arent the body but the apirit. Give me that baptism if you can. If not, you are not Christians. Even after the

ao called baptism which you received, you have remained the same. What is the sense of merely saying you have been baptised in the name of the Christ? Mere talk, talk—ever disturbing the world with your foolishness! "Ever ateeped in the dashness of ignorance, yet considering themselves wise and learned, the fools or round and round, staggering to and fro like the blind led by the blind." Therefore do not say you are Christians, do not brag about baptim and things of that sort.

Of course there is true haptism—there was baptism in the beginning when the Christ came to the earth and taught. The illumined couls, the great ones that come to the earth from time to time. have the power to reveal the Supemal Vision to us. This is true baptism. You see, before the formulas and eeremonies of every religion, there exists the grem of universal truth. In course of time this truth hecomes forgotten; it becomes as it were strangled by forms and eeremonies. The forms remain—we find there the casket with the apirit all gone. You have the form of baptism, the suffice. If we want to gain the living knowledge of the living truth, we have to be truly initiated into it. That is the ideal.

The Guru must teach me and lead me into light, make me a link in that chain of which he himself is a link. The man in the street cannot claim to be a Guru. The Guru must be a man who has known, has actually realised the Divine ruth, has perceived himself as the spirit. A mere talker cannot be the Guru. A talkative fool like me can talk much, but cannot be the Guru. A ture Guru will tell the disciple, "Go and sin mo more", and no more can he sin—no more has the person the power to sin.

I have seen such men in this life. I have read the

<sup>&#</sup>x27;Katha Upanishad, 1855

Bible and all such books: they are wonderful. But the living power you cannot find in the books. The power that can transform life in a moment can be found only in the living illumined souls, those shining lights who appear among us from time to time. They alone are fit to be Gurus. You and I are only hollow talk-talk, not to be Gurus. We are disturbing the world more by talking, making bad vibrations. We hope and pray and struggle on, and the day will come when we shall arrive at the

truth, and we shall not have to speak.

The teacher was a boy of sisteen; he taught a man of eighty Silence was the method of the teacher, and the doubts of the disciple vanished for ever. That is the Guru. Just think, if you find such a man, what faith and love you ought to have for that person! Why, he is God Himself, nothing less than that! That is why Christ's disciples worshipped him as God. The disciple must worship the Guru as God Himself. All a man can know is the living God, God as embodied in man, until he himself has realized God. How else would be know God?

Here is a man in America, born nineteen hundred years after Christ, who does not even belong to the same ace as Christ, the Jewish race. He has not seen Jews on his Jamily, He says, "Jesus was God. If you do not believe it, you will go to hell". We can understand how the disciples believed it—that Christ was God; he was their Gurs, and they must have believed he was God. But what has this American got to do with the man born nineteen hundred years ago? This young man tells me that I do not believe in Jesus and therefore I shall have to go to bell. What Goes he know of Jesus? He is fit for a branch asplum. This kind of bellef won't do. He will have to find his Gers.

Jerus may be born again, may come to you Then.

<sup>\*</sup> Debricatown waters 12 federals

if you worship him as God, you are all right. We must all wait till the Guru comes, and the Guru must be worshipped as God. He is God, he is nothing less than that. As you look at him, the Guru gradually melts away and what is left? The Guru picture gives place to God Himself. The Guru is the bright mask which God weata in order to come to us. As we look steadily on, gradually the mask falls off and God is revealed.

"I bow to the Guru who is the embodiment of the Bliss Divine, the personification of the highest knowledge and the giver of the greatest benditude, who is pure, perfect, one without a second, eternal, beyond pleasure and pain, beyond all thought and all qualification, transcendental." Such is in reality the Guru. No wonder the disciple looks upon him as God Husself and trusts him, reverea him, obeys him, follows him unquestioningly. This is the relation between the Guru and the disciple

The next condition the disciple must fulfil is to con-

We are like moths plunging into the flaming fire. knowing that it will burn us, knowing that the senses only burn us, that they only enhance desire. "Desire is never satiated by enjoyment; enjoyment only increases desire as butter fed into fire increases the fire." Desire is increased by desire. Knowing all this, people still plunge into it all the time. Life after life they have been going after the objects of desire, suffering extremely in consequence, yet they cannot give up desire. Even religion, which should rescue them from this terrible bondage of desire, they have made a means of satisfying desire. Rarely do they ask God to free them from bondage to the body and senses, from slavery to desires. Instead, they pray to Him for health and prosperity, for long life; "O God, cure my headache, give me some money or something !"

is to know the highest truth. Our goal is the lefter We have said big words to ourselves—absolute realist tion and all that. Let us measure up to the words. Let us worship the spirit in spirit, standing on spirit. Let the foundation be spirit; the middle, spirit; the culmins tion, spirit. There will be no would anywhere. Let go and whirl into space—who cares? Stand thou in the spirit! That is the goal We know we cannot reach if yet. Never mind. Do not despait, and do not drag the ideal down. The important thing is: how much les you think of the body, of yourself as matter—as dead dull, insentient matter; how much more you think of

of yourself as shining immortal spirit, the more eager you will be to be absolutely free of matter, body, and senses This is the intense desire to be free.

The fourth and last condition of discipleship is the discrimination of the real from the unreal. There is only one thing that is real—God. All the time the mind multi-

yourself as shining immortal being. The more you think

one thing that is real—God. All the time the mind mint be drawn to Him, dedicated to Him. God exist, nothing else exists, everything else comes and goes. Any desire for the world is illusion, because the world is unreal. More and more the mind must become conscious of God alone, until everything else appears as it really is —unreal.

—unreal.

These are the four conditions which one who wants to be a disciple must fulfil; without fulfilling them he will not be able to come in contact with the true Guru. And even if he is fortunate enough to find him, he will not be quickened by the power that the Guru may transmit. There cannot be any compromising of these conditions. With the fulfilment of these conditions—with all these preparations—the letus of the disciple's heart will open and the bee shall come. Then the disciple knows that the Guru was within the body, within himself. He opens out. He realness. He crosses the occan of life, goes beyond. He crosses this terrible occan; and in mercy, without a thought of gain or prase, he in his turn helps others to cross.

## IS VEDANTA THE FUTURE RELIGION?

(Delivered in San Francisco on April 8, 1900)

Those of you who have been attending my lectures for the last month or so must, by this time, be familiar with the ideas contained in the Vedanta philosophy. Vedanta is the most ancient religion of the world; but it can never be said to have become popular. Therefore the question, "Is it going to be the religion of the future?" is very difficult to answer.

At the start, I may tell you that I do not know whether it will ever be the religion of the wast majority of men. Will it ever be able to take hold of one whole nation such as the United States of America? Possibly it may. However, that is the question we want to discuss this afternoon.

I shall begin by telling you what Vedanta is not, and then I shall tell you what it is. But you must remember that, with all its emphasis on impersonal principles, Vedanta is not antagonistic to anything, though it does not compromise or give up the truths which it considers findamental.

You all know that certain things are necessary to make a religion. First of all, there is the book. The power of the book is simply marvellous! Whatever it be, the book is the centre round which human allegiance gathers. Not one religion is living today but has a book. With all its rationalism and tall talk, humanity still clings to the books. In your country every attempt to start a religion without a book has failed. In India sects nie with great success, but within a few years they die down. because there is no book behind them. So in every exter country.

Study the rise and Jall of the Unitarian movement. It represents the best thought of your nation. Why should it not have spread like the Methodist. Baptist, and other Christian denominations? Because there was no book. On the other hand, think of the Jews A handful of men, driven from one country to another, still hold together, because they have a book. Think of the Parisi—only a hundred thousand in the world About a million are all that remain of the Jains in India. And do you know that these handfuls of Paris and Jains still keep on just because of their books? The religions that are living at the present day—every one of them has book.

The second requisite, to make a religion, is veneration for some person. He is worthipped either as the Lord of the world or as the great Teacher. Men must worship some embodied man! They must have the incarnation or the prophet or the great leader. You find it in every teligion today. Hindus and Christiana—they have incarnations: Buddhists, Mohammedans, and Jews have prophets. But it is all about the same—all their veneration twines round some person or persons.

The third requisite seems to be that a religion, to be strong and sure of itself, must believe that it alone is the truth; otherwise, it cannot influence people.

Liberalism dies because it is dry, because it cannot rouse fanaticium in the human mind, because it cannot bring out hatred for everything except itself. That is why liberalism is bound to go down again and again it can influence only small numbers of people. The cascan is not hard to see. Liberalism tries to make us unsetfish. But we do not want to be unselfish-we see no immediate gain in unselfishanes: we gain more by being selfish. We accept liberalism as long as we are poor, have nothing. The moment we acquire money and power, we turn very conservative. The poor man

is a democrat. When be becomes rich, he becomes an aristocrat. In religion, too, buman nature acts in the same way.

A prophet arises, promises all kinds of rewards to those who will follow him and eternal doom to those who will not. Thus he makes his ideas spread. All existent religions that are spreading are tremendously fanatic. The more a sect hates other sects, the greater is its success and the more people it draws into its fold. My conclusion, after travelling over a good part of the world and living with many races, and in view of the conditions prevailing in the world, is that the present state of things is going to continue, in spite of much talk of universal brotherhood.

Vedanta does not believe in any of these teachings.

First, it does not believe in a book—that is the difficulty to start with. It denies the authority of any book

over any other book. It denies emphatically that any one book can contain all the truths about God, soul, the ultimate reality. Those of you who have read the Upanishada remember that they say again and again. "Not by the reading of books can we realise the Self."

Second, it finds veneration for some particular person still more difficult to uphold. Those of you who are students of Vedanta-by Vedanta is always meant the Upanishads—know that this is the only religion that does not cling to any person. Not one man or woman has ever become the object of worship among the Vedantian It cannot be. A man is no more worthy of worship than any bird, any worm. We are all brothers. The difference is only in degree. I am exactly the same as the lowest worm. You see how very Eule room there is it.

Vedanta for any man to stand ahead of us and for us to go and worship him—he dramping us on and we being saved by him. Vedanta does not give you that. No book. No man to worship, Nothing. A still greater difficulty is about God. You want to be democratic in this country. It is the democratic God that Vedanta teaches.

You have a government, but the government is impersonal. Yours is not an autocratic government, and yet it is more powerful than any monarchy in the world. Nobody seems to understand that the real power, the real life, the real strength is in the unseen, the impersonal, the nobody. As a more person separated from others, you are nothing, but as an impersonal unit of the nation that rules itself, you are remembous. You are all one in the government—you are a tremendous power, all one in the government—you are a tremendous power. There is no king. I see everybody equally the same I have not to take off my hat and bow low to anyone. Yet there is a temendous power in each man.

Vedanta is just that. Its God is not the monarch sitting on a throne, entirely apart. There are those who like their God that way—a God to be feared and propitiated. They burn candles and crawl in the dust before Him. They want a king to rule them—they believe in a king in heaven to rule them all. The king is gone from this country at least. Where is the king of heaven now? Just where the carthly king is. In this country the king has entered every one of you. You are all kings in this country. So with the religion of Vedanta. You are all Gods. One God is not sufficient. You are all Gods. ave the Vedanta.

This makes Vedanta very difficult. It does not teach the old ides of God at all. In place of that God who sat above the clouds and managed the affairs of the world without asking our permission, who created us out of nothing just because He liked it and made us undergo all this misery just because He liked it. Vedants teaches the God that is in everyone, has become everyone and everything. His snajesty the king has gone from one and everything. His majesty the king has gone from

this country : the Kingdom of Heaven went from Vedanta hundreds of years ago.

126

India cannot give up his majesty the king of the earth—that is why Vedanta cannot become the religion of India. There is a chance of Vedanta becoming the religion of your country because of democracy. But it can become so only if you can and do clearly understand it, if you become real men and women, not people with vague ideas and superatitions in your brains, and if you want to be truly spiritual, since Vedanta is concerned only with arithuality.

What is the idea of God in heaven? Materialism. The Vedantic idea is the infinite principle of God embodied in every one of us. God sitting up on a cloud! Think of the utter blasphemy of it! It is meterialismdownright materialism. When babies think this way, it may be all right, but when grown-up men try to teach such things, it is downright disgusting-that is what it is. It is all matter, all body idea, the gross idea, the sense idea. Every bit of it is clay and nothing but clay. Is that religion? It is no more religion than is the Mumbo Fumbo "religion" of Africa. God is spirit and He should be worshipped in spirit and in truth. Does spirit live only in heaven? What is spirit? We are all spirit. Why is it we do not realise it? What makes you different from me? Body and nothing else. Forget the body, and all is spirit.

These are what Vedanta has not to give. No book. No man to be singled out from the rest of mankind—"You are worms, and we are the Lord God!"—none of that. If you are the Lord God, I also am the Lord God So Vedanta knows no sin. There are mistakes but no am, and in the long run everything it going to be all right. No Satan—none of this nonsense. Vedanta believes in only one sin, only one in the world, and it is thus, the moment you think you are a sincer or

amyhody is a sinner, that is sin. From that follows every other mistake or what is usually called sin. There have been many mistakes in our lives. But we are going on-Glory be unto us that we have made mistakes! Take a long look at your past life. If your present candition is good, it has been caused by all the past mistakes as well as successes. Glory be unto success! Glory be unto mistakes! Do not look back upon what has been done. Go shead!

You see, Vedanta proposes no sin nor sinner. No God to be afraid of. He is the one being of whom we shall never be afraid, because He is our own Self. There is only one being of whom you cannot possibly be afraid; He is that. Then isn't st really the most superstitious person who has fear of God? There may be someone who is afraid of his shadow; but even he is not afreid of himself. God is man's very Self. He is the one being whom you can never possibly fear. What is all this nonsense, the fear of the Lord entering into a man, making him tremble and so on? Lord bless us that we are not all in the lunabe asylum? But if most of us are not lunatics, why should we invent such ideas as fear of God? Lord Buddha said that the whole human race is lunatic, more or less. It is perfectly true. it acceme.

No book, no person, no Personal God. All these must go. Again, the senses must go. We cannot be bound to the senses At present we are tied down-like persons dying of cold in the glaciers. They feel such a strong desire to sleep, and when their friends try to wake them, warning them of death, they say, "Let me die, I want to sleep". We sell cling to the little things of the senses, even if we are ruined thereby; we forget there are much greater things.

There is a Hindu legend that the Lord was once incarnated on earth as a pig. He had a pig mate and in course of time several little pigs were born to Him. He was very happy with His family, Iving in the mire, squealing with joy, forgetting His divine glory and lordship. The gods became exceedingly concerned and came to the earth to beg Him to give up the piz body and return to heaven. But the Lord would have none of that; He drove them away. He said He was very happy and did not want to be disturbed. Seeing no other course, the gods destroyed the pig body of the Lord. At once He regained His divine majesty and was astonished that He could have found any joy in being a pig.

People behave in the same way. Whenever they hear of the Impersonal God, they asy, "What will become of my individuality?—my individuality will go!" Next time that thought comes, remember the pig, and then think what an infinite mine of happiness you have, each one of you. How pleased you are with your present condition! But when you realise what you truly ast, you will be astonished that you were unwilling to give up your sense-life. What is there in your personality? Is it any better than that pig life? And this you do not want to give up! Lord bless us all!

Is it any better than that pig lite? And this you do how want to give up! Lord bless us all!

What does Vedanta teach us? In the first place, it teaches that you need not even go out of yourself to know the truth. All the past and all the future are here in the present. No man ever saw the past. Did any one of you see the past? When you think you are knowing the past, you only imagine the past in the present moment. To see the future, you would have to bring it down to the present, which is the only reality—the rest is imagination. This present is all that is. There is only the One. All is here right now. One moment in infinite time is quite as complete and all inclusive as every other moment. All that is and was and will be is here in the present. Let anybody try to imagine anything outside of ti—the will not succeed.

What religion can paint a heaven which is not like this earth? And it is all art, only this art is being made known to us gradually. We, with five senses, look upon this world and find it gross, having colour, form, sound, and the like Suppose I develop an electric sense-all will change. Suppose my senses grow finer-you will all appear changed. If I change, you change. If I go beyond the power of the senses, you will appear as spirit and God. Things are not what they accm. We shall understand this by and by, and then see it; all the heavens-everything-are here, now, and they really are nothing but appearances on the Divine Pres-

ence. This Presence is much greater than all the earths and heavens. People think that this world is bad and imagine that heaven is somewhere else. This world is not bad. It is God Himself if you know it. It is a hard thing even to understand, harder than to believe The murderer who is going to be hanged tomorrow is all God. perfect God. It is very hard to understand, surely, but

Therefore Vedanta formulates, not universal brotherhood, but universal oneness. I am the same as any other man, as any animal-good, bad, anything. It is one body, one mind, one soul throughout. Spirit never dies There is no death anywhere, not even for the body. Not even the mind dies. How can even the body die? One leaf may fall-does the tree die? The universe is my body. See how it continues. All minds are mine

it can be understood.

With all feet I walk. Through all mouths I speak. In everybody I reside. Why can I not feel it? Because of that individuality, that piggishness. You have become bound up with this mind and can only be here, not there. What is immortality? How few reply, "It is this very existence of

ours!" Most people think this is all mortal and deadthat God is not here, that they will become immortal

by going to heaven. They imagine that they will see God after death. But if they do not see Him here and now, they will not see Him after death. Though they all believe in immortality, they do not know that immortality is not gained by dying and going to heaven, but by giving up this niggish individuality, by not tying ourselves down to one little body. Immortality is knowing ourselves as one with all, living in all bodies, perceiving through all minds. We are bound to feel in other bodies than this one. We are bound to feel in other bodies. What is sympathy? Is there any limit to this sympathy. this feeling in our bodies? It is quite possible that the time will come when I shall feel through the whole universe.

What is the gain? The pig body is hard to give up; we are sorry to lose the enjoyment of our one little pig body | Vedanta does not say, "Give it up": it says, "Transeend it". No need of asceticism-better would be the enjoyment of two bodies-better three. Living in more bodies than one! When I can enjoy through the whole universe, the whole universe is my body.

There are many who feel hornified when they hear these teachings. They do not like to be told that they are not just little pig bodies, created by a tyrant God. I tell them, "Come up!" They say they are bom in sin -they cannot come up except through someone's grace. I say, "You are Divine!" They answer, "You blasphemer. how dare you speak so? How can a miserable creature be God? We are sinners!" I get very much discouraged at times, you know. Hundreds of men and women tell me, "If there is no hell, how can there be any religion?" If these people go to hell of their own will, who can prevent them?

Whatever you dream and think of, you create. If it is hell, you die and see hell. If it is evil and Satan. you get a Satan. If ghosts, you get ghosts. Whatever

you think, that you become. If you have to think. think good thoughts, great thoughts. This taking for granted that you are weak little worms! By declaring we are weak we become weak; we do not become better. Suppose we put out the light, close the windows. and call the room dark. Think of the nonsense! What good does it do me to say I am a sinner? If I am in the dark, let me light a lamp. The whole thing is gone. Yet how curious is the nature of men! Though always conacious that the universal mind is behind their life, they think more of Satan, of darkness and lies. You tell them the truth-they do not see it; they like darkness

better. This forms the one great question asked by Vedanta: Why are people so afraid? The answer is that they have made themselves helpless and dependent on others. We are so lazy, we do not want to do anything for ourselves. We want a Personal God, a saviour or a prophet to do everything for us. The very rich man never walks, always goes in the carriage; but in the course of years, he wakes up one day paralysed all over. Then he begins to feel that the way he had lived was not good after all. No man can walk for me. Every time one did, it was to my injury. If everything is done for a man by another, he will lose the use of his own limbs. Anything we do ourselves, that is the only thing we do. Anything that is done for us by another never can be ours. You cannot learn spiritual truths from my lectures. If you have learned anything, I was only the spark that brought it out, made it flesh. That is all the prophets and teachers can do. All this running after help is foolishness.

You know, there are bullock carts in India. Usually two bulls are hamessed to a cart, and sometimes a sheaf of straw is dangled at the tip of the pole, a little in front of the animals but beyond their reach. The hulls try

continually to feed upon the straw, but never succeed.

132

This is exactly how we are helped? We think we are going to get security, strength, wisdom, happiness from the outside. We always hope but never realise our hope. Never does any help come from the outside.

There is no help for man. None ever was, none is, and none will be. Why should there be? Are you not men and women? Are the lords of the earth to be helped by others? Are you not ashamed? You will be helped when you are reduced to dust. But you are spirit. Pull yourself out of difficulties by yourself! Save yourself by yourself! There is none to help you-never was To think that there is, is sweet delusion, It comes to no good.

There came a Christian to me once and said, "You are a terrible sinner". I answered, "Yes, I am. Go on " He was a Christian missionary. That man would not give me any test. When I see him, I fly. He said, "I have very good things for you. You are a sinner and you are going to hell." I replied, "Very good, what else?" I asked him, "Where are you going?" "I am roing to heaven," he answered. I said. "I will go to hell." That day he gave me up.

Here comes a Christian man and he says, "You are all doomed; but if you believe in this doctrine, Christ will help you out." If this were true-but of course it is nothing but superstition—there would be no wickedness in the Christian countries. Let us believe in itbelieving costs nothing-but why is there no result? If lask. "Why is it that there are so many wicked people?" they asy, "We have to work more". Trust in God, but Leep your powder dry! Pray to God, and let God come and help you out? But it is I who struggle, pray, and worship, it is I who work our my problems-and God takes the credit. This is not good. I never do it Once I was invited to a dinner. The hostess asked

me to say grace. I said, "I will say grace to you, madam. My grace and thanks are to you." When I work, I say grace to myself. Praise be unto me that I worked hard and acousted what I have!

All the time you work hard and bless somebody else, because you are asperatitious, you are afraid. No more of these superations bred through thousands of years! It takes a little hard work to become spiritual. Superations are all materialism, because they are all based on the consciousness of body, body, hody No spirit there Spirit has no superstitions—it is beyond the vain desires of the body

But here and there these vain desires are being prolected even into the realm of the spirit. I have attended several spiritualistic meetings. In one, the leader was a woman She said to me. "Your mother and grandfather come to me". She said that they greeted her and talked to her. But my mother is living yet! People like to think that even after death their relatives continue to exist in the same bodies, and the spiritualists play on their superstitions. I would be very sorry to know that my dead father is still wearing his filthy body. People get consolation from this, that their fathers are all encased in matter. In another place they brought me lesus Christ, I said, "Lord, how do you do?" It makes me feel hopeless. If that great saintly man is still wearing the body, what is to become of us poor creatures? The spiritualists did not allow me to touch any of those gentlemen. Even if these were real, I would not want them. I think, "Mother, Mother! atheists-that is what people really are ! Just the desire for these five senses! Not satisfied with what they have here, they want more of the same when they die I"

What is the God of Vedanta? He is principle, not person. You and I are all Personal Gods. The absolute God of the universe, the creator, preserver and

IS UPDANTA THE FUTURE RELIGION) 135

all our human characteristics, functions, and limitations He must brong us found and give us clothes. As a matter of fact we have to do all these things ourselves and nobody else ever did them for us. That is the plain truth

But you rerely think of this You imagine there is Cod of whom you are special favourities, who slore things for you when you ask film, and you do not ask of film favours for all men, all beings, but only for yourself, your own family, your own people. When the Hindu is stars ing, you do not care, at that time you do not think that the God of the Christians is also the God of the Flindus Our whole idea of God, our praying, our worshipping all are vitiated by our ignorance, our foolish idea of our selves as body. You may not like what I am saying You may curse me today, but tomorrow you will bless

We must become thinkers. Every birth is painful We must get out of materialism. My Mother would not let us get out of Her clutches, nevertheless we must try This strucele is all the worship there is: all the rest is mere shadow. You are the Personal God Just now I am worshipping you. This is the greatest prayer. Worship the whole world in that sense-by serving it. This standing on a high platform, I know, does not appear like worship. But if it is service, it is worship.

The infinite truth is never to be acquired. It is here all the time, undying and unborn He, the Lord of the universe, is in every one. There is but one temple—the body. It is the only temple that ever existed In this body. He resides, the Lord of souls and the King of kings. We do not see that, so we make stone images of Him and build temples over them. Vedants has been in India always, but India is full of these temples-and not only temples, but also caves containing carved images. "The fool, dwelling on the bank of the Ganga, digs a well for water!" Such are we! Living In the midst of God-we

FW.

river to and make images. We project Him in the form of the image while all the true He squite in the temple of our body. We are himster and this is the great delivere.

Worship everyting as Codimentry form is the temple. All else in delimin. Always look within, never sufficient. Such is the Cod that Vedanta praches, and such is this worship. Naturally there is no sect, no creed, no ceste in Vedanta. How can this religion be the national return of folds.

Hundreds of castes! If one man touches another man's food, he cries out. Lead help me, I am polluted?" When I returned to India after my risit to the West, several orthodox! Undus saised a howl sgainst my association with the Western people and my breaking the rules of orthodoxy. They did not his me to teach the truths of the Vedas to the records of the West.

But how can there be these distinctions and differences? How can the neh man turn up his nose at the poor man, and the learned at the ignorant, if we are all spirit and all the same? Unless society changes, how can such a religion as Vedants prevail? It will take thousands of years to have large numbers of truly rational human beings. It is very hard to show men new things, to give them great ideas. It is harder still to knock off old superstitions, very hard; they do not deexily. With all his education, even the learned man becomes frightned in the dark—the nursery tales come into his mind, and he sees ghosts.

The meaning of the word "Veda", from which the word "Vedanta" comes, is knowledge. All knowledge is Veda, infinite as God is infinite. Nobody ever create knowledge, Did you ever see knowledge created? It is only discovered—what was covered is uncovered. It is always here, because it is God Himsell. Past, present, and future knowledge, all exist in all of us. We discover

it, that is all. All this knowledge is God Himself. The Verlas are a great Sanskrii book. In our country we go down on our knees before the man who teads the Vedas, and we do not care for the man who is studying physics. That is superstition; it is not Vedanta at all. It is utter materialism. With God every knowledge is acared. Knowledge is God. Infante knowledge abides within every one in the fullest measure. You are not really ignorant, though you may appear to be so. You are incamations of God, all of you. You are the incarnations of the almighty, omnipresent, Divine Principle. You may laugh at me now, but the time will come when you will understand. You must Nobody will be left behind.

What is the goal? This that I have spoken of-Vedants—is not a new religion. So old—as old as God Himself. It is not confined to any time and place, it is everywhete. Everybody knows this truth. We are all working it out. The goal of the whole universe as that. This applies even to external nature—every atom is rushing towards that goal. And do you think that any of the infinite pure souls are left without knowledge of the supreme truth? All have it, all are going to the same goal—the discovery of the innate Divinity. The maniac, the murderer, the superstitious man, the man who is lynched in this country—all are travelling to the same goal. Only that which we do ignorantly we ought to do knowingly, and better.

The unity of all existence—you all have it already within yourselves. None was ever born without it. However you may deny it, it continually asserts itself. What is human love? It is more or less an affirmation of that unity: "I am one with thee, my wife, my child, my friend!" Only you are affirming the unity ignorantly. "None ever loved the husband for the husband's sake, but for the sake of the Self that is in the husband." The

138

wife finds unity there. The husband sees himself in the wife—instinctively he does it, but he cannot do it knowingly, consciously.

The whole universe is one existence. There cannot be anything else. Out of diversities we are all going towards this universal existence. Families into tribes, tribes into races, races into nations, nations into humanity—how many wills going to the One! It is all knowledge, all science—the realisation of this unity.

Unity is knowledge, diversity is ignorance. This knowledge is your birthright. I have not to teach it to you. There never were different religious in the world. We are all destined to have salvation, whether we will it or not. You have to attain it in the long run and become free because it is your nature to be free. We are already free, only we do not know it, and we do not know what we have been doing. Throughout all religious systems and ideals is the same morality; one thing only is preached: "Be unselfish, love others." One says, "Because Jehovah commanded." "Allah," shouted Mohammed. Another cries, "Jesus". If it was only the command of Jehovah, how could it come to those who never knew Jehovah? If it was Jesus alone who gave this command, how could any one who never knew Jesus get it? If only Vishnu, how could the Jews get it, who never were acquainted with that gentleman? There is another source, greater than all of them Where is it? In the eternal temple of God, in the souls of all beings from the lowest to the highest. It is there-that infinite unselfishness, infinite sacrifice, infinite compulsion to go back to unity.

We have seemingly been divided, limited, because of urignorance; and we have become as it were the little Mrs So-and-so and Mr. So-and-so. But all nature is giving this delusion the Be every moment. I am not that little man or first woman cut off from all else: I am the one universal existence. The soul in its own

majesty is rising up every moment and declaring its own intrinsic Divinity

This Vedanta is everywhere, only you must become conscious of it. These masses of foolish beliefs and superstitions hinder us in our progress. If we can, let us throw them off and understand that God is spirit to be worshipped in spirit and in truth. Try to be materialists no more! Throw away all matter! The conception of God must be truly spiritual. All the different ideas of God, which are more or less materialistic, must go. As man becomes more and more spintual he has to throw off all these ideas and leave them behind. As a matter of fact, in every country there have always been a few who have been strong enough to throw away all matter and stand out in the shining light, worshipping the spirit by the spirit.

If Vedanta-this conscious knowledge that all is one spirit-spreads, the whole of burnanity will become spiritual. But is it possible? I do not know. Not within thousands of years. The old superstitions must run out You are all interested in how to perpetuate all your superstitions. Then there are the ideas of the family brother, the caste brother, the national brother. All these are barriers to the reshection of Vedants. Religion has been religion to very few.

Most of those who have worked in the field of religion all over the world have really been political workers That has been the history of burnan beings. They have rarely tried to live up uncompromisingly to the truth. They have always worshipped the god called society: they have been mostly concerned with upholding what the masses believe-their superstitions, their weakness. They do not try to conquer nature but to fit into nature, nothing else. Go to India and preach a new creed-they will not listen to it. But if you tell them it is from the Vedas-"That is good!" they will say. Here I can preach this VIII--IO

SWAMI VIVEKANANDA'S WORKS 140 doctrine, and you-how many of you take me seriously? But the truth is all here, and I must tell you the truth.

that the highest, the pure, truth cannot be realised all at

once by all, that men have to be led to it gradually through worship, prayer, and other kinds of prevalent right method or not. In India I work both ways.

There is another side to the question. Everyone says

religious practices I am not sure whether that is the In Calcutta, I have all these images and templesin the name of God and the Vedas, of the Bible and Christ and Buddha. Let it be tried But on the heights of the H.malayas I have a place where I am determined nothing shall enter except pure truth. There I want to work out this idea about which I have spoken to you today There are an Englishman and an Englishwoman in

charge of the place. The purpose is to train seekers of truth and to bring up children without fear and with out superstition. They shall not hear about Christs and Buddhas and Shavas and Vishnus-none of these. They shall learn, from the start, to stand upon their own feet

They shall learn from their childhood that God is the spirit and should be worshipped in apint and in truth Everyone must be looked upon as spirit. That is the ideal. I do not know what success will come of it To day I am preaching the thing I like I wish I had been brought up enturely on that, without all the dustrick superst.tique Sometimes I agree that there is some good in the dustatic method is helps many who are weak. If a man wants you to show him the polar stat, you first point our to him a bright star near it, then a less bright was, then a dan was, and then the polar was. This

process makes at easy for hors to see at. All the various practices and transfer. Billes and Gods are but the sufficients of selfana, the kindergustens of selfant

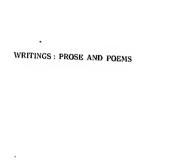

but then I think of the other ade How hore will the

world have to wait to reach the truth if it follows this alow, gradual process? How long? And where is the aurely that it will ever succeed to any appreciable degree? It has not so far. After all, gradual or not gradual, easy or not easy to the weak, is not the dualistic method based on falsehood? Are not all the prevalent religious practices often weakening and therefore wrong? They are based on a wrong idea, a wrong idea, a wrong idea, a wrong idea, a wrong idea for man. Would two wrongs make one right? Would the lie become ruth? Would darkness become light?

I am the servant of a man who has passed away I am only the messenger. I want to make the experiment. The teachings of Vedanta I have told you about were never really experimented with before. Although Vedanta is the oldest philosophy in the world, it has always become mixed up with supertitions and everything else

Christ said, "I and my father are one", and you repeat it. Yet it has not helped mankind. For nineteen hundred years men have not understood that saving. They make Christ the savious of men. He is God and we are worms! Similarly in India. In every country, this sort of belief is the backbone of every sect. For thousands of years millions and millions all over the world have been taught to worship the Lord of the world, the Incarnations. the savioura, the prophets. They have been taught to consider themselves belpless, miserable creatures and to depend upon the mercy of some person or persons for salvation. There are no doubt many marvellous things in such beliefs. But even at their best, they are but kindergartens of religion, and they have helped but little. Men are still hypnotised into abject degradation. However, there are some strong souls who get over that illusion. The hour comes when great men shall arise and cast off these kindergartens of religion and shall make vivid and powerful the true religion, the worship of the spirit by the spirit.

### STRUGGLE FOR EXPANSION<sup>1</sup>

The old dilemma, whether the tree precedes the seed or the seed the tree, runs through all our forms of knowledge. Whether intelligence is first in the order of being or matter; whether the ideal is first or the external manifestation; whether freedom is our true nature or bondage of law; whether steedom is our true nature or matter thought; whether the incessant change in nature precedes the idea of rest or the dand or text precedes the idea of rest or the dand or text precedes the idea of change—all these are questions of the same insoluble nature. Like the rise and fall of a series of waves, they follow one another in an invariable succession and men take this side or that according to their tastes or education or peculiarity of temperamenta

For instance, if it be said on the one hand that, seeing the adjustment in nature of different parts, it is clear that it is the effect of intelligent work ; on the other hand it may be argued that intelligence itself being created by matter and force in the course of evolution could not have been before this world. If it be said that the production of every form must be preceded by an ideal in the mind, it can be argued, with equal force, that the ideal was itself created by various external experiences. On the one hand, the appeal is to our ever-present idea of freedom; on the other, to the fact that nothing in the universe being causeless, everything, both mental and physical, is nigidly bound by the law of causation If it be affirmed that, seeing the thanges of the body induced by volition, it is evident that thought is the creator of this body, it is equally clear that as change in the body induces a change in the thought, the body must have

<sup>3</sup> Written by the Swams during his first visit to America in answer to questions put by a Western disciple,

146

produced the mind. If it be argued that the universe change must be the outcome of a preceding rest, equal logical argument can be adduced to show that the ide of unchangeability is only an illusory relative notion brought about by the comparative differences in motion Thus in the ultimate analysis all knowledge resolve

itself into this vicious eircle: the indeterminate inter dependence of cause and effect. Judging by the laws ol reasoning, such knowledge is incorrect; and the most curious fact is that this knowledge is proved to be incorrect, not by comparison with knowledge which is true. but by the very laws which depend for their basis upon the selfsame vicious circle. It is clear, therefore, that the peculiarity of all our knowledge is that it proves its own insufficiency. Again, we cannot say that it is unreal, for all the reality we know and can think of is within this knowledge. Nor can we deny that it is sufficient for all practical purposes. This state of human knowledge which embraces within its scope both the external and the internal worlds is called Alava. It is unreal because it proves its own incorrectness. It is real in the sense of being sufficient for all the needs of the animal man. Acting in the external world Maya manifests itself

Acting in the external would Maya manifests litell as the two powers of attraction and republion. In the internal its manifestations are desire and non-desire (Pravritti and Nivitti). The whole universe it trying to rush outwards. Each atom is trying to fly off from its centre. In the internal world, each thought is trying to go beyond control. Again each particle in the external world is checked by another force, the centripetal, and drawn towards the centre. Similarly in the thoughtworld the controlling power is checking all these outgoing desires.

Desires of materialisation, that is, being dragged down more and more to the plane of mechanical action, belong to the animal man. It is only when the desire to prevent all such hondage to the senses arises that religion dawns in the heart of man. Thus we see that the whole scope of religion is to prevent man from falling into the bondage of the senses and to help him to assert his freedom. The first effort of this power of Nivritti towards that end, is called morality. The scope of all morality is to prevent this depradation and break this bondage. All morality can be divided into the positive and the

negative elements; it says either, "Do this" or "Do not

do this". When it says, "Do not", it is evident that it is a check to a certain desire which would make a man a slave. When it says, "Do", its scope is to show the way to freedom and to the breaking down of a certain degradation which has already seized the human heart. Now this morelity is only possible if there ba a

liberty to be attained by man. Apart from the question of the chances of attaining perfect liberty, it is clear that the whole universe is a case of struggle to expand, or in other words, to attain liberty. This infinite space is not sufficient for even one storn. The struggle for expansion must go on eternally until perfect liberty is attained. It cannot be said that this struggle to gain freedom is to avoid pain or to attain pleasure. The lowest grade of beings, who can have no such feeling, are also struggling for expansion; and according to many, man himself is the expansion of these very beings.

# THE BIRTH OF RELIGION

The beautiful flowers of the forest with their manycoloured petals, nodding their heads, jumping, leaping. playing with every breeze, the beautiful birds with their gorgeous plumage, their sweet songs echoing through every forest glade-they were there yesterday, my solace, my companions, and today they are gone-where? My playmates, the companions of my joys and sorrows, my pleasures and pastime-they also are gone-where? Those that nursed me when I was a child, who all through their lives had but one thought for me-that of doing everything for me-they also are gone. Everyone, everything is gone, is going, and will go. Where do they go? This was the question that pressed for an answer in the mind of the primitive man. "Why ao?" you may ask, "Did he not see everything decomposed, reduced to dust before him? Why should he have troubled his head at all about where they went?"

To the primitive man everything is living in the first place, and to him death in the sense of annihilation has no meaning at all. People come to him, go away, and come again. Sometimes they go away and do not come. Therefore in the most ancient language of the world death is always expressed by some sort of going. This is the beginning of religion. Thus the primitive man was searching everywhere for a solution of his difficulty where do they all go?

There is the moming sun radiant in his glory, bringing light and warmth and joy to a sleeping world. Slowly he travels and, alas, he also disappears, down, down below:

Written by the Swami during his first visit to America in answer to questions put by a Western during.

but the next day he appears again-glorious, beautiful. And there is the lotus-that wonderful flower in the Nile, the Indus, and the Tieris, the birth-places of civilisationopening in the morning as the solar rays strike its closed petals and with the waning sun shutting up again. Some were there then who came and went and got up from their graves revivified. This was the first aclution. The sun and the lotus are, therefore, the chief symbols in the most ancient religions. Why these symbols?-because abstract thought, whatever that be when expressed, is bound to come clad in visible, tangible, gross earments This is the law. The idea of the passing out as not out of existence but in it, had to be expressed only as a change, a momentary transformation, and reflexively, that object which strikes the senses and goes vibrating to the mind and calls up a new idea, is bound to be taken up as the support, the nucleus round which the new idea spreads itself for an expression. And so the sun and the lotus were the first symbols. There are deep holes everywhere-so dark and so

dismel ; down is all dark and frightful ; under water we cannot see, open our eyes though we may; up is light, all light, even at night the beautiful starry hosts shedding their light. Where do they go then, those I love? Not certainly down in the dark, dark place, but up, above in the realm of Everlasting Light. That required a new symbol. Here is fire with its glowing wonderful tongues of flame-cating up a forest in a short time, cooking the food, giving warmth, and driving wild animals away -this life-giving, life-saving fire, and then the flamesthey all go upwards, never downwards. Here then was another-this fire that carries them upwards to the places of light-the connecting link between us and those that have passed over to the regions of light. "Thou Ignis." begins the oldest human record, "our messenges to the bright ones." So they put food and drink and whatever

Their God was not only a supreme being but He was the Dyang Pitar, the Father in heaven. This is the beginning of Love. The Semitic God is only a thunderer, only the terrible one, the mighty Lord of hosts To all these the Aryan added a new idea, that of a Father. And the divergence becomes more and more obvious all through further progress, which in fact stopped at this place in the Semitic branch of the human race. The God of the Semitic is not to be seen-nay, it is death to see Him . the God of the Aryan can not only be seen, but He is the goal of being : the one aim of life is to see Him The Semitic obeys his King of kings for fear of punishment and keeps His commandments. The Aryan loves his father, and further on he adds mother, his friend, And "Love me, love my dog" they say. So each one of His creatures should be loved, because they are His To the Semitic, this life is an outpost where we are nested to test our fidelity; to the Arvan this life is on the way to our goal. To the Semitie, if we do our duty well, we shall have an ever-joyful home in heaven. To the Aryan, that home is God Himself. To the Semitic, serving God is a means to an end, namely, the pay, which is low and enjoyment. To the Arvan, enjoyment, misery-everything is a means and the end is God. The Semitic worships God to go to heaven. The Aryan rejects heaven to go to God. In short, this is the main difference The aim and end of the Aryan life is to see God, to see the face of the Beloved, because without Him he cannot live. "Without Thy presence, the sun, the moon, and the stars lose their light."

they thought would be pleasing to these "bright ones" into the fire. This was the beginning of sacrifice.

So far the first execution was solved, at least as far as to satisfy the needs of these primitive men. Then came the other question: Whence has all this come? Why did it not come first? Because we remember a sudden change more, happiness, joy, addition, enjoyment make not such a deep impression on our mind as unhappiness, sorrow, and subtraction. Our nature is joy, enjoyment, pleasure, and happiness. Anything that violently breaks it makes a deeper impression than the natural course So the problem of death was the first to be solved as the great disturber. Then with more advancement came the other question: Whence they came? Everything that lives moves; we move : our will moves our limbs : our limbs manufacture forms under the control of our will. Everything then that moved had a will in it as the motor, to the man-child of ancient times as it is to the child-man of the present day. The wind has a will; the cloud, the whole of nature, is full of acparate wills, minds, and souls. They are creating all this just as we manufacture many things; they-the "Devas", the "Elohims", are the creators of all this.

Now in the meanwhile society was growing up. In society there was the king—why not among the bright ones, the Elohima? Therefore there was a supreme "Deva", an Elohima? Therefore there was a supreme "Deva", an Elohimalahveh, God of gods—the one God who by His single will have created all this—even the "bright ones". But as He has appointed different stars and planets, so He has appointed different Tovas" or angels to preside over different functions of nature—some over death, some over birth, etc. One supreme by being infinitely more powerful than the rest, is the common conception in the two great sources of all religions, the Aryan and Semitic races. But here the Aryans take a new start, a grand deviation-

Their God was not only a aupreme being but He was the Dyaus Pitar, the Fathar in heaven. This is the beginning of Love. The Semitic God is only a thunderer, only the terrible one, the mighty Lord of hosts. To all these the Arvan added a new idea, that of a Father. And the divergence becomes more and more obvious all through further progress, which in fact atopped at this place in the Semitic branch of the human race. The God of the Senutic is not to be sean-nay, it is death to see Him ; the God of the Aryan can not only be seen, but He is the goal of being, the one aim of life is to see Him The Semitic obeys his King of kings for fear of punishment and keeps His commandments. The Aryan loves his father, and further on he adds mother, his friend And "Love me, love my dog" they say. So each one of His creatures should be loved, because they are His To the Semitic, this life is an outpost where we are posted to test our fidelity; to the Arven this life is on the way to our goal. To the Semitic, if we do our duty well. we shall have an aver-joyful home in heaven. To the Aryan, that home is God Himself. To the Semitic, serving God is a means to an end, namely, the pay, which is joy and enjoyment. To the Arvan, enjoyment, misery-evarything-is a means and the end is God. The Semitic worships God to go to heaven. The Aryan rejects beaven to go to God. In short, this is the main difference The aim and end of the Aryan life is to sea God, to ace the face of the Beloved, because without Him ha cannot live. "Without Thy presence, the sun, the moon, and the stars lose their light."

## FOUR PATHS OF YOGA1

Our main problem is to be free. It is evident then that until we realise ourselves as the Absolute, we cannot attain to deliverance. Yet there are various ways of attaining to this realisation. These methods have the generic name of Yoga (to join, to join ourselves to our reality). These Yogas though divided into various groups. can principally be classed into four; and as each is only a method leading indirectly to the realisation of the Absolute, they are suited to different temperaments, Now it must be remembered that it is not that the assumed man becomes the real man or Absolute. There is no becoming with the Absolute. It is ever free, ever perfect : but the ignorance that has covered its nature for a time is to be removed. Therefore the whole scope of all systems of Yoga (and each seligion sepresents one) is to clear up this ignorance and allow the Atmon to restore its own nature. The chief helps in this liberation are Abhylisa and Vairagya Vatragya is non-attachment to life, because it is the will to enjoy that brings all this bondage in its train; and Abhyasa is constant practice of any one of the Youas

Karma-Yoga. Karma-Yoga ia purifying the mind by means of work. Now if any work is done, good or had, it must produce as a result a good or had effect; no power can atay it, once the cause is present. Therefore good action producing good Karma, and had action, had Karma, the soul will go on in ternal bondary without ever hoping for deliverance. Now Karma belongs only to the body or the mind, never to the Atman (Self); only it can east a veril before the Atman.

"Written by the Swame during his first visit to America at above to quantons put by a Western duciple.

The veil cast by bad Karma is ignorance. Good Karma has the power to strengthen the moral powers. And thus it creates non-attachment : it destroys the tendency towards bad Karma and thereby purifies the mind. But if the work is done with the intention of enjoyment, it then produces only that very enjoyment and does not purify the mind or Chitta Therefore all work should be done without any desire to enjoy the fruits thereof. All fear and all desire to enjoy here or hereafter must be hanished for ever by the Karma-Yori, Moreover, this Karma without desire of return will destroy the gelfishness, which is the root of all bondage. The watchword of the Karma-Yogi is "not I, but Thou", and no amount of self-sacrifice is too much for him. But he does this without any desire to go to heaven, or gain name or fame or any other benefit in this world. Although the explanation and rationale of this unselfish work is only in Infina-Yoga, yet the natural divinity of man makes him love all sacrifice, simply for the good of others. without any ulterior motive, whatever his creed or opinion Again, with many the bondage of wealth is very great . and Karma-Yoga is absolutely necessary for them as breaking the crystallisation that has gathered round their love of money.

Next is Bhalith-Veya Bhaku or worship or love in some form or other is the causet, pleasantest, and most natural way of man. The natural state of this universe is attraction; and that is surely followed by an ultimate disumion. Even so, love is the natural impetus of union in the human heart; and though itself a great cause of misery, properly directed towards the proper object, it brings deliverance. The object of Bhaku is God. Love cannot be without a subject and an object. The object of love again must be at first a being who can reciprocate out love. Thetefore the God of love must be in some same a human God. He must be a God of love. Audit

## CYCLIC REST AND CHANGE<sup>1</sup>

This whole universe is a case of lost balance. All motion is the struggle of the disturbed universe to regain its equilibrium, which, as such, cannot be motion. Thus in regard to the internal world it would be a state which is beyond thought, for thought itself is a motion. Now when all indication is towards perfect equilibrium by expansion and the whole universe is rushing towards it. we have no right to say that that state can never be attained Again it is impossible that there should be any variety whatsoever in that state of equilibrium. It must be homogeneous; for as long as there are even two atoms they will attract and repel each other and disturb the balance. Therefore this state of equilibrium is one of unity, of rest, and of homogeneity. In the language of the internal, this state of equilibrium is not thought, nor body, nor anything which we call an attribute. The only thing which we can say it will retain is what is its own nature, as existence, self-consciousness. and blissfulness.

This state in the same way cannot be two. It must only be a unit, and all fictitious distinctions of I, theaetce, all the different variations must vanish, as they belong to the state of change or Mâyā. It may be said that this state of change has come now upon the Selfshowing that, before this, it had the state of rest and liberty: that at present the state of differentiation is the only real state, and the state of homogeneity is the primitive crudeness, out of which this changeful state is manufactured; and it will be only degeneration to go back to the state of undifferentiation. This argument

Written by the Swami during his first visit to America in answer to questions put by a Western disciple.

would have had some weight if it could be proved that these two states, viz homogeneity and heterogeneity, are the only two states happening but once through all time. What happens once must happen again and again. Rest is followed by change—the universe. But that rest must have been preceded by other changes, and this change will be succeeded by other rests. It would be ridiculous to think that there was a period of rest and then came this change which will go on for ever. Every particle in nature shows that it is coming again and again to periodic rest and change.

This interval between one period of test and another is called a Kalpa. But this Kalpie rest cannot be one of perfect homogeneity, for in that case there would be an end to any future manifestation. Now to say that the present atate of change is one of great advance in comparison to the preceding state of rest is simply absurd, because in that case the coming period of rest being much more advanced in time must be much more perfect! There is no progression or digression in nature. It is showing again and again the same forms. In fact the word law means this. But there is a progression with regard to aculs. That is to say, the sculs get nearer to their own natures, and in each Kalpa large numbers of them get deliverance from being thus whirled around. It may be said, the individual soul being a part of the universe and nature, returning again and again, there cannot be any liberty for the soul, for in that case the universe has to be destroyed. The answer is that the individual soul is an assumption through Maya, and it is no more a reality than nature itself. In reality, this individual soul is the unconditioned absolute Brahman (the Supreme).

All that is real in nature is Brahman, only it appears to be this variety, or nature, through the auperimposition of Maya. Maya being illusion cannot be said to be real.

SWAMI VIVEKANANDA'S WORKS yet it is producing the phenomena. If it be asked, how can Maya, herself being illusion, produce all this, our answer is that what is produced being also ignorance. the producer must also be that. How can ignorance be

158

produced by knowledge? So this Maya is acting in two ways as nescience and science (relative knowledge); and this science after destroying nescience or ignorance is itself also destroyed. This Maya destroys herself and what remains is the Absolute, the Essence of existence, knowledge, and bliss. Now whatever is reality in nature is this Absolute, and nature comes to us in three forms. God, conscious, and unconscious, i.e. God, personal souls, and unconscious beings. The reality of all these is the Absolute ; through Maya it is seen to be diverse. But the vision of God is the nearest to the reality and the highest. The idea of a Personal God is the highest idea which man can have. All the attributes attributed to God are true in the same sense as are the attributes of nature. Yet we must never forget that the Personal God

is the very Absolute seen through Maya.

# A PREFACE TO THE IMITATION OF CHRIST<sup>1</sup>

The Imitation of Christ is a cherished treasure of the Christian world This great book was written by a Roman Catholic monk. "Written," perhaps, is not the proper word. It would be more appropriate to say that each letter of the book is marked deep with the heart's blood of the great soul who had renounced all for his love of Christ. That great soul whose words, living and burning, have cast such a spell for the last four hundred years over the hearts of myriads of men and women; whose influence today remains as strong as ever and is destined to endure for all time to come : before whose genius and Sådhanå (spiritual effort) hundreds of crowned heads have bent down in reverence; and before whose matchless purity the jarring sects of Christendom, whose name is legion, have sunk their differences of centuries in common veneration to a common principle-that great soul, strange to say, has not thought fit to put his name to a book such as this. Yet there is nothing strange here after all, for why should be? In it possible for one who totally renounced all earthly joys and despised the desire for the bauble fame as so much dirt and filth-is it possible for such a soul to care for that paltry thing. a mere author's name? Postenty, however, has guessed that the author was Thomas & Kempis, a Roman Catholic monk. How far the guess is true is known only to God. But he he who he may, that he deserves

<sup>&#</sup>x27;Translated from an enginal Bengali writing of the Swami in 1809. The passage is the preface to his Bengali translation of The Imitation of Christ which be contributed to a Rengali monthly. He translated only six chapters with quotations of parallel passages from the Hindu scriptures.

# AN INTERESTING CORRESPONDENCE

Now Sister Mary,
You need not be sorry
For the hard raps? gave you,
You know full well,
Though you like me tell,
With my whole heart? love you,

The babies I bet,
The best friends I met,
Will stand by me in weal and woe.
And so will I do,

You know it too.

Life, name, or fame, even heaven forgo For the sweet sisters four Sans reproche et sans peur, The truest, noblest, steadfast, best.

In order to truly appreciate this correspondence, the reader has to be informed of the occasion which gave rise to it and also to remember the relation that existed between the correspondents. At the outset of the first letter the Swaml epeaks of "the bard rape" that he gave to his correspondent. These were nothing but a very etrong letter which he wrote to her in vindication of his position, on the let February, 1895, which will be found reproduced In the fifth volume of The Complete Worke of the Swaml. It was a very becutiful letter full of the fire of a Sannyasin'e spint, and we request our readers to go through it before they peruse the following text. Mery Hale, to whom the Swami wrote, was one of the two daughters of Mr. and Mrs. Hele whom the Swami used to address as Fether Pope and Mother Church. The Misses Hale and their two cousine were like sisters to him, and they also in their turn held the Sweml in great love and reverence. Some of the finest letters of the Swami were written to them.

In the present correspondence the Swami is seen in a new light, pleylul and intensely human, yet keyed to the centrel theme of his life, Brahmejañaa. The first letter was written from New

York, 15th February, 1895 Ed

The wounded snake its hood unfurls. The flame stirred up doth blaze, The desert air resounds the calls Of heart-struck lion's rage.

The cloud puts forth its deluge strength When lightning cleaves its breast, When the soul is stirred to its immost depth Creat ones unfold their best.

Let eyes grow dim and heart grow faint, And friendship fail and love betray, Let Fate its hundred horrors send, And clotted darkness block the way.

All nature wear one angry frown,
To crush you out—still know, my soul,
You are Divine. March on and on.
Nor right nor left but to the goal

Nor angel I, nor man, nor brute. Nor body, mind, nor he or she, The books do stop in wonder mute To tell my nature: I am He

Before the sun, the moon, the earth, Before the stars or comets free, Before e'en time has had its birth, I was, I am, and I will be.

The beauteous earth, the glorious sun. The calm sweet moon, the apangled sky. Causation's laws do make them run; They live in bonds, in bonds they die.

And mind its mantle dreamy net Cast o'er them all and holds them fast. In warp and woof of thought are set, Earth, hells, and heavens, or worst or best.

Know these are but the outer crust— All space and time, all effect, cause, I am beyond all aense, all thoughts, The witness of the universe.

Not two or many, 'tis but one. And thus in me all me's I have; I cannot hate, I cannot ahun Myself from me, I can but love.

From dreams awake, from bonds be free. Be not afraid This mystery, My shadow, cannot frighten me, Know once for all that I am He.

Well, so far my poetry. Hope you are all right. Give my love to mother and Father Pope. I am busy unto death and Lave almost no time to write even a fine-So excuse me if later on I am rather late in writing.

Yours eternally.

Miss M. B. H. sent Swami the following daggerel in reply

Sudden a light around him shone. The "still small voice" his thoughts inspire And his words glow like coals of fire. And coals of fire they proved to be Hesped on the head of contrite me-

My scolding letter I deplore And beg forgiveness o'er and o'er. The lines you sent to your sisters four Be sure they'll cherish evermore

Twixt tweedledum and tweedledee—
That is a proposition sane,

But truly 'tis beyond my vein To make your Eastern logic plain.

If "God is truth, all else is naught."
This "world a dream," delusion up wrought.

What can exist which God is not?

All those who "many" see have much to fear. He only lives to whom the "One" is clear. So again i say I cannot see but that all's He.

#### NOTES OF CLASS TALKS

#### WHEN WELL CHRIST COME AGAIN!

I never take much notice of these things. I have to deal with principle. I have only to preach that God course again and again and that He came in India as Kituhna, Rkima, and Buddha and that He will come again. It can almost be demonstrated that after each 500 years the world sinks, and a tremendous spiritual was comes and on the time of the wave is a Chem.

There is a great change now coming all over the world, and this is a cycle. Men are finding that view are losing hold of life, which way will they turn, it will on up? Up, certainly. How can it be down it. Thore into the breach, fill up the breach with your body, you life. How should you allow the world to go down when you are living.

#### Tin Danieled newton Man and Court

There is much difference in esantested bring. As a manifested being you will never be Christ. Out of clay manufacture a clay elephant, out of the same clay manufacture a clay mone. Soak there in water—their become one. As clay they are externally one as fadinosed things they are externally of Breed. The Abaclute is the material of both God and than. As Abaclute to their present floring we are all one and as presental temps. God is the external engages and we are the internal external external external.

You have three things in you. If the hole (2) the mind (3) the apost. The apost as extraprise, the third corones to high and draft, and an does the hole. You are that epost in often you are that epost in others.

When a man says, "I am here," he thinks of the body. Then comes another moment when you are on the highest plane; you do not say, "I am here." But if a man abutes you or curses you and you do not resent it, you are the spirit. "When I think I am the mind. I am one spank of that eternal fire which Thou art; and when I feel that I am the spirit, Thou and I are one"—so says a devotee to the Lord. Is the mind in advance of the snipit?

God does not reason; why should you reason if you knew? It is a sign of weakness that we have to go on crawling like worms to get a few facts and build generalisations, and then the whole thing tumbles down again. The apurit is reflected in the mind and everything. It is the light of the spirit that makes the mind sensate Everything is an expression of the spirit; the minds are so many mirrors. What you call love and fear, hated, virtue, and vice are all reflections to the spirit; only when the reflector is base the reflection is base.

#### ARE CHRIST AND BUDDHA IDENTICAL ?

It is my particular fancy that the same Boddha beame Christ. Buddha prophesied, "I will come again in five hundred years". And Christ came here in five hundred years. These are the two Lights of the whole human nature. Two men have been produced, Buddha and Christ; these are the two giants, huge gigantic personalities, two Gods. Between them they divide the whole world. Wherever there is the least knowledge in the world, people bow down either to Buddha or Christ It would be very hard to produce more like them, but I hope there will be. Mohammed came five hundred years after five hundred years after, five hundred years after cane Luther with his Protestant wave, and this is five hundred years after that again. It is a great thing in a few thousand years to produce two such men as Jesus and Buddha. Are not

two such enough? Christ and Baddha were Gods, the others were prophets. Study the life of these two and see the manifestation of power in them—calm and non-resisting, poor beggars owning nothing, without a cent in their pockets, despised all their lives, called heretic and fool—and think of the immense apiritual power they have wielded over humanity.

#### SALVATION FROM SIN

We are to be saved from sin by being saved from ignorance. Ignorance is the cause of which sin is the result.

#### COMING BACK TO THE DIVINE MOTHER

When a nurse takes a baby out into the garden and plays with the baby, the Mother may send word to the baby to come indoors. The baby is absorbed in play, and asys, "I won't come ! I do not want to eat." After a while, the baby becomes tired with his play and says, "I will go to Mother" The nurse eays. "Here is a new doll," but the baby says, "I do not care for dolls any more. I will go to Mother," and he weeps until he goes. We are all bables. The Mother is God We are absorbed in seeking for money, wealth, and all these things: but the time will come when we will awaken; and then this nature will try to give us more dolls, and we will say. "No. I have had enough. I will go to God!"

#### NO INDIVIDUALITY APART FROM COD

If we are inseparable from God, and always one, have we no individuality? Oh yes: that is God. Our individuality is God. This is not real individuality with, you have now. You are coming towards that true one. Individuality means what cannot be divided. How can you call this state—we are now-individuality? One how

182 SWAMI VIVEKANANDA'S WORKS you are thinking one way, and the next hour another way, and two hours after another way. Individuality is that which changes not. It would be tremendously

dangerous for the present state to remain in eternity, then the thief would always remain a thief, and the blackguard. a blackguard. If a baby died, it would have to remain a baby. The real individuality is that which never changes, and will never change; and that is God within us

#### MAN THE MAKER OF HIS DESTINY

There was a very powerful dynasty in Southern India. They made it a rule to take the horoscope of all the prominent men living from time to time, calculated from the time of their birth. In this way they got a record of leading facts predicted, and compared them afterwards with events as they happened. This was done for a thousand years until they found certain agreements: these were generalised and recorded and made into a huge book. The dynasty died out, but the family of sattologers lived and had the book in their possession. It seems possible that this is how astrology came into existence. Excessive attention to the minutia of sattrology is one of the superutitions which has but the Hindus very much.

I think the Greeks first took Astrology to India and took from the Hindus the science of Astronomy and carried it back with them to Europe. Because in India you will find old alters made according to a certain geometrical plan, and certain things had to be done when the stars were in certain positions. Therefore I think the Greeks gave the Hindus Astrology, and the Hindus gave them Astronomy.

I have seen some astrologers who predicted wonderful things; but I have no reason to believe they predicted them only from the stars, or anything of the sort. In many cases it is simply mind-reading Sometimes wonderful predictions are made, but in many cases it is arent train.

In London, a young man used to come to me and ask me. 'What will become of me next year?' I asked him why he asked me so. ''I have lost all my money and have become very, very poor.' Money is the only

# SIVAMI VIVEKANANDA'S IVORKS

184

God of many beings. Weak men, when they lose everything and feel themselves weak, try all sorts of uncanny methods of making money, and come to astrology and all these things "It is the coward and the fool who says. This is fate "-so says the Sansknit proverb But it is the strong man who stands up and says, "I will make my fate." It is people who are getting old who talk of fate. Young men generally do not come to astrology. We may be under planetary influence, but it should not matter much to us. Buddha says, 'Those that get a living by calculation of the stars, by such art and other lying tricks, are to be avoided"; and he ought to know, because he was the greatest Hindu ever born. Let stars come, what harm is there? If a star disturbs my life, it would not be worth a cent. You will find that astrology and all these mystical things are generally signs of a weak mind; therefore as soon as they are becoming prominent in our minds we should see a physician, take good food and rest

If you can get an explanation of a phenomenon from within its nature, it is nonsense to look for an explanation from outside. If the world explains itself, it is nonsense to go outside for an explanation. Have you found any phenomena in the life of a man that you have ever seen which cannot be explained by the power of the man himself? So what is the use of going to the stars, or anything else in the world? My own Karms is sufficient explanation of my present state. So in the case of Jenus Limself We know that his father was only a carpenter We need not go to anybody else to find an explanation of his power. He was the outcome of his own past, all of which was a preparation for that Jesus. Buildha gors back and back to animal bodies and tells how he altmately became Buddha. So what is the use of going to stars for explanation? They may have a latle influence ; but it is our duty to ignore them rather than hearless to

them and make ourselves nervous. This I by down as the first essential in all I teach: anything that brings spiritual, mental, or physical weakness, touch it dot with the toes of your feet. Religion is the manifestation of the natural strength that is in man. A syring of infinite power is colled up and is insude this little body, and that spring is spreading itself. And as it toos on spreading, body after body is found musficent; it throws them off and takes higher bothes. The is the hastory of man, of religion, evaluation, or progress. That grant Prometheus who is bound, is getting lumself unbound. It is always a manifestation of strength, and all these ideas such as astrology, although three may be a grain of truth in them, should be avoided.

There is an old story of an astrologer who came to a king and said. "You are going to die in aix months". The king was frightened out of his wits, and was almost about to die then and there from fear. But his minuter was a clever man, and this man told the king that these astrologers were fools. The king would not believe him. So the minister saw no other way to make the king see that they were look but to sovite the astrologer to the palace again. There he asked him if his calculations were correct. The autologes said that there could not be a mistake, but to satisfy him he went through the whole of the calculations again and then said that they were perfectly correct. The king's face became livid The minister and to the astrologer, "And when do you think you will die?" "In twelve years," was the reply The minister quickly drew his award and separated the astrologer's head from the body and said to the line. "Do you are this hat? He is deed this moment "

If you want your nation to live keep away from all these things. The only test of good things is that they make us strong. Good is life, evil is death. These superstitious ideas are springing like mushrooms in your

186

country and women wanting in logical analysis of things are ready to believe them. It is because women are striving for liberation, and women have not yet established themselves intellectually. One gets by heart a few lines of poetry from the top of a novel and says she knows the whole of Browning. Another attends a course of three lectures and then thinks she knows everything in the world. The difficulty is that they are unable to throw off the natural superstition of women. They have a lot of money and some intellectual learning, but when they have passed through this transition stage and get on firm ground, they will be all right. But they are played upon by charlatans. Do not be sorry : I do not mean to hurt any one, but I have to tell the truth. Don't you see how open you are to these things? Don't you see how sincere these women are, how that divinity latent in all perer

dies? It is only to know how to appeal to the Divine. The more I live, the more I become convinced every day that every human being is divine. In no man of woman, however vile, does that divinity die. Only he or she does not know how to reach it, and is waiting for the Truth. And wicked people are trying to deceive him or her with all sorts of fooleries. If one man cheats another for money, you say he is a fool and a blackguard. How much greater is the iniquity of one who wants to fool others spiritually ! This is too bad. It is the one test. that truth must make you strong, and put you above superstition. The duty of the philosopher is to raise you above superstition. Even this world, this body and mind are superstitions : what infinite souls you are! And to be tricked by twinkling stars I It is a shameful condition. You are divinities; the twinkling stars owe their existence to you.

(Notes of a lecture delivered at the Vedanta Society, Vew York, in June, 1900)

The different sectarian systems of India all radiate from one central idea of unity or dualism.

They are all under Vedanta, all interpreted by it.

Their final easence is the teaching of unity. This whitch we see so many, is God. We perceive matter, the world, manifold ecneation. Yet there is but one existence.

These various names mark only difference of

degree in the expression of that One. The worm of today is the God of tomonow. These distriction width we so love are all petra of one infinite fact, and only differ in the degree of expression. That one infinite fact is the attainment of freedom.

However mittaken we may be as to the method.

To Shri Haridas Viharidas Desai

CHICAGO, 15th November, 1894(3 ?).

DEAR DIWAND SAHER.

I here received your kind note. So very kind of you to remember me even here, I have not seen your Narayan Hemchandra. He is not in America, I believe. I have sean many strange eights and gread things. I am glad that there is a good thance of your centing ever to Europe. Avail yourself of it by any means. The fact of our isolation from all the other nations of the world is the cause of our degeneration and its only remedy is getting back into the current of the rest of the world. Motion is the sign of life. America is a grand country. It is a paradize of the poor and women. There is almost no poor in the country, and nowhere else in the world women are so free, so educated, so cultured. They are everything its society.

This is a great lesson. The Sannyasin has not lost a bit of his Sannyasiship, even his mode of living. And in this most hospitable country, every home is open to me. The Lord who guides me in India, would He not guide me here? And He has

You may not understand why a Sannyasin should be in America, but it was necessary. Because the only claim you have to be recognised by the world is your religion and good specimens of our religious men are required to be sent abroad to give other nations an idea that India is not dead.

Some representative men must come out of India and go to all the nations of the earth to show at least that you are not savages. You may not feel the necessity of it from your Indian home, but, believe me, much depends upon that for your nation. And a Sannyasin who has no idea of doing good to his fellows is a brute, not a Sannyasin.

I am neither a sightseer nor an idle traveller; but you will see, if you live to see, and bless me all your life. Mr. Dvivedi's papers were too big for the Parliament, and they had to be cut short.

I apoke at the Parliament of Religions, and with what effect I may quote to you from a few newspapers and magazines ready at hand. I need not be self-conceited, but to you in confidence f am bound to say, because of your love, that no Hindu made such an impression in America, and if my coming has done nothing, it has done this that the Americans have come to know the India even today produces men at whose feet even the most civilised nations may learn lessons of religion and morality. Don't you think that is enough to say for the Hindu nation sending over here their Sannyasin? You would heart the details from Viuchand Gandhi.

These I quote from the journals: "But eloquent as well the spirit of the Parliament (of religions) and its limitations as the Hindu monk. I copy his address in full, but I can only suggest its effect upon the audience: for he is an orator by Divine right and his strong intelligent face in its picturesque setting of yellow and orange was hardly less interesting than these earnest words and

the rich rhythmical utterance he gave them." (Here the speech is quoted in extenso). New York Critique.

"He has preached in clubs and churches until his faith has become familiar to us. . . His culture, his eloquence and his fascinning personality have given us a new idea of Hindu civilisation. . . His fine, intelligent face and his deep musical voice, prepossessing one at once in his favour. . . He speaks without notes, presenting his facts and his conclusions with the greatest art and the most convincing stocenty, and rising often to rich inspiring eloquence." Bid

"Vivekananda is undoubtedly the greatest figure in the Parliament of Religions. After hearing him we feel how foolish it is to send missionaries to this learned nation." Hereld (the greatest paper here)

I cease from quoting more lest you think me concited; but this was necessary to you who have become nearly frogs in the well and would not see how the world is going on elsewhere. I do not mean you personally, my noble friend, but our nation in general.

I am the same here as in India, only here in this highly cultural land there is an appreciation, a sympathy which our ignorant fools never decam of. There our people grudge us monks a crumb of bread, here they are ready to pay one thousand rupees a lecture and remain grateful for the instructions for ever.

I am appreciated by these strangers more than I was ever in India. I can, if I will, I whe here all my life in the greatest luxmy; but I am a Sanayasin, and 'India, with all thy faults I love thee still." So I am coming back after some months, and go on sowing the seeds of religion and progress from city to city as I was doing so long, although amongst a people who know not what appreciation and gratefulness are.

I am ashamed of my own nation when I compare their

Legistly, selfish, unapprecisitive, ignorant ungratefulness with the help, hospitality, sympathy, and respect which the Americans have shown to me, a representative of a foreign religion. Therefore come out of the country, see others, and compare.

Now after these quotations do you think it was worth

while to send a Sannyann to America?

These do not publish it. I hate notociety in the same manner as I did in Iraha.

I am doing the Lord's work, and wherever He leads I follow mg wiff wind etc.—He who makes the doinh eloquent and the lame cross a mountain. He will help me I do not care for human help. He is ready to help me in India, an America, on the North Pole, if He thinks fit. II He does not, none else can help me. Glory unto the Lord for ever and ever.

Yours with blessings.

November (2), 1894.

DEAR DIWANIL

Your letter pleased me extremely. I, of course, understand the joke, but I am not the baby to be put off with a joke; now take more.

The secret of success of the Westemers is the possible with mutual trust and co-operation and help. Now here is Virchand Gandhi, the Jain, whom you well knew in Bombay. This man never takes anything but pure vegetables even in this terribly cold climate. and

tooth and sail tries to defend his countrymen and religion. The people of this country like him very well, but what are they doing who sent him over ? They are trying to outcast him. Jealousy is a vice necessarily generated in slaves. Again it is jealousy that holds them down.

Here were . . . : they were all trying to lecture and get money thereby. They did something, but I succeeded better than they-why, I did not put myself as a bar to their success. It was the will of the Lord. But all these ... except ... have fabricated and circulated the most horrible lies about me in this country, and behind my back. Americans will never atoon to such meanness. . . . If any man tries to move forward, here everybody is ready to help him. In India you may try tomorrow by writing a single line of praise for me in any of our papers (Hindu), and next day they would be all against me. Why ? It is the nature of slaves. They cannot suffer to see any one of their brethren putting his head the least above their rank. . . . Do you mean to compara such stuff with these children of liberty, self-help, and brotherly love? The nearest approach to our people are the freed slaves of the U. S. A., the Negroes, Why. in the South they are about twenty millions and are now free. The whites are a handful, still the whites hold them down all the same. Why ? Even when they have every right by law, a bloody war between the brothers has been fought to free these slaves. The same defectjealousy, not one of these Negroes would bear to see his brother-Negro praised or pushing on. Immediately they would join the whites to crush him down. You can have no idea about it until you come out of India. It is all right for those who have plenty of money and position to let the world roll on such, but I call him a traiter who. having been educated, nursed in luxury by the heart's blood of the downtrodden millions of tailing poor, never

DEAR FRIEND,

It is impossible to express my gratituda for your kindly inviting me to your country seat [Ridgley], I am involved in a mistake now and find it impossible for ma to come tomorrow. To morrow I have a class at Miss Andrews' of 40 W. 9th Street. As I was given to understand by Miss MacLeod that that class could be postponed, I was only too glad at the prespect of joining the company tomorrow. But I find that Miss MacLeod was mistaken and Miss Andrews came to tell me that she could not by any means stop the class tomorrow or even give notice to the members, who are about 50 or 60 in number. In view of this I sincerely regret my inability, and hope that Miss MacLeod and Mrs. Sturgis will understand that it is an unavoidable circumstance, and not the will, that stands in the way of my taking advantage of your kind invitation. I shall only be too glad to come day after tomorrow, or any other day this week, as it suits you.

To Mr. E. T Sturdy

54 w 33RD 7TREET, NEW YORK 24th April, 1895

DEAR FRIEND

I am perfectly aware that although some truth underlies the mass of mystical thought which has burst upon the Western world of late, it is for the most part full of motives unworthy or insane for this reason. I have never had anything to do with these phases of religion, either in India or elsewhere, and mystics as a class are not very favourable to me.

I quite agree with you that only the Adveita philosophy can save mankind, whether in East or West, from "devil worship" and kinded supersitions, gwing tone and strength to the very nature of man. India herself requires this, quite as much or even more than the West Yet it is hard uphill work, for we have first to create a taste, then teach, and lastly proceed to build up the whole fabrie.

Perfect aincerity, holiness, ejganila intellect, and an all the comparing will. Let only a handful of men work with these, and the whole would will be revolutionised. I did a good deal of platform work in this country last year, and received plenty of applause, but found that I was only working for myself. It is the patient upbuilding of character, the intense struggle to realize the truth, which alone will tell in the future of humanity. So this year I am hoping to work along this line—training up to practical Advaits realisation a small band of them and women. I do not know how far I shall succeed. The West is the field for work if a man wants to benefit humanity, rather than his own particular sect or country. I agree perfectly as to your idea of a magazine, ENI have no

business capacity at all to do these things. I can teach and preach, and sometimes write. But I have intense faith in Truth. The Lord will send help and hands to work with me. Only let me be perfectly pure, perfectly sincere, and perfectly unselfish.

"Truth alone triumphs, not untruth; through truth alone stretches the way to the Lord" (Atharva-Veds). He who gives up the little self for the world will find the whole universe his. I am very uncertain about coming to England. I know no one there, and here I am doing some work. The Lord will guide, in His own time

## DEAR FRIEND,

I received your last duly, and as I had a previous arrangement to come to Europe by the end of this August. I take your invitation as a Divine Call.

August, I take your invitation as a Divine Cut.

"Truth alone triumphs, not untruth. Through truth alone lies the way to Devayana (the way to the gods). Those who think that a little sugar-coating of untruth helps the spread of truth are mistaken and will find in the long run that a single drop of poison poisons the whole mass. . . The man who is pure, and who dares, does all things. May the Lord ever protect you from illusion and delusion! I am ever ready to work with you, and the Lord will send un friends by the hundred, if only we be our own friends first. "The Atman alone is the friend of the Atman:

Europe has always been the source of social, and Asia of critical power; and the whole history of the he varying combinations of those two powers. Slowly a new leaf is being turned in the story of humanity. The signs of this are everywhere. Hundreds of new plans will be created and destroyed. Only the fit will survive. And what but the true and the good is the fit?

Yours etc.

#### DEAR BABIES.

What I expected has come. I always thought that although Prof. Max Moller in all his writings on the Hindu religion adds in the last a daragatory remark, he must see the whole truth in the long run. As soon as you can, get a copy of his last book Vedontim; there you will find him swallowing the whole of it—reincarmettion and all.

Of course you will find it difficult at all to understand, as it is only a part of what I have been telling you all this time.

Many points you will find smack of my paper in

Chicago.

I am glad now the old man has seen the truth, because that is the only way to have religion in the face

of modern research and science.

Hope you are enjoying Todd's Rajasthan.

Mr. Leggest told me of your phonograph. I told him to get a few cylinders-I talk in them through somebody's phonograph—and send them to Jos, to which ha replied that he could buy one because "I always do what Joe asks me to do." I am glad there is so much of hidden poetry in his nature.

I am going today to live with the Guernseys as the doctor wants to watch me and cure me. . . . Doctor Guernsey, after examining other things, was feeling my

Dr. Guernacy burst out laughing and declared he would have paid that man for coming just then, for he was then sure of his diagnosis of my case. The pulse hefore was so regular, but just at the sight of Landsberg it almost stopped from emotion. It is sure only a case of nervousness. He also advises me strongly to go on with dottor Helmer's treatment. He thinks Helmer will do me a world of good and that is what I need now. Is not

I expect to see "the sacred cow" today in town. I will be in New York a few days more. Helmer wants me to take three treatments a week for four weeks, then two a week for four more and I will be all right in case I go to Boston he recommends me to a very good ostad (expert) there whom he would advise on the matter.

I said a few kind words to Landsberg and went upstairs to Mother Guernsey to save poor Landsberg from embarrassment.

54 w. 33RD STREET, NEW YORK, 22nd June, 1895.

DEAR SISTER,

The letters from India and the parcel of books reached me safe. I am so happy to know of Mr. Sam's arrival. I am sure he is "bewaring of the vidden" nicely. I met a friend of Mr. Sam's one day on the street. He is an Englishman with a name ending in "ai". He was very nice. He said he was living in the same house with Sam somewhere in Ohlo.

I am going on pretty nearly in the same old fashion-Talking when I can and silent when forced to be. I do not know whether I will go to Greenace this summer. I saw Miss Farmer the other day. She was in a hurry to go away, so I had but very little talk with her. She is a noble, noble lady.

How are you going on with your Christian Science lessons? I hope you will go to Greenacre. There you will find quite a number of them and also the Spiritualist. table turnings, palmists, astrologers, etc., etc. You will get all the "cures" and all the "isms" presided over by Miss Fammer.

Landsberg has gone away to live in some other place.
so I am left alone. I am living mostly on nuts and fruits and milk, and find it very sice and healthy too. I hope to lose about 30 to 40 lbs. this summer. That will be all right for my size. I am sfraid I have forgotten all about Mts. Adam's leasons in walking. I will have to renew them when she comes again to N. Y. Candhi has gone to England er route to Indak from Botton, I suppose

I would like to know about his "chaperon" Mrs. Howard and her present bereaved state I am very glad to hear that the rugs did not go down to the bottom of the Atlantic and are at last coming

This year I could hardly keep my head up and I did not go about lecturing. The three great commentaries on the Vedanta philosophy belonging to the three great sects of dualists, qualified dualists, and monists are being eent to me from India. Hope they will arrive safe. Then I will have an intellectual feast indeed. I intend to write a book this summer on the Vedanta philosophy. This world will always be a mixture of good and eyil, of happiness and misery; this wheel will ever go up and come down: dissolution and resolution is the inevitable law Blessed are those who struggle to go beyond. Well, I am slad all the babies are doing well but sorry there was no "catch" even this winter, and every winter the chances are dwindling down. Here near my lodgings is the Walderf-Hotel, the rendezvous of lots of titled but pennie less Europeans on show for "Yankee" heiresses to buy. You may have any selection here, the stock is so full and varied. There is the man who talks no English ; there are others who hap a few words which no one can understand; and others are there who talk nice English, but their chance is not so great as that of the dumb ones-the girls do not think them enough foreign who talk olain English fluently.

I read somewhere in a funny book that an American versal was being form-leved in the sea; the men were desperate and as a last solate wanted some religious service being done. There was "Uncle Jesh" in board who was an ebles in the Freshyterian Church. They all begin to estreat. 'On something religious. Uncle Josh! We are all grant to the "Uncle Joshph took his last in his hand and took up a collection on the nort!

That is all of selection he knew. And that is more or less characteristic of the majority of such people. Collections are alread all the selligion they know or will ever know. Lord bless them. Good bye for the present. I am much to est something. I feel very hungry.

Yours affectionately, Viveranupa.

### Dear Sister,

different friends. But they are not going to arrive before some months, I am sure.

I am asked again and again as you will find in the letters from India to go over. They are getting desperate. Now if I go to Europe I will go as the guest of Mr. Francis Leggett of N. Y. He will travel all over Germany, England, France, and Switterland for six weeks. From there I shall go to India, or I may return to America I have a seed planted here and wish it to grow. This winter's work in N.Y was splendid and it may die it I suddenly go over to India, so I am not sure about going to India, so I am not sure about going to India, so.

Nothing noticeable has happened during this visit to the Thousand Islands. The scenery is very beautiful and I have some of my friends here with me to alk about God and soul od libitum. I am eating fruits and drinking milk and so forth, and studying huge Sanskrit books on Vedanta which they have kindly sent me from India.

If I come to Chicago I cannot come at least within aix weeks or more. Baby needn't alter any of her plans for me. I will see you all somehow or other before I so.

You fussed so much over my reply to Madras, but it has produced a tremendous effect there. A late speech by the President of the Madras Christian College. Mr. Miller, embodies a large amount of my ideas and declares that the West is in need of Hindu ideas of God and man and calls upon the young men to go and preach to the West. This has created quite a furor of course amongst the Missions. What you allude to being published in the Arens I did not see a bit of it. The women did not make any fuss over me at all in New York. Your friend must have drawn on his imagination. They were not of the "Dossing" type at all. I hope Father Pope will go to Europe and Mother Church too. Travelling is the best thing in Efs. Many thanks for the Indian mail. I cannot express in words my gratitude to you. As you have already read in Max Müller's article on Immortality I sent Mother Church, that he thinks that those we love in this life we must have loved in the past, so it seems I must have been expecting some books from India. I hope they have arrived. If no, will you kindly send them over here? If any postage is due I shell send it as soon as I get intimation. You did not write about the duty on the rugs, there will be another big packet from Khetti containing carpets and shawls and some brocades and other nick-nacks. I have written them to get the duty paid there if it is possible through the American Council in Bombay. If not I shall have to pay it here. I do not think they will arrive for some months yet. I am anxious about the books. Kindly send them as soon as they arrive.

My love to Mother and Father Pope and all the sisters. I am enjoying this place immensely. Very little eating and good deal of thinking and talking and atudy. A wondarful calmness is coming over my soul. Every day I feel I have no duty to do : I am always in eternal rest and peace. It is He that works. We are only the instruments. Blessed be His name! To Mr. E. T. Sturdy

19 WEST 38TH ST., NEW YORK, 2nd August 1895.

DEAR FRIEND.

Your kind note received today. I am going to Paris furt with a friend and start for Europe on the 17th of August. I will however remain in Paris only a week to see my friend married and then I go over to London.

Your advice about an organisation was very good

indeed. And I am trying to act on that line.

I have many strong friends here but unfortunately they are most of them poor. So the work here must be slow. Moreover it requires a few months more of work in New York to carry it to some visible shape; as such I will have to return to New York early this winter and in summer I will return to London again. So far as I see now I can stay only a few weeks in London. But if the Lord wills, that small time may prove to be the beginning of greater things. From Paris I will inform you by wire when I arrive in England.

Some Theosophists came to my classes in New York, but as soon as human beings perceive the glory of the Vedanta, all abracadabas fall off of themselves. This has been my uniform experience. Whenever mankind attains a higher vision, the lower vision disappears of itself. Multitude counts for nothing. A few best-whole, sincere, and energetic men can do more in a year than a mob in a century. If there is heat in one body, then those others that come near it must eatch it. This is the law. So success is ours, so long as we keep up the heat, the spirit of truth, sincerity, and love. My own life has been a very chequered one, but I have always found the eternal words verified: "Truth alone trumpth, not untruth. Through truth alone lies the way to God."

May the Sat in you be always your infallible guide! May He speedily attain to freedom and help others to attain it l

Ever yours in the Sat, VINEY IN INDA

L To Mr. E. T. Stardu

19 WEST 38TH STREET,

NEW YORK. 9th August, 1895.

DEAR FRIEND.

. . . It is only just that I should try to give you a little of my views. I fully believe that there are periodic ferments of religion in human society, and that such a period is now sweeping over the educated world While each ferment, moreover, appears broken into various little bubbles, these are all eventually similar, showing the cause or causes behind them to be the same. That religious ferment which at present is every day gaining a greater hold over thinking men, has this characteristic that all the little thought-whirlpools into which it has broken itself declare one single sim-a vision and a search after the Unity of Being. On planes physical, ethical, and spiritual, an ever-broadening generalisationleading up to a concept of Unity Eternal-is in the sit : and this being so, all the movements of the time may be taken to represent, knowingly or unknowingly, the publish philosophy of the unity man ever had-the Advaita Vedanta.

Again, it has always been observed that as a result of the struggles of the various fragments of thought in a given epoch, one bubble survives. The rest only arise to melt into it and form a single great wave, which sweeps over society with irresistible force.

In India, America, and England (the countries 1 VIII-23

happen to know about) hundreds of these are struggling at the present moment. In India, dualistic formules are already on the wane, the Advaita alone holds the field in force. In America, many movements are struggling for the mastery. All these represent Advaita though more or less, and that series which is spreading most rapidly, approaches nearer to it than any of the others. Now if anything was ever clear to me, it is that one of these must survive, awallowing up all the rest, to be the power of the future. Which is it to be 1

Referring to history, we see that only that fragment which is fit will survive, and what makes fit to survive but character? Advaits will be the future religion of thinking humanity. No doubt of that. And of all the sects, they alone shall gain the day who are able to show most character in their lives, no matter how far they may be.

Let me tell you a little personal experience. When my Master left the body, we were a dozen penniless and unknown young men. Against us were a hundred powerful organisations, struggling hard to nip us in the bud. But Ramakrishna had given us one great gift, the desire, and the lifelong struggle not to talk alone, but to lize the life. And today all India knows and reverences the Master, and the truths he taught are apreading like wild fire. Ten years ago I could not get a hundred persons together to celebrate his birthday anniversary. Last year there were fifty thousand.

Neither numbers nor powers nor wealth nor learning nor eloquence por anything else will preval, but putty, lioing the tile, in one word, anubhati, realisation. Let there be a dozen such lion-souls in each country, lions who have broken their own bonds, who have touched the Infinite, whose whole soul is gone to Brahman, who care neither for wealth nor power nor fame, and these will be enough to shake the world.

Here lies the secret. Says Patanjali, the father of Yoga, "When a man rejects all the superhuman powers, then he attains to the cloud of virtue." He sees God. He becomes God and helps others to become the same. This is all I have to preach. Doctures have been expounded enough. There are books by the million. Oh, for an ounce of practice!

As to acciseites and organisations, these will come of themselves. Can there be jealously where there is nothing to be jealous of? The names of those who will wish to injure us will be legion. But a not that the surest size of our having the truth? The more I have been opposed, the more my energy has always found expression. I have been driven and worshipped by princes. I have been slandered by priests and laymen alike. But what of it? Bless them all? They are my very Self, and have they not helped me by acting as a spring-board from which my energy could take higher and higher flights?

... I have discovered one great secret.—I have nothing to first from talkers of religion. And the great ones who realise—they become enemies to none! Let talkers talk! They know no better! Let them have thur fill of name and fame and money and woman. Hold we on to realisation, to being Brahman, to becoming Brahman. Let us hold on to truth unto death, and from life to life. Let us not pay the least attention to what others say, and if, after a literime's effort, one soul, only one, can break the fetters of the world and be free, see have done our work. Hairl On!

. . One word more. Doubtless I do love India. But every day my sight grows clearer. What is India, or England, or America to us? We are the servants of that God who by the ignorant is called MAN. He who pours water at the root, does he not water the whole tree?

A thousand pardons for not promptly writing to you. I arrive eafe in London. Found my friend and am all right in his home. It is beautiful. His wife is surely an angel, and his life is full of India. He has been years there—mixing with the Sannyasins, eating their food, etc., etc., is you see I am very happy. I found already several retired Generals from India; they were very civil and polite to me. That wonderful knowledge of the Americans that identify every black man with the negro is emirely absent here, and nobody even starse at me in the street.

I am very much more at home here than anywhere out of India. The English people know us, we know them. The etandard of education and civilization is very high here—that makes a great change, so does the education of many generations.

Have the Turtle-doves returned? The Lord bless them and theirs for ever and ever. Flow are the babies— Alberta and Holister? Give them my oceans of love and know it yourself.

My friend being a Sanakrit scholar, we are busy working on the great commentariee of Shankara etc. Nothing but philosophy and religion here, Joe Joe I are going to try to get up classes in October in London.

80 OAKLEY ST., CHELSEA, 31st October, 1895, 5 P.M.

DEAR FRIEND,

Just now two young gentlemen, Mr. Silverlock and his friend, left. Miss Müller also came this afternoon and left just when these gentlemen came in.

One is an Engineer and the other is in the grain trade. They have read a good deal of modern philosophy and aclence and have been much struck by the similarity with the latest conclusions of both with the ancient Handu thought. They are very fine, intelligent, and educated men. One has given up the Church, the other asked me whether he should or not. Now, two things struck me after this interview. First, we must hurry the book through. We will touch a class thereby who are philosophically religious without the least mystery-mongening. Second, both of them want to know the rituals of my creed! This opened my eyes. The world in general must have some form. In fact, in the ordinary sense religion is philosophy concretised through rituals and symbols.

It is absolutely necessary to form some ritual and have a Church. That is to say, we must fix on some ritual as fast as we can. If you can come Saturday moming or sooner, we shall go to the Asiatic Society library or you can procure for me a book which is called Hemādri Kosha, from which we can get what we want, and kindly bring the Upanishads. We will fix something grand, from birth to death of a man A mere loose system of philosophy gets no hold on mankind.

If we can get it through, before we have finished the classes, and publish it by publicly holding a service or two under it, it will go on. They want to form a congregation, and they want total; that is one of the causes why—will never have a hold on Western people

The Ethical Society has sent me another letter thanking me for the acceptance of this offer. Also a copy of their forms. They want me to bring with me a book from which to read for ten minutes. Will you bring the Gita (translation) and the Buddhist Jätaks (translation) with you?

I would not do anything in this matter without seeing you first.

Yours with love and blessings, VIVEKANANDA.

### BLESSED AND BELOVED.

So far the journey has been very beautiful. The purser has been very kind to me and gave me a cabin to myself. The only difficulty is the food—meat, meat, meat. Today they have promised to give me some vegetables.

We are standing at anchor now. The fog is too thick to allow the ship to proceed. So I take this opportunity to write a few letters.

It is a queer fog almost impenetrable though the sun is shining bright and cheerful. Kiss baby for me and with love and blessings for you and Mrs. Sturdy.

The work here is going on splendidly. I have been writing incessantly at two classes a day since my artival. Tomorrow I go out of town with Mr. Leggelf for a week's holiday. Did you know Madame Antoinette Sterling, one of your greatest singers? She is very much interested in the work.

I have made ever all the secular part of the work to a committee and am free from all that botheration. I have no sptitude for organising. It nearly breaks me to bieces.

... What about the Navado-Sutra? There will be a good sale of the book here, I am sue. I have now taken up the Yoga-Sutrus, and take them up one by one and go through all the commentators along with them. These takes are all taken down, and when completed will form the fullest annotated translation of Patanjali in English. Of course it will be rather a by work

At Trübner's I think there is an edition of Kurma Purdna. The commentator, Vijañan Bhikshu, is continually quoting from that book. I have never seen the book myself. Will you kindly find time to go and see if in it there are some chapters on Yoga? If so, will you kindly send me a copy? Also of the Hather Yoga. Mirror that Swami Krishnananda is coming over England. If that is so, he is the strongest man that I can get.

The clares I had here were mi in the week, bend n question clars. The general attendance varies betwee 70 to 120 Besudes every Sunday I have a public lectur. The last month my lectures were in a small hall holdin about 600, But 900 will soome as a rule, 300 standin and about 300 going off, not finding room. This wee therefore I have a bigger hall, with a capacity of holdin 1200 people.

There is no admission charged in these lectures, but collection covers the tent. The newspapers have take me up this week, and altogether I have stirred up Net York considerably this year. If I could have remainshere this summer and organised a summer place, the work would be going on sure foundations here. But at I intended to come over in May to England, I shall have I leave it unfinished. If, however, Krishnanands comes to England, and you find him strong and able, and if you find the work in London will not be burt by my absence

this summer. I would rather be here this summer,

Again I am afraid my health is breaking down under contant work. I want some rest. We are so unused to these Western methods, especially the keeping to time. I will leave you to decide all these. The Brahmandhin is going on here very satisfactorily. I have begun to write articles on Bhakit : also send them a monthly account of the work. Miss Müller wants to come to America. I do not know whether she will or not. Some friends here are publishing my Sunday lectures. I have sent you a few copies of the first one. I shall send you next mail a few of the next two lectures, and if you like them I shall ask them to send you a number. Can you manage to get a few hundred copies sold in England? That will encourage them in publishing the subsequent ones.

Next month I go to Detroit, then to Boston, and Harvard University. Then I shall have a rest, and then I come to England, unless you think that things go on without me and with Krishnananda.

Ever yours with love and blessings.

DEAR SHARAT,

Your letter only made me sad. I see you have lost all enthusiasm. I know all of you, your powers and your limitations I would not have called you to any task which you are incompetent to do. The only task I would have given you was to teach elementary Sansknt, and with the help of dictionaries and other things assist S in his translations and teachings. I would have moulded you to it. Any one could have done as well-only a little smattering of Sanskrit was absolutely necessary. Well. everything is for the best. If it is the Lord's work the right man for the right place will be forthcoming in the right time None of you need feel disturbed. As for Sanval, I don't care who takes money or not, but I have a strong hatred for child-marriage. I have suffered terribly from it, and it is the great sin for which our nation has to suffer. As such I would hate myself if I help such a diabolical custom directly or indirectly. I wrote to you pretty plain about it, and Sanval had no right to play a hoax upon me about his "law-suit" and his attempts to

become free. I am sorry for his playing tricks on me who have never done him any harm. This is the world What good you do goes for nothing, but if you stop doing it. then. Lord help you, you are counted as a rogue. Im't it? Emotional natures like mine are always preyed upon by relatives and friends. This world is merciless. This world is our friend when we are its slaves and no more. This world is broad enough for me. There will always be a corner found for me somewhere. If the people of India do not like me, there will be others who do. I must set my foot to the best of my ability upon this devilish custom of child-marriage. No blame will entail on you. You keep at a safe distance, if you are afraid. I am sorry, very sorry, I cannot have any partnership with such doings as getting husbands for babies. Lord help me, I never had and never will have. Think of the case of-Babu! Did you ever meet a more cowardly or brutal one than that? I can kill the man who gets a husband for a baby. The upshot of the whole thing is-I want bold, daring, adventurous spirits to help me. Else I will work alone. I have a mission to fulfil. I will work it out alone. I do not care who comes or who goes. Sanyal is already done for by Samsara. Beware, boy! That was all the advice I thought it my duty to give you. Of course you are great folks now-my words will have no value with you. But I hope the time will come when you will see clearer, know better, and think other thoughts than you are now doing.

Good-bye! I would not bother you any more, and all lessings go with you all. I am very glad I have been of some service to you sometimes if you think so. At least I am pleased with myself for having fined my beet to discharge the duties laid on me by my Guru, and well done or ill, I am glad that I tried. So good-bye. Tell "I that I am not at all angry with him, but I am sorty. It is not the money—that counts nothing—

but the violation of a principle that pained me, and the trick he played on me. Good-bye to him also, and to you all. One chapter of my life is closed. Let others come in their due order. They will find me ready. You need not disturb yourselves at all about me. I want no help from any human being m any country. So good-bye! May the Lord bless you all for ever and ever

The other, to whom India is the holy land, its very air is holy. And they try to out-Herod Herod in their Hinduism. They are awful vecetarians, and they want to form a caste in England Of course the majority of the English people are firm believers in caste. I had eight classes a week spart from public lectures, and they were so crowded that a good many people, even ladies of high rank, sat on the floor and did not think anything of it In England I find strong-minded men and women to take up the work and carry it forward with the neculiar English grip and energy. This year my work in New York is going on splendidly Mr Leggett is a very rich man of New York and very much interested in me. The New Yorker has more steadiness than any other people in this country, so I have determined to make my centre here. In this country my teachings are thought to be queer by the "Methodist" and "Preabyterian" aristocracy. In England it is the highest philosophy to the Envlish Church aristocracy.

Moreover those talks and goesips so characteristic of the American woman are almost unknown in England. The English woman is alow that when she works up to an idea, she will have a hold on it sure; and they are regularly carrying on my work there and sending every week a report—think of that! BLESSED AND BELOVED

Many many thanks for the books. The Sankhy Karika is a very good book, and the Kurma Purana though I do not find in it all I expected, has a few verse on Yoga. The words dropped in my last letter were "Yoga-Sutra", which I am translating with notes from various authorities. I want to incorporate the chapter in Kurma Purana in my notes. I have very enthusiastic accounts of your classes from Miss MacLeod. Mr. Galsworthy seems to be very much interested now.

I have begun my Sunday lectures here and also the classes. Both are very enthusiastically received. I make them all free and take up a collection to pay the hall etc. Last Sunday's lecture was very much appreciated and is in the press. I shall send you a few copies next week. It was the outline of our work.

As my friends have a stenographer (Goodwin) encared, all these class lessons and public lectures are taken down. I intend to send you a copy of each. They

may suggest you some ideas.

My great want here is a strong man like you, possessing intellect, and ability, and love. In this nation of universal education, all seem to melt down into a mediocrity, and the few able are weighed down by the eternal money-making.

I have a chance of getting a piece of land in the country, and some buildings on it, plenty of trees and a river, to serve as a summer meditation resort. That of course requires a committee to look after it in my absence, also the handling of money and printing and other I have separated myself entirely from money questions, yet without it the movement cannot go on. So necessarily I have to make over everything executive to a committee, which will look after these things in my absence. Steady work is not in the line of the Americans. The only way they work is in a herd. So let them have it. As to the teaching part, my friends well go over this country from place to place, each one independent, and let them form independent circles. That is the easiest way to spread. Then, when there will be sufficient strength, we shall have yearly gatherings to concentrate our energies.

The books and pamphlets here have been got up this way. A committee was formed in New York. They paid all the expenses of stenographing and punting on condition the books will belong to them. So these pamphlets and books are theirs. One book, the Korma-Yogo has been already published; the Roje-Yoga, a much bigger one, is in the course of publication; the Inana-Yoga may be published later on. BLESSED AND BELOVED.

I received your last just now and it frightened me immensely.

The lectures were delivered under the auspices of certain friends who paid for the stenography and all other expenses on condition they alone will have the right to publish them. As such they have already published the Sunday lectures as well as three books on "Karma-Yoga", "Raja-Yoga" and "Inana-Yoga", The Raja-Yoga especially has been much altered and rearranged along with the translation of "Yoga-Sutras of Patanjali". The Raja-Yoga is in the hands of Longmans. The friends here are furious at the idea of these books being published in England; and as they have been made over to them by me legally, I am at a loss what to do. The publication of the pamphlets was not so serious, but the books have been so much re-arranged and changed that the American edition will not recognise the English one. Now pray don't publish these books as they will place me in a very false position and create endless quarrel and deatroy my American work.

By last mail from India I learn that a Sannyasin has started from India I had a beautiful letter from Miss MacLeod: the Leggett family has become very attached to me.

I do not know anything about Mr. Chatterji. I hear rom other sources that his trouble is money, which the Theosophists cannot supply him with Moreover the help te will be able to give me is very rudimentary and usess in the face of the fact of a much stronger man coming from India. So far with him. We need not be in a hurry.

I pray you again to think about this publishing business and write some letters to Mrs Ole Bull and through her ask the opinion of the American friends of the Vedanta, remembering "ours is the Gospel of oneness of all beings" and all national feelings are but vicked superstitions. HIGH VIEW, READING, 20th April, 1896.

DEAR SISTERS.

Greetings to you from the other shore. The voyage has been pleasant and no sickness this time. I gave myself treatment to avoid it. I made quite a little run through Ireland and some of the old English towns and now am once more in Reading amidst Behma and Mays and Jiva, the individual and the universal soul, etc. The other monk is here. he is one of the nicest of men I see, and is quite a learned monk too. We are busy editing books now. Nothing of importance happened on the way. It was dull, monotonous, and presaic as my life. I love America more when I am out of it. And, after all, those years there have been some of the best I have yet seen.

Are you trying to get some subscribers for the Brohmauadin? Give my best love and kindest remembrance to Mrs. Adams and Mrs. Conger. Write me as soon as is convenient all about yourselves, and what you are doing, what breaks the monotony of eating, drinking, and cycling 1 am in a hurry just now, ahall write a bigger letter later; so good-bye and may you be always happy.

Your ever affectionate brother,

PS. I will write to Mother Church as soon as I get time. Give my love to Sam and sister Locke.

PS. Mr. Howe has been a very constant stude except the last few days. Kindly give my love to M Howe.

#### DEAR STURDY.

I forgot to tell you in the morning that Prof. Max Müller also offered in his letter to me to do everything he could if I went to lecture at Oxford.

> Yours affectionately. VIVEKANANDI.

PS. Have you written for the Atharva-Veda Samhita edited by Shankara Pandurang? ٧. number. Have you read it? He asked my onlinion about it. Not having seen it yet, I can't write anything to him. If you have it, kindly send it to me. Also The Brahmacadan, if any have arrived. Max Müller wants to know about our plans. . and sgain about the magazine. He promises a good deal of help and is ready to write a book on Shri Ramakrishna Parsmahamsa.

I think it is better that you should directly correspond within about the magazine etc. You will see from his letter which I shall send you as soon as I have replied (after reading The XIX Century) that he is very much pleased with our movement and is ready to help it as much as he can

Yours with blessings and love,

PS. I hope you will consider well the plan for the big magazine. Some money can be raised in America, and we can keep the magazine all to ourselves at the same time. I intend to write to America on hearing about the plan you and Prof. Max Milller decide upon. "A great tree is to be taken refuge in, when it has both fruits and shade. If, however, we do not get the fruit who prevents our enjoyment of the shade?" So ought great attempts to be made, is the moral.

To Mr. E. T. Sturdy

SWITZERLAND, 5th August, 1896.

BLESSED AND BELOVED,

A letter came this morning from Prof. Max Müller that the article on Shri Ramakrishna Paramas been published in The XIX Century August desiring what, or for whose desire, shall you suffer misery about the body?" (Brihadāranyaka, IV. iv. 12)

I feel as if I had my share of experience, in what they call "work". I am finished, I am longing now to get out. "Our of thousands, but one strives to attain the Goal. And even of those who struggle hard, but few ratin; for the senses are powerful, they drag men down "

"A good world", "a happy world", and 'social progress", are all terms equally intelligible with "hot ice" or "dark light". If it were good, it would not be the world. The soul foolishly thinks of manifesting the Infinite in finite matter, Intelligence through gross particles; but at last it finds out its error and tries to escape. This going-back is the beginning of religion. and its method, destruction of self, that is, love. Not love for wife or child or anybody else, but love for everything else except this little self. Never be deluded by the tall talk, of which you will hear so much in America. about "human progress" and such stuff. There is no progress without corresponding digression. In one society there is one set of evils : m another, another So with periods of history. In the Middle Ages, there were more robbers, now more cheats. At one period there is less idea of marned life; at another, more prostitution. In one, more physical agony; in another, a thousandfold more mental. So with knowledge Did not gravitation already exist in nature before it was observed and named? Then what difference does at make to know that it exists? Are you happier than the Red Indians?

The only knowledge that is of any value is to know that all this is humbug. But few, very few, will ever know this. "Know the Atman alone, and give up all other vain words." This is the only knowledge we gain from all this knocking about the universe. This is the only work, to call upon mankind to "Awake, arise, and 382

As for hurting me, that is not in the power of gods or devils. So be at rest. It is unswerving love and perfect unselfishness that conquer everything. We Vedantists in every difficulty ought to ask the subjective question. "Why do I see that?" "Why can I not conquer this with love."

I am very glad at the reception the Swami has met with, also at the good work he is doing. Great work requires great and persistent effort for a long time. Neither need we trouble ourselves if a few fail. It is the nature of things that many should fail, that robbes should come, that tremendous difficulties should arise, that selfishness and all the other devils in the human heart should struggle hard, when they are about to be driven out by the fire of spirituality. The road to the Good is the roughest and steepest in the universe. It is a wonder that so many succeed, no wonder that so many fall. Character has to be established through a thousand stumbles.

I am much refreshed now. I look out of the window are the huge glaciers just before me and feel that I am in the Himaleyas. I am quite calm. My nerves have regained their accustomed strength; and little vezation. like those you write of, do not touch me at all. How shall I be disturbed by this child's play? The whole wold is a mere child's play—preaching, teaching, and all included. "Know him to be the Sannyain who neither hates nor desires." And what is there to be desired in this little mud-puddle of a world, with its ever-recurring misery, disease, and death? "He who has given up all desires, he alone is hapour."

This rest, eternal, peaceful rest, I am catching a glimpse of now in this beautiful spot. "Having once known that the Atman alone, and nothing else, exists.

A large packet of letters came along with yours. Herewith I send you the letter written to me by Max Müller. It is very kind and good of him.

Miss Müller thinks that she will go away very soon to England. In that case I will not be able to go to Berne for that Purity Congress I have promised Only if the Saviers consent to take me along. I will go to Kiel and write to you before. Miss Müller telegraphed to Prof. Deussen last night; the reply came this morning, 9th August, welcoming me stop not till the goal is reached." It is renunciation Tyaga, that is meant by religion, and nothing else.

Ishwara is the sum total of individuals; yet He Himself also is an individual in the same way as the human body is a unit. of which each cell is an individual Samashti, or the Collective, is God. Vyashti, or the component, is the soul or Jiva. The existence of Ishwara, therefore, depends on that of Jiva, as the body on the cell, and vice versa. Jiva and Ishwara are co-existent beings. As long as the one exists, the other also must. Again, since in all the higher spheres, except on our earth, the amount of good is vastly in excess of the amount of bad, the sum total, or lahwara, may be said to be All-good. Almighty, and Omniscient. These are obvious qualities, and need no argument to prove, from the very fact of totality.

Brahman is beyond both of these, and is not a state. It is the only unit not composed of many units. It is the principle which runs through all, from a cell to God, and without which nothing can exist. Whatever is real is that principle or Brahman. When I think "I am Brahman", then I alone exist. It is so also when you so think, and so on. Each one is the whole of that principle. ...

A few days ago, I felt a sudden inesistible desite to write to Kripannada. Perhaps he was unhappy and thinking of me. So I wrote him a warm letter. Today from the American news, I see why it was so. I sent him flowers gathered near the glaciers. Ask Miss Waldo to send him some money and plenty of love. Love never dies. The love of the father never dies, whatever the children may do or be. He is my child. He has the same or more share in my love and help, now that he is in misery.

Yours with blessings.

# Dear---,

Be you holy end, above all, sincere and do not for a moment give up your trust in the Lord and you will ese the light. Whetever is truth will remain for ever; whatever is not, none can preserve. We are helped in being born in a time when everything is quickly searched out. Whatever others think or do, lower not your etandard of purity, morality and love of God; above all, beware of ill secret organisations. No one who loves God need ear any jugglery. Holiness is the highest and divinent yower in earth and in heavers. "Truth alone triumphs tot untruth. Through truth alone is opened the way to Lod." Do not care for a moment who joins hands with out or not, be sure that you touch the hand of the Lord. Bat is enought. . . .

I went to the glacier of Monte Rosa yesterday and athered a few hardy flowers growing almost in the midst f eternal snow. I send you one in this letter hoping that you will attain to a similar spiritual hardihood amidst all

the snow and ice of this earthly life. . . .

Your dream was very, very beautiful. In dream our souls read a layer of our mind which we do not read in our waking hours, and however unsubstantial imagination may be, it is behind the imagination that all unknown psychic truths lie. Take heart. We will try to do what we can for the good of humanity—the rest depends upon the Lord. . .

Well, do not be auxious, do not be in a hurry. Slow, persistent and silent work does everything. The Lord is great. We will succeed, my boy. We must. Blessed be His name!

Here in America are no Ashramas. Would there was one! How would I like it and what an amount of good it would do to this country!

## To Mass Mary Hale

AIRLIE LODGE, RIDGEWAY GARDENS, WIMBLEDON, ENGLAND, 17th September, 1896.

## DEAR SISTER,

Today I reached London, after my two months of climbing and walking and glacier sceing in Switzerland. One good it has done me—a few pounds of unnecessary adipose tissue have setumed back to the gaseous state. Well, there is no sefety even in that, for the solid body of this birth has taken a fancy to outstrip the mund towards infinite expansion. If it goes on this way I would have soon to lose all personal identity even in the flesh as least to all the rest of the world.

It is impossible to express my joy in words at the good news contained in Harrier's letter. I have written to her today. I am sorty I cannot come over to tee her matried, but I will be present in "fine body" with all good wishes and blessings. Well, I am expecting such news from you and the other sisten to make my joy complete. Now, my dear Mary, I will tell you a great lesson I have learnt in this life. It is thus: "The higher is your ideal, the more miserable you are:" for such a thing as an ideal carmot be attained in the world, or in this life even. He who wants perfection in the world is a madman, for it cannot be.

How can you find the Infinite in the finite? Therelore I tell you, Harriet will have a most blessed and happy life, because she is not so imaginative and senimental as to make a fool of herself. She has enough of sentiment as to make life sweet, and enough of common sense and gentleness as to soften the hard points in 390

life which must come to everyone. So has Hartiet McKindley in a still higher degree. She is just the gift to make the best of wives, only this world is so full of idiots that very few can penetrate beyond the flesh! As for you and Isabelle, I will tell you the truth and my "language is palan".

You, Mary, are like a mettlesome Arab-grand, splendid. You will make a splendid queen-physically. mentally. You will shine alongside of a dashing, bold. adventurous, heroic husband : but, my dear sister, you will make one of the worst of wives. You will take the life out of our ensy-going, practical, plodding husbands of the everyday world. Mind, my sister, although it is true that there is more romance in actual life than in any novel, yet it is few and far between. Therefore my sovice to you is that until you bring down your ideals to a more practical level, you ought not to marry if you do, the result will be misery for both of you. In a few months you will lose all regard for a commonplace, good, nice. young man, and then life will become insipid. As to sister Isabelle, she has the same temperament as you? only this kindergarten has taught her a good lesson of patience and forbearance. Perhaps she will make s good wife.

There are two sorts of persons in the world. The one—strong-nerved, quiet, yielding to nature, not given to much imagination, yet good, kind, sweet, etc. For such is this world; they alone are born to be happy. There are others again with high-strung nerves, tremendously imaginative, with intense feeling, always going high one moment and coming down the next. For them there is no happiness. The first class will have almost an even tenor of happiness; the last will have to run between centary and misery. But of these slone what we call geniuse are made. There is some truth in the recent theory that "genius is a sort of madness".

Now persons of this class if they want to be great. they must fight to finish-clear out the deck for battle No encumbrance—no marmage, no children, no undue attachment to anything except the one idea, and live and die for that, I am a person of this sort, I have taken up the one idea of "Vedanta" and I have "cleared the deck for action". You and Isabelle are made of this metal; but let me tell you, though it is hard, you are spoiling your lives in pain. Either take up one idea, clear the deck and to it dedicate the life; or be contented and practical - lower the ideal, marry, and have a honou life Either "Bhoga" or "Yoga" -either enjoy this life, or give un and be a Yogi; none can have both in one. Now ot never, select quick. "He who is very particular gets nothing," says the proverb Now sincerely and really and for ever determine to "clear the deck for fight", take up anything, philosophy or science or religion or literature, and let that he your God for the rest of your life Achieve happiness or achieve greatness. I have no sympathy with you and isabelle; you are peither for this nor for that, I wish to see you happy, as Harriet has well chosen, or great Eating, drinking, dressing, and society nonsense are not things to throw a life uponespecially you. Mary. You are rusting away a splendid brain and abilities, for which there is not the least excuse You must have ambition to be great I know you will take these tather harsh temarks from me in the right sourit knowing I like you really as much or more than what I call you, my sisters. I had long had a mind to tell you this and as experience is gathering I feel like telling you The joyful news from Harrier urred me to tell you this. will be overloyed to hear that you are married also and tappy, so far as happiness can be had here, or would like o hear of you as doing great deeds.

I had a pleasant visit with Prof. Deussen in Germany. sm sure you have heard of him as the greatest kving

So very kind of you to send Mabel's letter-good news indeed. Only I am a little sorry for poor Fox. However Mabel escaped him, that is better.

You did not write anything about how things are going on in New York. I hope it is all well there. Poor Cole I is he able now to make a bring?

The coming of Goodwin was very opportune as it captured the lectures here which are being published in a periodical form. Already there have been subscribers enough to cover the expenses.

Three lectures next week and my London work is finished for this season. Of course everybody here thinks it foolish to give it up just now the "boom" is on, but the Dear Lord says. "Start for Old India". I obey

As you see, by this time I am on my way. Before leaving London I got your letter and the pamphlet. Take no heed of M—'s madness. He surely has gone crazy with jealousy. Such foul language as he has used would only make people laugh at him in a civilised country. He has defeated his purpose by the use of such vulgar worth.

All the same, we ought not to allow Hara Mohan or any one else to go and fight B- and others in our

name. The public must know that we have no quarted with any sect, and if anybody provokes a quarted he is doing it on his own responsibility. Quartelling and abusing each other are our national traits. Lazy, useless, vulgar, jealous, cowardly, and quartelsome, that is what we are. Bengalis. Any one who wants to be my friend must give up these. Neither do you allow Hara Mohan to print any book, because such printing as he does is only cheating the nublic.

DAMPFER, "PRINZ-RECENT LEOPCAD"

3rd January, 1897.

DEAR MARY.

I received your letter forwarded from London in Rome. It was very very kind of you to write such a beautiful letter, and I enjoyed every bit of it. I do not know anything about the evolution of the orchestra in Europe. We see nearing Fort Said after four days of frightfully bad sailing from Naples The ship is rolling as hard as she can, and you must pardon my acrawls under such circumstances.

From Suez begins Asia. Once more Asia. What am 12 Asiatic, European, or American? I feel a curious medley of personslities in me. You didn't write anything about Dharmapala, his goings and doings. I am much more interested in him than in Gaedhi.

I land in a few days at Colombo and mean to "do" Ceylon a bit, There was a time when Ceylon had more than 20 million inhabitants and a huge capital of which the ruins cover nearly a hundred source miles!

The Ceylonese are not Dravidians but pure Aryans It was colonised from Bengal about 800 B.C. and they have kept a very clear history of their country from that time. It was the greatest trade centre of the ancient world, and Anuradhapura was the London of the ancients.

all enjoyed Rome more than anything in the West, and feltr seeing Pompeii I have lost all regard for the so-called "Modern Cribiastion." With the exception of steam and electricity they had everything else and infinitely more art conceptions and executions than the Moderns.

Please tell Miss Locke that I was mistaken when I told her that sculpturing of the human figure was not developed in India as among the Greeks. I am reading in Fergusson and other authorities that in Orisas or Jagan suth, which I did not visit, there are among the ruins human figures which for beauty and anatomical skill would compase with any production of the Greeks There is a colosial figure of Death, a huge female akeleton covered with a shiveled skin-the avrial fidelity to anatomical.

VIII-26

details are frightening and disgusting. Says my author, one of the female figures in the niche is exactly like the Venus de Medici and so on. But you must remember that everything almost has been destroyed by the iconclastic Molammedan, yet the remnants are more than all European debris put together! I have travelled eight years and not seen many of the masterpieces.

Tell Sister Locke also that there is a ruined temple in a forest in India which and the Parthenon of Greece Fergusson considers as the climax of architectural arteach of its type—the one of conception, the other of conception and detail. The later Mogul buildings etc., the Indo-Saracenic architecture, does not compare a bit with the best types of the ancients.

With all my love, VIVEKANANDA.

DARJETLING, 20th April, 1897.

DEAR SHASHI,

All of you have doubtless reached Madras by this time. I should think Biligin is certainly taking great care of you and that Sadananda serves you as your attendant In Madras the worship should be done in a completely Statute manner, without a trace of Rajas in it. I hope Alasinea has by now returned to Madras Don't enter into wrangles with anybody-always maintain a calm attitude. For the present let the worship of Shri Rama. krishna be established and continued in the house of Biligini, But see that the worship does not become very elaborate and fong. Time thus saved should be utilised in holding classes and doing some preaching. It is good to initiate as many as you can. Supervise the work of the two paners, and help in whatever way you can Biligiri has two widowed daughters. Kindly educate them and make special efforts that through them more such widowed women get a thorough grounding in their own religion, and learn a little English and Sanskrit. But all this work should be done from a distance. One has to be exceedingly careful before young women. Once you fall, there is no way out, and the ain is unpardonable.

I am very sorry to hear that Gupta was bitten by a dog. but I hear that the dog was not a mad one, so there is no cause for alarm. In any case, see that he takes the medicine sent by Generalbar.

Larly morning, finish duly your worship and other thirds kriefly, and calling together filligrif with his family, read before them the Gut and other sacred books. There is not the least necessity for teaching the divine Love of Rådhå and Krishna. Teach them pure devotion to Sia Räm and Hara Pärvati. See that no mistake is made in this respect. Remember that the episodes of the divine relationship between Radha and Krishna are quite unsuitable los young minds. Specially Bligiri and other followers of Ramamapacharya are worthippers of Rama; so see in it that their innate attitude of pure devotion is never disturbed.

In the evening give some spiritual teaching like that to the general public. Thus gradually "even the mountain is excessed."

See that an atmosphere of perfect purity is always matchined, and that there enters not the alightest trace of Vamachara. For the test, the Lord Humself will guide you, there is no fear. Give to Bligiri my respectful salutations and loving greetings and convey my salutations to similar devoters.

My illness is now much fess—it may even be cured completely, if the Lord wills. My love, blessings, and greetings to you,

Yours affectionately.

PS. Please tender my specially affectionate greetings and blessings to Dr. Nanjunda Rao and help him as much as you can. Try your best to particularly encourage the study of Sanskrit among the non-Brahmins.

ALAMBAZAR MATH, CALCUTTA, 5th May, 1897.

MY DEAR MISS NOBLE,

Your very very kind, loving, and encouraging letter gave me more attength than you think of.

There are moments when one feels entirely despondent no doubt—especially when one has worked towards an ideal during a whole life's time and just when there is a bit of hope of seeing it partially accomplished, there comes a tremendous thwarting blow. I do not care for the disease, but what depresses me is that my ideals have not had yet the least opportunity of being worked out. And you know the difficulty is money.

The Hindus are making processions and all that, but the cannot give money. The only help 1 got in the world was in England, from Miss M., and Mr. S., . . . 1 thought there that a thousand pounds was sufficient to start at least the principal centre in Calcutta, but my calculation was from the experience of Calcuta ten or twelve years ago. Since then the prices have gone up three or four times.

The work has been started anylow. A rickety old little house has been remed for six or seven shillings where about twenty-four young men are being trained. I had to go to Darjeeling for a month to recover my health, and I am glad to tell you I am very much better, and would you believe it, without taking any medicine only by the exercise of mental healing? I am going again to another hill stafon tomorrow, as it is very hot in the plains. Your society is still living, I am sure. I will send you a report at least every month of the work done here. The London work is not doing well at all. I hear.

and that was the main reason why I would not come to England just now, although some of our Rajās going for the Jubilee tried their beat to get me with them, as I would have to work hard again to revive the interest in Vedanta. And that would mean a good deal more trouble physically.

I may come over for a month or so very soon however. Only if I could see my work started here, how gladly and freely would I travel about.

So far about work. Now about you personally. Such love and faith and devotion and appreciation like yours, dear Miss Noble, repays a hundred times over any amount of labour one undergoes in this life. May all blessings be yours. My whole life is at your service, as we may say in our mother tongue.

It never was and never will be anything but very very welcome, any letters from you and other friends in England. Mr. and Mrs. Hammond wrote two very kind and nice letters and Mr. Hammond a beautiful poem in The Brahmavadin, although I did not deserve it a bit. I will write to you again from the Himslayas, where thought will be clear in sight of the snows and the nevers more settled than in this burning platins. Miss Muller is already in Almora. Mr. and Mrs. Sevier go to Simla. They have been in Darjeeling so long. So things come and go, dar friend. Only the Lord is unchangeable and He is Lore. May He make your heart His eternal habitation is the constant traver of

ALMORA. 20th May, 1897.

"I'Y DEAR RAKHAL,

From your letter I got all the important news. I got

a letter from Sudhir also and also one from Master Mahashay, I have also got two letters from Nityananda (Yogen Chatterjee) from the famine areas.

Even now money is floating on the waters, as it were but it will surely come. When it comes, buildings, land, and a permanent fund-everything will come all right. But one can never rest assured until the chickens are hatched; and I am not now going down to the hot plains within two or three months. After that I shall make a tour and shall certainly secure some money. This being so, if you think that the [land with a] frontage of eight Kathas cannot be acquired . . . there is no harm in paying the earnest money to the middle-man vendor as though you were losing it for nothing. In all these matters use your own discretion. I cannot give any further advice. There is particularly a chance of making mistake through hurry. . . . Tell Master Mahashay that I quite

Write to Gangadhar that if he finds it difficult to get alms etc. there, he should feed himself by spending from his own pocket, and that he should publish a weekly letter in Upen's paper (The Vasumati). In that case others also may help.

approve of what he had said.

I understand from a letter of Shashi . . . he wants Nirbhayananda. If you think this course to be the best. then send Nirbhavananda and bring back Gupta. . . . Send Sashi a copy of the Bengali Rules and Regulations of the Math or an English version of it, and write to him to see that the work there is done in accordance with the Rules and Regulations.

I am glad to learn that the Association in Calcutta is going on nicely. It does not matter if one or two keep out. Gradually everyone will come. Be friendly and sympathetic with everybody. Sweet words are heard afar; it is particularly necessary to try and make new people come. We want more and more new members.

Yogen is doing well. On account of the great heat in Almora. I am now in an excellent garden twenty miles from there. This place is comparatively cooler, but still warm. The heat does not seem to be particularly less than that of Calcutta.

402

The feverishness is all gone. I am trying to go to a still cooler place. Heat or the fatigue of walking I find at once produces trouble of the liver. The air here is so dry that there is a burning sensation in the nose all the time, and the tongue becomes, as it were, a chip of wood. Don't criticise any more : otherwise I would have happily gone to a colder place by this time. "... constantly neglects diet restrictions"-what rot do you talk? Do you really listen to the words of these fools? It is just like your not allowing me to take Kalāi-dal (black pulses), because it contains starch! And what is more—there will be no starch if rice and Roti (bread) are eaten after frying them? What wonderful knowledge, my dear. The fact of the matter is my old nature is coming back-this I am seeing clearly. In this part of the country now all illness takes on the colour and fashion of this locality, and in that part of the country it takes on the colour and fathion of the illnesses in that locality. I am thinking of making my meals at night very light; I shall eat to the full in the morning and at noon; at night milk, fruits, etc. That is why I am staying in this orchard, "in expectation of fruits!" Don't you see?

Now don't be alarmed. Does a companion of Shira dis so quickly? Just now the evening lamp has been lighted, and singing has to be done throughout the whole night. Nowadays my temper also is not very intuble, and feverishness is all due to the livert—see this cleative. Well, I shall make that also come under control—what fear? . Bravely brace yourself up and do work; let us create a mighty commotion.

Tender try love to all at the Math. At the next

meeting of the Association give my greetings to everybody and tell them that though I am not physically present there, yet my spirit is where the name of our Lord is sung—"वाचान कवा राम समारिवार्ड मेहिनीम्", that is, "O Rams, so long as the story of your life goes the round on the earth"—because, you see, the Atman is omnipresent.

Yours affectionately,

DEAR MOHEM,

Your letter gave me much pleasure. One thing, perhaps, I forget to tell you—to keep a copy of the letter you sent me. Also all important communications to the Math from different persons and to different persons should be copied and preserved.

I am very glad to learn that things are going on well, that the work there is steadily progressing as well as that of Calcutta.

I am all right now except for the fatigue of the travel which I am sure will go off in a few days My love and blessings to you all.

DEAR MARIE.

I begin here my promised big chatty letter with the best intention as to its growth, and if it fails it will be

owing to your own Karma. I am sure you are enjoying splendid health. I have been very, very bad indeed; now recovering a bit—hope to recover very soon.

What about the work in London? I am afraid it is going to pieces. Do you now and then visit London? Hasn't Sturdy got a new baby?

The plains of India are blazing now. I cannot bear it. So I am here in this hill station—a bit cooler than the plains.

I am living in a beautiful garden belonging to a merchant of Almora—a garden abutting several miles of mountains and forests. Night before last a leopard came here and took away a goat from the flock kept in the barking of the big Tibet watchdegs. These dogs are kept chained at a distance all night since I am here. For that they may not disturb my sleep with their deep barks. The leopard thus found his opportunity and got a decent meal, perhaps, after weeks. May it do much good to him!

Do you remember Miss Müller? She has some here for a few days and was rather frightened when she head of the leopard incident. The demand for tanned skins in London seems very great, and that is playing havoe with our leonards and tiers more than anothing clae.

As I am writing to you, before me, reflecting the afternoon's glow, stand long, long lines of huge snow peaks. They are about twenty miles as the crow fire from here, and forty through the circuitous mountain roads.

I hope your translations have been well received in the Countess's paper. I had a great mind and very good opportunity of coming over to England this Jubilee areason with some of our Princes, but my physicians would not "low-agt to venture into work so soon. For going to

name work, isn't it? No work, no bread.

Here the yellow cloth is sufficient and I would have ood enough. Anyhow I am taking a much desired rest, tope it will do me good.

How are you going on with your work? With joy or sorrow? Don't you like to have a good rest, say for onne years, and no work? Sleep, eat, and exercise, xercise, eat, and sleep— that is what I am going to do ome months yet. Mr. Goodwin is with me. You ought a have seen him in his Indian clothes. I am very son oing to shave his head and make a full-blown monk of im.

Are you still practising some of the Yogas? Do you and any benefit from them? I learn that Mr. Martin ja ad. How is Mrs. Martin—do you see her now and en?

Do you know Miss Noble? Do you ever see her? ere my letter comes to an end, as a buge dust storm is owing over me and it is impossible to write. It is all us Karma, dear Marie, for I intended to write so many nadefull things and tell you such fine stories; but I will ve to keep them for the future, and you will have to tit.

DEAR MISS NOBLE,

. . . Let me tell you plainly. Every word you write due, and every letter is welcome a hundred times. Write whenever you have a mind, and opportunity, and whatever you like, knowing that nothing will be minterpreted, nothing unappreciated. I have not had any news of the work for so long. Can you tell me anything? I do not expect any help Irom India, in spite of all the inbilating over me. They are so poor!

But I have started work in the fashion in which I myself was trained—that is to say, under the trees, and keeping body and soul together anyhow. The plan has also changed a little. I have sent some of my boys to work in the famine districts. It has acted like a miracle. I find, as I always thought, that it is through the heart, and that alone, that the world can be reached. The present plan is, therefore, to train up numbers of young men (from the highest classes, not the lowest. For the latter I shall have to wait a little), and tha first attack will be made by sending a number of them over a district When these sappers and miners of religion have cleared the way, there will then be time enough to put in theory and philosophy.

A number of boys are already in training, but the recent earthquake has destroyed the poor shelter we had to work in, which was only rented, anyway. Never mind. The work must be done without shelter, and under difficulties. . . . As yet it is shaven heads, rags, and casual meals. This must change, however, and will, for are we not working for it, head and heart? . . .

It is mue in one way that the people here have so bill to give up—yet renunciation is in our blood. One of my boys in training has been an executive engineer, in charge of a district. That means a very big position here. He gave it up like straws!...

With all love.

My DEAR MISS NORLE,

I am being played upon cariously by both good and viil influences from London these times here . . . . on he other hand, your letters are full of life and unabline, and bring strength and hope to my spirits, and they sadly vant these now. God knows.

Although I am still in the Himalayas, and shall be usee for at least a month more, I started the work in alcutta before I came, and they write progress every reck.

Just now I am very busy with the famine, and except or training a number of young men for future work, have of been able to put more energy into the teaching work. he "feeding work" is absorbing all my energy and eans. Although we can work only on a very small scale 1 yet, the effect is marvellous. For the first time since to days of Buddha, Brahmin boys are found nursing by the bed-side of cholera-stricken parishs.

In India, lectures and teaching cannot do any good, hat we want is Dynamic Religion. And that, "God Illing," as the Mohammedans say, I am determined to ow. . . . I entirely sgree with the prospectus of your sciety, and you may take for granted my agreement with erything you will do in the future. I have entire faith your ability and sympathy. I already over you an unense debt, and you are laying me every day under finite obligations. My only consolation is that it is for a good of others. Else I do not deserve in the least wonderful kindness shown to me by the Wimbledon ands You good, steady, cannine English people, may

My Dear joe joe,

I am glad to learn that you have at last found out that I have time to read your letters.

I have taken to the Himalayas, tired of lecturing and orating. I am so sorry the doctors would not allow my going over with the Raja of Khetri to England, and that has made Sturdy mad.

The Seviers are at Simla and Miss Müller here in Almora.

The plague has subsided, but the famine is still here and as it looks (on account of no rain as yet), it may wear yet a terrible aspect.

I am very busy from here directing work by my boys in some of the famine districts.

Do come by all means; only you must remember this. The Europeans and the Hindus (called "Natives" by the Europeans) live as oil and water. Mixing with Natives is damning to the Europeans.

There are no good hotels to speak of even at the capitals. You will have to travel with a number of aervants about you (cost cheaper than hotels). You will have to bear with people who wear only a loin cloth:

you will see me with only a loin cloth about me. Dirt and filth everywhere, and brown people. But you will have plenty of men to talk to you philosophy. If you mix with the English much here you will have more comforts but see nothing of the Hindus as they are. Possibly I will not be able to eat with you, but I promise that I will travel to good many places with you and do everything in my power to make your journey pleasant These are what you expect, if anything good comes, so much the better. Perhaps Mary Hale may come over with you. There is a young lady, Miss Campbell, Orchard Lake, Orchard Island, Michigan, who is a great worshinner of Krishna and lives alone in that Island, fasting and praying. She will give anything to be able to see India once, but she is awfully poor If you bring her with you. I will anyhow manage to pay her expenses If Mrs. Bull brings old Landsberg with her, that will be saving that fool's life, as it were

Most probably I may accompany you back to America. Kiss Holister for me and the baby My love to Alberta, to the Leggetts, and to Mabel. What is Fox doing? Give him my love when you see him. To Mrs. Bell and S. Satadanada my love I am as strong as ever, but it all depends upon leading a quiet life ever afterwards. No lurity-burly any more

I had a great mind to go to Tibet this year; but they would not allow me, as the road is dreadfully fatiguing However, I content myself with galloping hard over precipices on mountain ponies. (This is more exciting than your birycle even, athough I had an experience of that at Wimbledon!) Miles and miles of upfull and miles and miles of downhall, the road a few feet broad hanging over sheer precipices several thousand feet deep below.

Ever yours in the Lord VIVERANANDA PS. The best time to come is to arrive in India by October or beginning of November. December, January and February you see things all over and then start by the end of February. From March it begins to get hot. Southern India is always bot.

Goodwin has gone to work in Madras on a paper to be started there soon. V.

MY DEAR RAKHAL

Going to Almora from here I made special efforts for Yogen. But he left for the plains as soon as he had recovered a little. From Subhala valley he will write to me of his safe arrival there. As it is impossible to procure a Dandi (a carrying chair) or any other conveyance, Latu could not go. Achyut and myself have again come back to this place. Today my health is a little bad owing to this riding on horseback at breakneck speed in the sun. I took Shashi Babu'a medicine for two weeks-I find no special benefit. . . . The pain in the liver is gone. and owing to plenty of exercise my hands and legs have become muscular, but the abdomen is distending very much. I feel suffocated while getting up or sitting down. Perhaps this is due to the taking of milk. Ask Shashi if I can give up milk. Previously I suffered from two attacks of sunstroke. From that time, my eyes become red if I expose myself to the aun, and the health continues

to be bad for two or three days at a stretch.

I was very pleased to know all the news from the
Math, and I also heard that the famine relief work is

oing on well. Please let me know if any money has een received from the office of the Brahmavadin for mine relief. Some money will be sent soon from here 'so. There is famine in many other places also, so it not necessary to stay so long in one place. Tell them go to other localities and write to each man to go a separate place. All such work is read work if the ld is made ready in this way, the seeds of spiritual owledge can be sown. Remember this always—that sonly answer to those conservative fanatics who abuse is such work. I have no objection to get the thing need as that and Sarada are suggesting.

You vourselves come to a decision as to what the ne of the Math should be, . . . The money will come hin seven weeks : but I have no further news about land. In this matter it seems to me that it will be d if we can get the garden of Kristo Gopal in Cossib.1 What do you say? In future great works will be emplished. If you agree with me don't let this matter to enybody either within the Math or outside, but tly make enquiries. The work is spoiled if plans are kept secret. If it can be bought within fifteen or en thousand, then buy at once-of course, only if think it good. If something more is demanded, t some advance payment and wait for those seven is. My view is that for the present it is better to it. Everything else will come by and by. All our istions centre round that garden. In reality that is rst Math. Let the thing be done very privately,

work can be judged by its results only, just as one nfer the nature of previous mental tendencies by resultant in present behaviour.

ALMORA, 25th July, 1897.

MY DEAR MARIE.

I have time, will, and opportunity now to clear my promise. So my letter begins. I have been very weak for some time, and with that and other things my visit to England this Jubilee season had to be postponed.

I was very sorry at first not to be able to meet my nice

The famine stricken people for whom the Maha Bodhi Society agreed to pay, on condution that the work would be done in its name

and very dear friends once more, but Karma cannot be avoided, and I had for rest contented with my Himalayas. It is a anny exchange, after all: for the beauty of the living spirit shining through the bursan face is far more releasurable than any amount of material beauty.

Is not the soul the Light of the world?

The work in London had to go slow—for various reasons, and last though not the least was l'argent, mon amie! When I am there l'argent comes in somehow. to keep the mare going. Now everybody ahusga his shoulder. I must come again and try my best to revive the work.

I am having a good deal of riding and exercise, but I had to drank a lot of akunmed milk per prescription of the doctors, with the result that I am more to the front than back! I am always a forward man though—but do not want to be too promment just now, and I have given up drinking milk.

I am glad to learn that you are eating your meals with good appetits.

Do you know Miss Margaret Noble of Wimbledon? She is working hard for me. Do correspond with her if you can, and you can halp me a good deal thera. Her address is. Brantwood, Worple Road, Wimbledon.

So you saw my little friend Miss Orchard and you hked her too—good. I have great hopes for her. And how I should like to be retired from life's extrinee entirely when I am very old, and hear the world singing with the names of my dear, dear young friends like yourself and Miss Orchard etc.!

By the by. I am glad to find that I am aging fast, my hair is turning grey. "Silver threads among the gold"—I mean black—are coming in fast

It is bad for a preacher to be young, don't you think so? I do, as I did all my life. People have more confidence in an old man and it looks more venerable. Yet the old rogues are the worst rogues in the world, im't it? The world has its code of judgment which, alas, is very different from that of truth's.

414

So your "Universal Religion" has been rejected by the Reoue de deux Mondes. Never mind, try again some other paper. Once the ice is broken, you get in at a quick rate, I am sure. And I am so glad that you love the work: it will make its way, I have no doubt of it. Our ideas have a future, ma chère Marie—and it will be

realised soon.

I think this letter will meet you in Paris—your besuiful Paris—and I hope you will write me lots, about
French journalism and the coming "World's Fair" there.

I am so glad that you have been helped by Vedania and Yoga. I am unfortunately sometimes like the circus clown who made others laugh, himself miserable!

You are naturally of a buoyant temperament. Nothing seems to touch you. And you are moreover a very prudent git, inasmuch as you have scruplously key yourself away from "love" and all its nonsense. So you see you have made your good Karma and planted the seed of your lifelong well-being. Our difficulty in his is that we are guided by the present and not by the future. What gives us a little pleasure now drags us or to follow it, with the result that we always buy a mass of

pain in the future for a little pleasure in the present.

I wish I had nobody to love, and I were an orphan in my childhood. The greatest misery in my life has been my own people—my brothers and sisters and mother etc. Relatives are like deadly closs to one's progress, and is it not a wonder that people will still go on to find new ones by morriage II.

He who is alone is happy. Do good to all, like everyone, but do not love any one. It is a bondage, and bondage brings only misery. Live alone in your mind—that is happiness. To have nobedy to eare for and never minding who cares for one is the way to be free.

I envy so much your frame of mind—quiet, gentle, light, yet deep and free. You are already free, Marie, free already. You are Jivanmulta. I am more of a woman than a man, you are more of a man than woman. I am always dragging other's pain into me—for nothing, without being able to do any good to anybody—just as women, if they have no children, bestow all their love upon a cat 11!

Do you think this has any spirituality in it? Nonsense, it is all material nervous bondage—that is what it is, O! to get rid of the thraldom of the flesh!!

Your friend Mrs. Martin very kindly sends me copies of her magazine every month-but Sturdy's thermometer is now below zero, it seems 1 to seems to be greatly disappointed with my non-arrival in England this summer What could I do?

We have started two Maths here, one in Calcutta, the other in Madras. The Calcutta Math (a wretched rented house) was awfully shaken in the late earthquake.

We have got in a number of boys, and they are in training; also we have opened famine relief in several places, and the work is going on space. We will try to start similar centres in different places in India.

In a few days I am going down to the plains and from thence go to the Western parts of the mountains. When it is cooler in the plains, I will make a lecture tour all over and are what make he had

when it is cooler in the plains, I will make a lecture tour all over and see what work can be done. Here I cannot find any more time to write—so many people are waiting—so here I stop, dear Marie, wishing

you all joy and happiness.

I got information that your work there is going on well. Get a thorough mastery of the three Bhâshyas (commentaries), and also study well European philosophy and allied subjects—see to it without fail. To fight with others one requires sword and shield—this fact should never be forgotten. I hope Sokul has sow reached there and is attending on you all right. If Sadananda does not like to stay there, end blim to Calcutta. Don't forget to send to the Math every week a report of the work including income and expenditure and other information.

Alasinga as sister's husband borrowed four hundred rupees from Badridas here, promising to send it beek as soon as he reached Madras; inquire from Alasinga and tell him to send it quickly. For I am leaving this plac the day after tomorrow—whether for Mussoorie Hills (

Yesterday I delivered a lecture in the circle of the local English people, and all were highly pleased will it. But I was very much pleased with the lecture it. Hindi that I delivered the previous day—I did not know before that I could be oratorical in Hindi.

Are there any new boys joining the Math? If so, then carry on the work in the same manner as it is being done in Calcutta. At present don't use up your windom too much, lest it should become completely exhausted you can do that later on.

Pay particular attention to your health, but too much coddling of the body will, on the contrary, also spoil the

health. If there is not the strength of knowledge, nobody will care a tuppence for your ringing of the bell—this is certain; and knowing this for certain equip yourself accordingly. My heart's love and blessings to you and to Goodwin and others.

DEAR SHASHI.

I am very much pained to hear that the work in Madras is not prospering for want of funds. I am glad to learn that the amount borrowed by Alasinga's brotherin-law (sister's husband) has been received back in Almora. Goodwin has written to me to inform the Reception Committee to take some money for expenses from the amount that is left as a result of the lecture. It is a very mean thing to spend the money received on the occasion of that lecture for the ourpose of the Reception -and I do not like to tell envlody anything about this matter. I have understood quite well what the people of our country are when it comes to money-matters. . On my behalf, you personally talk with the friends there and politely make them understand that it is all right if they can find ways and means to hear the expenses ; but if they cannot do so, all of you come back to the Math at Calcutta or go to Ramnad and establish the Math there.

I am now going to the hills at Dharamsala. Niranjan, Dinu, Krishnalal, Latu, and Achyut will stay at Amritsar. Why did you not, all these days, send Sadananda to the Math) If he is still there, then send him to the Punjab on receipt of a letter from Niranjan from Amritsar. Inintend to start work in the Punjab after a few days' norrest in the Punjab hills. The Punjab and Rajputana are indeed fields for work. I shall write to you again soon after starting work. . . .

My health was very bad recently. Now I am very slowly recovering. It will be all right, if I stay in the hills for some more days. My love to you and to Alasinga, G. G., R. A., Goodwin, Gupta, Sukul, and all others.

Even if we buy that house there are still a lot of difficulties; for example, we shall have to break it down in part and make the drawing room into a big hall, and similar alterations and repair. Moreover the house is very old and ramshackle. However, consult Girish Babu and Atul and do what yea decide to be best. Today I an leaving by the two clock train with all my party for Kasbmir. C/o RISHIBAR MUKHOPADHYAYA, CHIEF JUSTICE, SRINAGAR, KASHMIR, 13th September, 1897

MY DEAR RAKHAL,

Now Kashmir. The excellent secounts you heard of this place are all true. There is no place so beautiful as this; and the people also are fair and good-looking, though their eyes are not beautiful. But I have also never seen elsewhere villages and towns so horribly dirty. In Srinagar I am now putting up at the house of Rishibar Babu. He is very hospitable and kind. Send all my letters to his address. In a few days I shall go out somewhere else on excursions; but while returning. I shall come by way of Srinagar, and so shall get the letters also. I have read the letter that you sent regarding Gangadhar. Write to him that there are many orphasi in Central India and in Gorakhpur. From there the Punjabia are getting many children. You must persuade

470

Mahendra Babu and get up an agitation about this matter, so that the people of Calcutta are induced to take up the charge of these orphans-such a movement is very desirable. Especially a memorial should be sent to the Government requesting it to see that orphans taken over by the missionaries are returned to the Hindus. Tell Gangadhar to come over: and on behalf of the Ramakrishna Society a tearing campaign should be made. Gird up your loins, and go to every house to carry on the campaign. Hold mass meetings etc. Whether you succeed or not, start a furious agitation. Get all the facts from the important Bengali friends at Gorakhpur by writing to them, and let there he a countrywide agitation over this. Let the Ramakrishna Society be fully established. The secret of the whole thing is to agitate and agitate without respite. I am much pleased to see the orderliness of Sarada's work. Gangadhar and Sarada should not rest satisfied until they have succeeded in creating a centre in every place they visit.

Just now I received a letter from Gangadhar, It is good news that he is determined to start a centre in that district. Write to him saying that his friend the Magistrate has sent an excellent reply to my letter. As soon as we come down to the plains from Kashmir I shall send back Latu, Niranjan, Dinu, and Khoka. For there is no suitable work for them here any more : also within three to four weeks send Shuddhananda, Sushil, and one other to me. Send them to the house of Mr. Shyamacharan Mukhopadhyaya, Medical Hall, Cantonment, Ambala. From there I shall go to Lahore. They should have each two thick gerua-coloured jerseys, and two blankets for bedding. I shall have them woollen chadders, and other woollen necessities in Labore. If the translation of Râja-Yoga has been completed, get it published bearing all the cost. . . . Where the language is obscure, make it very simple and clear, and let Tulsi make a

Hindi translation of it if he can. If these books are published, they will help the Math very greatly.

I hope your health is now quite all right. Since reaching Dharamsala I have been all right. I like the cold places : there the body keeps well. I have a desire either to visit a few places in Kashmir and then choose an excellent site and live a quiet life there, or to go on floating on the water. I shall do what the doctor advises The Raja is not here now. His brother, the one just next to him in age, is the Commander-in-Chief. Efforts are being made to arrange a lecture under his chairmanahin. I shall write all about this afterwards. If the meeting for the lecture is held in a day or two. I shall stay back, otherwise I go out again on my travels. Sevier is still at Murree. His health is very bad-going about in the folting tongos and juthas. The Bengali gentlemen of Murree are very good and courteous. Give my respects to G. C. Ghosh, Atul. Master Mahashay, and others, and keep up the spirits of everybody. What is the news about the house which Yogen suggested we should buy? In October I shall go down from here and shall deliver a few lectures in the Puniab. After that I may go via Sind to Cutch, Bhui, and Kathiawar-even down to Poona if circumstances are favourable; otherwise I go to Rajoutana via Baroda. From Rajoutana I go to the North-Western Province,1 then Nepal, and finally Calcutta-this is my present programme. Everything, however, is in God's hands. My love and oreetings to all

#### MY DEAR SHUDDHANANDA

We are in Kashmir at last. I need not tell you of all the beauties of the place. It is the one land fit for Yogis, to my mind. But the land is now inhabited by a race who though possessing great physical beauty are extremely dirty. I am going to travel by water for a month seeing the sights and getting strong. But the city is very malarious just now, and Sadananda and Kristolal have got fever. Sadananda is all right today, but Kriatolal has fever yet. The doctor came today and gave him a purgative. He will be all right by tomorrow, we hope; and we start also tomorrow. The State has lent me one of its barges and it is fine and quite comfortable. They have also sent orders to the Tahsildars of different districts. The people here are crowding in bands to see us and are doing everything they can to make us comfortable.

A clipping from The Indian Mirror, quoting passages from an article written by Dr. Barrows in an American paper, has been sent over to me by aomebody without a name and asking me what reply to give. I send back the cutting to Brahmsnanda with my answer to the passages which are dammed lies!

I am glad to learn you are doing well there and going on with your usual work. I also had a letter from Shivananda giving the details of work there.

After a month I go back to the Punjab, and I will

expect three of you at Ambala. In case a centre is founded, one of you will be left in charge. Niranjan, Latu, and Kristolal will be sent back.

I intend to make a rapid march through the Punjab and Sind via Kathiawar and Baroda, back to Rajputana, and thence to Nepal and last Calcutta.

Write to me C/o Rishibar Babu at Snnagar. I will get the letter on my way back

With love to all and blessings.

DEAR HARIPADA,

My health has been very bad for the last nine months, and the heat made it still worse. So I have been wandering over the hills from place to place. Now I am in Kashmit. I have travelled far and wide, but I have never seen such a country. I shall soon leave for the Punjab and again go to work. From Sadananda I have heard all the news about you and continue to get it I am sure to go to Karachi after visiting the Punjab, so we shall meet in person there.

My DEAR MISS MACLEOD.

Come soon if you intend to come really. From November to the middle of February India is cool; after that it is hot. You will be able to see all you want within that time, but to see all takes years.

I am in a hurry; therefore excuse this hasty card. Kindly tender my love to Mrs. Bull and my good wishes and earnest thoughts for Goodwin's speedy recovery. My love to Mother, to Alberta, to the baby, to Holliter, and last, not the least, to Franky.

SRINAGAR, KASHMIR, 30th September, 1897.

DEAR RAKHAL.

I received your affectionate letter and sho the letter from the Meth. I am leaving for the Punjab in two or three days. I have received the foreign mail. The following are my answers to Miss Noble's questions in how letter.

 Nearly all the branches have been started, but the movement is only just beginning.

 Most of the monks are educated. Those that are not are also having secular education. But above all, to do good, perfect unselfishness is absolutely necessary. To ensure that, more attention is given to spiritual exerises than to anything else.

3. Secular educators: We get mostly those who save already educated themselves. What is needed is raining them into our method and building up of haracter. The training is to make them obedient and earless; and the method is to help the poor physically rat and then work up to higher regions of mentality.

Arts and Industries: This part of the programme lone cannot be begun for want of funds. The aimpleat tethod to he worked upon at present is to induce ridinate to use their own produce and get markets for dian artwere etc., in other countries. This should be one by persons who are not only not middlemen them-ulves, but will devote the entire proceeds of this branch, the brensft of the workers.

- 4. Wandering from place to place will be necessary 1 "people come to education." The religious character the wandering monks will carry with it a much greater eight than otherwise.
- 5. All castes are open to our influence. So long the ghest only have been worked upon. But since the work partment is in full operation in different lamine-centres, are influencing the lower classes more and more
  - 6. Nearly all the Hindus approve our work, only by are not used to practical co-operation in such works.
  - Yes, from the very start we are making no distinctn in our charities or other good works between the ferent religious of India.

Reply to Miss N. according to these hints

See that there is no remissuess whatever in the dical treatment of Yogen—if necessary spend money drawing on the capital. Did you go and meet avanath's wife?

If Brahmachati Hariprasanna can come, it will be very

belpful. Mr. Sevier has become very impatient about acquiring a house somewhere; it will be good if something is done quickly about it! Hariprasanna is an engineer : so he will be able to do something quickly about it. Also he understands better about the suitability of places. They (the Seviers) like to have a place somewhere near about Dehra Dun or Mussoorie; that is to say, the place must not be too cold and must be habitable throughout the year. So send Hariprasanna at once straight to Si, Shyamapada Mukherice, Medical Hall, Ambala Cantonment. As soon as I go down to the Punjab, I shall send Mr. Sevier along with him. I am returning (to the Math) in a trice after a tour of the Punjab. Karachi, and then via Rainutana, not via Kathiawar and Guiarat-to Nepal. Tulsi has gone to Madhya Bharat-is it for the famine-relief work? . . .

My blessings and love to all. I have got the new that Kali has reached New York; but he has not written any letter. Sturdy writes that his work had increased so much that people were amazed—and a few persons have also written me praising him highly. However, there is not so much difficulty in America; the work will go on somehow or other. Send Shuddhananda and his brother along with Hanptrasanna. Of the party only Gupta and Achyut will accompany me.

Yours affectionately.

SRONAGAR, KASHMIR,

My DEAR SHASHS.

Now I am returning from a visit to places in Kashmir. In a day or two I shall leave for the Punjab. As my health is now much better. I have decided to tour again in the same way as before. Not too much lecturing—one or two lectures, perhaps, in the Punjab, otherwise none. The people of our country have not yet offered me even as much as a pice for my travelling expenses—and to cap it all, to take with you a whole party, well, you can easily understand how trothlesome it all is. It is also a matter of ahame to have to draw upon only the English disciples. So, as before, I start out "with only a blanket". In this place there is no need for any person like Goodwin, as you can see.

A monk from Ceylon, P. C. Jinawar Vamar by name, has written to me among other things that he wants to vist India. Pethapa he is the same monk who comes of the Stamese royal family. His address is Wellawatta, Ceylon. If convenient, invite him to Madras, He believes in the Vedanta, it will not be an difficult to and him to other places from Madras. It is also good to have such a person in the Order. My love and blessings to you and all others.

## Dear Margo,

428

Some people do the best work when led. Not every one is born to lead. The best leader, however, is one who "leads like the baby". The baby, though sparrently depending on everyone, is the king of the household. At least, to my thinking, that is the accret. . . Many feel, but only a few can express. It is the power of expressing one's love and appreciation and sympathy for others, that enables one person to succeed better in spreading the idea than others. . . .

I shall not try to describe Kashanix to you. Suffice it to say, I never felt sorry to leave any country except his Paradise on earth; and I am trying my best, if I can, to influence the Raja in starting a centre. So much to do here, and the materials to hopeful!...

The great difficulty is this: I see persons giving me almost the whole of their love. But I must not give any one the whole of mine in return, for that day the work would be ruined. Yet there are some who will look for such a return, not having the breadth of the impersonal view. It is absolutely necessary to the work that I should have the enthusiastic love of as many as possible, while I myself remain entirely impersonal. Otherwise jealousy and quarrels would break up everything. A leader must be impersonal. I am sure you understand this. I do not mean that one should be a brute, making use of the devotion of others for his own ends, and laughing an his sleeve meanwhile. What I mean is what I am, intensely personal in my love, but having the power to pluck out my own heart with my own hand, if it becomes necessary, "for the good of many, for the welfare of many". as Buddha said. Madness of love, and yet in it no bondage. Matter changed into spirit by the force of love. Nay, that is the sist of our Vedanta. There is but One. seen by the ignorant as matter, by the wise as God. And the history of civilisation is the progressive reading of spirit into matter. The imporant see the person in the non-person. The sage sees the non-person in the person. Through pain and pleasure, joy and sorrow, this is the one esson we are learning. . . .

Yours ever with love and truth.

MURREE, 11th October, 1897.

MY DEAR RAKIELL

I feel I have been working as if under an intestible impulse for the last ten days, beginning from Kashmir. It may be either a physical or a mental disease. Now I have come to the conclusion that I am unfit for further work. . . . I now understand that I have been very harsh to all of you. But I knew, however, that you would bear with all my shortcomings; in the Math there is no one clse who will do so. I have been increasingly harsh to you. Whatever has happened is now past—it is all the result of past Karma. What is the good of my repentance? I do not believe in it. It is all Karma, Walstrm of Mother's work was to be accomplished through ms. She made me do, and has now flung me aside breaking down my body and mind. Her will be done!

Now I retire from all this work. In a day or two I shall give up everything and wander out alone; I shall spend the rest of my life quietly in some place or other. Forgive me if you all will, or do what you like. Mr. Bull has given much of the money. She has implicit confidence in Sharat. Do the work of the Math with Sharat's advice; or do as you will. But I have all along been like a hero—I want my work to be quick like lightning, and firm as adamant. Similarly shall I dee also Therefore kindly do my work for me-no question o success or defeat enters here at all. I have neve retreated in a fight—shall I now. . . ? There is success and failure in every work. But I am inclined to believe that one who is a coward will after death be born as an insect or a worm, that there is no salvation for a coward insect or a worm, that there is no salvation for a coward insect or a worm, that there is no salvation for a coward insect or a worm, that there is no salvation for a coward insect or a worm, that there is no salvation for a coward will after death be born as an insect or a worm, that there is no salvation for a coward will after death be born as an insect or a worm, that there is no salvation for a coward will after death be born as an insect or a worm, that there is no salvation for a coward will after death be seen as a salvation for a coward will after death be seen as a salvation for a coward will after death be seen as a salvation for a coward will after death be seen as a salvation for a coward will after death be seen as a salvation for a coward will after death be seen as a salvation for a coward will after death be seen as a salvation for a coward will after death be seen as a salvation for a coward will after death be seen as a salvation for a coward will after death be seen as a salvation for a coward will after death be seen as a salvation for a coward will after death be seen as a salvation for a coward will after death be seen as a salvation for a coward will after death be seen as a salvation for a co

even after millions of years of penance. Well, shall I after all be born as a worm? . . . In my eyes this world is mere play-and it will always remain as such. Should one spend six long months brooding over the questions of honour and disgrace, gain and loss pertaining to this? . . I am a man of action. Simply advice upon advice is being given-this one says this, that one says that : again, that man threatens, and this one frightens ! This life is not, in my view, such a sweet thing that I would long to live through so much care and caution and fear. Money, life, friends, and relatives, and the love of men and myself-if one wants to enter into work fully assured beforehand of all these-if one has to be so much ridden with fear, then one will get just what Gurudeva used to say. "The crow thinks itself very clever but . . . ."1-well, he will get that. After all, what is the purpose behind all these-money and wealth. Matha and institutions, preaching and lecturing? There is only one purpose in the whole of ble-education. Otherwise what is the use of man and women, land and waalth?

So loss of money, or loss of anything else—I cannot bether about, and I will not. When I fight, I fight with girded loins—that much I fully understand; and I also understand that man, that here, that god, who says. "Don't care, be featless. O brave one, here I am by your side!" To such a man-god I offer a million salutations. Their presence purifies the world, they are the asviours of the world. And the others who always wail, "Oh, don't go forward, there a five danger, there is that danger,"—those dayseptits—they always tremble with fear. But through the grace of the Drivine Mother my mind is so atrong that even the most terrible daypenis shall not make me a coward. To cowards

The crow thinks steelf very cleves but it cannot help eating filth.

what advice shall I offer - nothing whatsoever have I to say. But this I desire, that I should find shelter at the feet of those brave souls who dared to do great deeds even though they failed to succeed, of those heroes who never quailed nor shirked, of those fighters who never disobesed orders through fear or pride. I am the child of the Divine Mother, the source of all power and strength. To me, cringing, fawning, whining, degrading inertia and hell are one and the same thing. O Mother of the Universe, O my Gurudeva, who would constantly say, "This is a hero ["-| pray that I may not have to die a coward. This is my prayer, O brother. वस्य स्वतः स्ति सम दोशीय समानवामां" - "certainly there is, or there will be born one equal to me;" some one or other will certainly arise from these thousands of devotees of Shri Ramakrishna who will be like me, and who will he able to understand me.

O hero, awake, and dream no more. Death has eaught you by the forelock . . , still fear not, What I have never done-fleeing from the battle-well, will that happen today? For fear of defeat shall I retreat from the fight? Defeat is the ornament the hero adoms himself with. What, to acknowledge defeat without fighting [ O Mother, Mother ! . . . Not one capable of even playing second fiddle and yet the mind filled with petty aelf-importance, "We understand everything". . . . Now I retire ; . . . everything I leave in your control. If Mother sends me men again in whose heart there is courage, in whose hands strength, in whose eyes there is fire, real children of the Mother-if She gives me even one such, then I shall work again, then I shall return Otherwise, I shall take it that, by Mother's will, this. the end. I am in a tremendous hurry. I want to wor at hurricane speed, and I want fearless hearts.

l, have rebuked poor Sarada severely. What to

do? . . . I do scold : but I also have much to complain. . . . Almost suffocated by short breathing, standing and standing. I have written an article for him. . . It is all good otherwise how will renunciation come ? . . . Will Mother in the end kill me with attachment? I have offended all of you-do what you want.

I bless you all with a full heart. May Mother enshine Herself in your hearts as strength; way strengtthe support that is fearlessness-may She make you all This I have seen in life-he who is overcautious about himself falls into dangers at every step ; he who is afraid of losing honour and respect, gets only disorace: he who is always afraid of loss always loses. . . . I wrote at length in yesterday'a letter. I think it desirable to give you special directions about certain matters. . . . (1) To all those who collect money and send it to the Math . . . the acknowledgment of the amounts will be issued from the Math. (2) The acknowledgment must be in duplicate, one for the sender, and one for filing in the Math. (3) There must be a big register in which all the names and addresses of the donors will be entered. (4) Accounts, accurate to the last pie, must be kept of the amounts that are donated to the Math Fund, and fully accurate accounts should be obtained from Sarada and others to whom money is given. For lack of accurate account-keeping . . . set that I am not accused as a cheat. These account should afterwards be published. (5) Immediately go and register a will under lawyer's advice to the effect that in case you and I die then Hari and Sharat will succeed to all that there is in our Math.

I have not yet got any news from Ambala, whether Hariprasanna and others have reached there or not. Give the other half-sheet of this letter to Master Mahashay.

MY DEAR RAKHAL,

Part of the money that Miss Müller promised has reached Calcutts. The balance will come afterwards in a short while. We have also some amount. Miss Müller will deposit the money in your name as well as mine with Messrs. Grindlay & Co. As you have got the power of attorney you alone can draw all the money. As soon as the money is deposited, you yourself with Hari go to Patna and meet that gentleman and by some means or other influence him; and if the price of the land is reasonable, buy it. If it cannot be had, try for some other plot of ground. I am trying to get some money in these parts too. We must hold the big featival on our own plot of ground—remember this must be your first and foremest work. enone what may.

You have shown great pluck; the work you have done you feet credit. Now you must see to it that a Mash and a crew in Calcutta are steadily established before everything else. Work hard to this end but quietly and in sects. Get information about the Cossipore house also. To morrow I am going to Khetri via Alwar. My health is good, even though I have caught a cold. My Dear Rakhal...

We shall start for Khetri tomorrow. Gradually the luggage has greatly increased. After Khetri I intend to

send everybody to the Math. I could get done through them none of the work which I had hoped. That is to say, it is quite certain that none of them can do anything if he always remains with me. Unless each goes about independently, he will not be able to do anything. The fact is, who will care for them if they are in my company? Only waste of time. So I am sending them to the Math

Keep as a fund for some permanent work the balance of the money left after the famine relief. Do not " spend that money for any other purpose, and after giving the full accounts of the famine work, note down thus, "So much balance is left for some other cood work"...

Work I went—I don't want any humbug. To those who have no desire to work lasy. "My dear fellow, now go and fellow your own way." As aoon as I reach Khetri, I will send you the power of attorney with my signature if the document has reached there meanwhile. Open only those letters from America which bear the Boston postmark, not the others. Send all my letters to Khetri. I shall get money in Rapistran itself; no cause for anxiety on that score. Try energetically for the piece of land; we must have the celebration on our own ground this time.

Is the money in the Bengsl Bank or have you kept it elsewhere? Be very careful about money matters; keep detailed accounts, and regarding money know for certain that one cannot rely even on one's own father

Give my love to all. Write to me how Hari is doing. Recently I met at Dehra Dun the Udâsi Sâdhu, Kalyan Dev, and a few others. I hear the people at Hrishikesh are very eager to see me and are asking again and again about me.

The work will not be very congenial at present, I am afraid, but it is really the work for a perfect man. You know the emigrants are not liked at all by the white people there. To look after the Indians, and at the same time maintain cool-headedness so as not to create more staffe—is the work there. No immediate result can be expected, but in the long run ut will prove a more beneficial work for India than any yet attempted I wish you to try your luck in this. If you agree, please write to Sedur about your willingness and ask for more information, mentioning this letter. And godspeed to you I I am not very well, but am going to Calcutta in a few days and will be all rich:

Yours in the Lord, VIVEKANANDA.

THE MATH, BELUR, 25th February, 1898.

My Dear Rajaji,

My gratitude for your very kind invitation to speak. I had a talk with Mr. Bhattacharya on the subject a few days back and I am trying my best as a result to find time for your Society. I also promised to let them know the result on Sunday.

A friend to whom I owe much is here, presumably, to take me to his place in Darjeeling.

made him eat a dose of opium the other day without much benefit to him except his brain which progressed for some hours towards its natural direction, namely, idiocy. Hari also has a touch: I hope it will take off a good bit of their avoirdupois. By the by, we have once more statted the dancing business Here, and it would make your heart glad to see Hari and Sarada and my own good self in a waltz. How we keep balance at all is a wonder to me.

Sharat has come and is hard at work as usual. We have got some good furniture now, and a big jump from the old Châtâi (mat) in the old Math to nice tables and chairs and three Khâts (coth, mind you, We have cuntailed the Pujā (worship) work a good deal and the amount of pruning your klings and phots and sochâts have undergore would make you faint. The puja occupied only the day and they slept soundly all night. How, are Tulti and Khoka? Are they more tractable with you than under Rakhal? You may run in to Calcutts for a few days giving charge to Tulsi, but it is so expensive, and then you must go back, as Madras has to be thoroughly worked up. I am going to America again with Mrs. Bull in a few months.

Give my love to Goodwin and tell him that we are going to see bim at any rate on our way to Japan-Shivananda is here, and I have toned down abit his great desire to go to the Himalayas for good! Is Tulsi contemplating the same? The bandicost hole will be a sufficient eave for him, I suppose.

So the Math here is a fait accompli and I am going over to get more help. . . Work on with energy. India is a rotten corpse inside and outside. We shall revive it by the blessings of Shi Mabaraj. With all love.

Ever yours in the Lord. VIVEKANADA.

#### MY DEAR MARY.

You have news of me already, I hope, through the letter I wrote to Mother Church. You are all so kind, the whole family, to me, I must have belonged to you in the past as we Hindus say. My only regret is that the millionaires do not materialise; and I want them so badly just now that I am growing decrepit and old and hot in the midst of building and organising. Though Harriet has got one of a million virtues, a few millions of eash virtue would have made it more shinny. I am sure so you do not commit the same mistako. A certain young couple had everything favourable to make them man and wife except that the bride's father was deter-'mined not to give his daughter to anyone who had not a million. The young people were in despair when a clever matchmaker came to the rescue. He asked the bridegroom whether he was willing to part with his nose on payment of a million-which he refused. The matchmaker then aware before the bride's father that the bride. groom had in store goods worth several millions, and the match was completed. Don't you take like millions Well, well, you could not get the millionaire, so I could not get the money; so I had to worry a good deal and work hard to no purpose; so I got the disease. It requires brains like mine to find out the true cause-I am charmed with myself t

Well, it was in Southern India, when I came from London and when the people were feting and feasting 446

and pumping all the work out of me, that an ol hereditary disease made its appearance. The tendence was always there and excess of mental work made "express" itself. Total collapse and extreme prostration followed, and I had to leave Madras immediately for the cooler North; a day's delay meant waiting for a week is that awful heat for another steamer. By the by, I learned afterwards that Mr. Barrows arrived in Madras next day and was very much chaggined at not finding me as he expected, though I helped getting up an address for him and arranged for his reception. Poor man, he little knew

I have been travelling in the Himalayas all through last summer; and a cold climate. I found immediately, brought me round; but as soon as I come into the hest of the plains I am down again. From today the heat in Calcutta is becoming intense and I will soon have to fly-

I was at death's door then.

This time to cool America as Mrs. Bull and Miss MacLeod are here. I have bought a piece of land for the institution on the river Ganges near Calcutta, on which is a little house where they are living now; within a stone's throw is the house where the Math is situated at present in which we live. So I see them every day and they are enjoying it immensely à l'Inde. They intend making a trip to

Kashmir in a month and I am going with them as a guide and friend and philosopher perhaps, if they are willing After that we all sail for the land of freedom and scandal

You need not be alarmed with me as the disease will take two or three years at worst to carry me off. At best it may remain a harmless companion. I am content. Only I am working hard to act things all right and always so that the machine moves forward when I am off the stage. Death I have conquered long ago when I gave

up life. My only anxiety is the work, and even that to the Lord I dedicate, and He knows best.

> Ever yours in the Lord, VIVEKANANDA.

MY DEAR JOE JOE.

I have had several attacks of fever, the last being influenza.

It has left me now, only I am very weak yet. As soon as I gather strength enough to undertake the journey, I come down to Calcutta.

On Sunday I leave Darjeeling, probably stopping for a day or two at Kurseong, then direct to Calcuta Calcuta must be very hot just now. Never mind, it is all the better for influenza. In case the plague breaks out in Calcutta. I must not go anywhere 1 and you start for Kashmar with Sadananda. How did you like the 6ll

gentleman, Devendra Nath Tagore ? Not as stylish as "Hans Baba" with Moon God and Sun God of course. What enlightens your insides on a dark night when the Fire God. Sun God, Moon God, and Star Goddesses have gone to sleep ? It is hunger that keeps my consciousness up, I have discovered. Oh, the great doctrine of correspondence of light! Think how dark the world has been all these ages without it! And all this knowledge and love and work and all the Buddhas and Krishnas and Christs—vain, vain have been their lives and work, for they did not discover that "which keeps the inner light when the Sun and Moon were gone to the limbo" for the night! Debcious, in't it!

If the plague comes to my native city, I am determined to make myself a sacrifice; and that I am sure is a "Dam sight, better way to Nirvâna" than pouring oblations to all that ever twinkled.

I have had a good deal of correspondence with Madras with the result that I need not send them any help just now. On the other hand I am going to start a paper in Calcutta, I will be ever so much obliged if you help me starting that. As always with undying love.

MY DEAR RAKHAL.

I have got all the news from your letter and have replied to your wire already. Niranjan and Covindalal Shah will wait at Kathgodam for Yogen-Ma. After I reached Naini Tal, Baburam went from here to Naini Tal

on horseback against everybody's advice, and while returning he also accompanied us on horseback. I was far behind as I was in a Dandi. When I reached the dak bungalow at night. I heard that Rabutam had again fallen from the horse and had hurt one of his arms-though he had no fractures. Lest I should rebuke him, he stayed in a private lodging house. Because of his fall, Miss MacLeod gave him her Dandi and herself came on the horse. He did not meet me that night. Next day I was making arrangements for a Dandi for him, when I heard that he had already left on foot. Since then I have not heard of him. I have wired to one or two places, but no news. Perhaps he is nutting up at some village. Very well! They are experts in increasing one's worries. .

There will be a Dandi for Yogen-Ma; but all the rest will have to go on foot.

My health is much better, but the dyspensia has not gone, and sgsin insomnia has set in. It will be very helpful if you can soon send some good Ayurvedic medicine for dyspensia.

Since only one or two sporadic cases of plague bave occurred there, there is plenty of accommodation in the Government plague hospital, and there is a talk of having hospitals in every Ward. Taking all this into consideration, do what the situation demands. But temember that something said by somebody in Baghbazar does not constitute public opinion. . . . Take care that funds do not run short in times of need and that there is no waste of money. For the present buy a plot of ground for Ramlal in the name of Raghuvir' after careful consideration. . . . The Holy Mother will be the Sebait; after her will come Ramlal, and Shibu will succeed them as Sebait; or make any other arrangement that

seems best. You can, if you think it right, begin the construction of the building even now. For it is not good to live in a new house for the first one or two months, as it will be damp. . the anti-crosion wall can be completed afterwards. I am trying to raise money for the magazine. See that the sum of Rs. 1,200 which I gave for the magazine is kept only for that account. All the others are well here: Sadannada sprained

his foot yesterday. He says he will be all right by the evening. The climate at Almora is excellent at this time

Moreover the bungalow rented by Sevier is the best in Almora. On the opposite aide Annie Besant is staying in a small bungalow with Chakravarty. Chakravarty is now the son-in-law of Gagan (of Chazipuz). One day I went to see him. Annie Besant told ome entreatingly that there should be friendship between her organisation and mine all over the world, etc., etc Today Besant will come here for tea. Our ledies are in a small bungalow near by and are quite happy. Only Miss MacLeod is a liktle unwell today. Harry Sevier is becoming more and more a Sadhu as the days pass by ... SRINAGAR. 17th July, 1898.

My DEAR RASHAL I got all the news from your letter. . . . My opinion regarding what you have written about Sarada is only that it is difficult to make a magazine in Bengali paying; but if all of you together canvass subscribers from door to door, it may be possible. In this matter do as you all decide. Poor Sarada has already been disappointed once What harm is there if we lose a thousand rupees by supporting such an unselfish and very hardworking person? What about the printing of Raja-Yogo? As a last resort, you may give it to Upen on certain terms of sharing the profit in the sales . . About money matters, the advice given previously is final. Henceforward do what you consider best regarding expenditure and other things I see very well that my policy is wrong, and yours is correct, regarding helping others; that is to say. if you help with money too much at a time, people instead of feeling grateful remark on the contrary that they have got a simpleton to bank upon. I always lost nght of the demoralising influence of charity on the

EPISTLES 455

receiver. Secondly, we have no right to deviate even slightly from the purposes for which we collect the donations. Mrs. Bull will get her rosasy all right if you send it care of Chief Justice Rishibar Mukhopadhyaya. Kashmir. Mr. Mitra and the Cluef Justice are taking every care of them. We could not get a plot of ground in Kashmir yet, but there is a chance that we shall do so soon. If you can spend a whiter here, you are sure to recoup your health. If the house is a good one and if you have enough fuel and warm clothing, then life in a land of snow is nothing but enjoyable Also for stomach troubles a cold climate is an unfailing remedy Bring Yegen with you; for the eath here is not stony, it is clay like that of Bengal.

If the paper is brought out in Almora, the work will progress much: for moor Sevier will have something to do, and the local people also will get some work. Skilful management lies in giving every man work after his own heart. By all the means in our power the Nivedita Cirls' School in Calcutta should be put on a firm footing To bring Master Mahashay to Kashmir is still a far cry. for it will be long before a college is established here But he has written that it is possible to start a college in Calcutta, with him as the principal, at an initial expense of a thousand rupees. I hear that you all also favour this proposal. In this matter do what you all consider best. My health is all right. I have to get up seldom at night, even though I take twice a day rice and potatoes, sugar, or whatever I get. Medicine is uselessit has no action on the system of a Knower of Brahman! Everything will be digested-don't be alraid

The ladica are doing well, and they send you their greetings. Two letters from Shivananda have come. I have also received a letter from his Australian disciple. I

hear that the outbreak of plague in Calcutta has completely subsided.

SRINAGAR, 1st August, 1898.

My DEAR RAKHAL,

You are always under a delusion, and it does not leave you because of the strong influence, good or bad, of other brains. It is this: whenever I write to you about accounts, you feel that I have no confidence in you, . . . My great anxiety is this; the work has somehow been started, but it should go on and progress even when we are not here; such thoughts worry me day and night. Any amount of theoretical knowledge one may have; but unless one does the thing actually, nothing is learnt. I refer repeatedly to election, accounts, and discussion so that everybody may be prepared to shoulder the work. If one man dies, another-why another only, ten if necessary-should be ready to take it up. Secondly, if a man's interest in a thing is not roused, he will not work whole-heartedly; all should be made to understand that everyone has a share in the work and property. and a voice in the management. This should be done while there is yet time. Give a responsible position to everyone alternately, but keep a watchful eye so that you can control when necessary; thus only can men be trained for the work. Set up such a machine as will go on automatically, no matter who dies or lives. We Indians suffer from a great defect, viz we cannot make a permanent organisation and the reason is that we

never like to share power with others and never think of what will come after we are gone.

I have already written everything regarding the oplace. Mrs. Bull and Alias Miller and others are of opinion that it is not desirable to apend money uselessly when hospitals have been statted in every Ward. We lend our services as nurses and the like. Those that pay the piper must command the tune.

The Maharaja of Kathour has agreed to give us a plot of land. I have also visited the site. Now the matter will be finalised in a few days, if the Lord wills. Right tows, before leaving, I hope to build a small house here I shall leave it in the charge of Justice Mukherjice when departing. Why not come here with somebody else and spend the winter? Your health will improve, and a need, too, will be fulfilled. The money I have set apart for the press will be sufficient for the purpose, but all will be as you decide. This time I shall surely get some money from N. W. P., Rajpatsans, and other places Well, give as directed ... money to a few persons. I am borrowing this amount from the Math and will pay it back to you with interest.

My health is all right in a way. It is good news that the building work has begun. My love to all.

The search for Heinsholdt's Mahatmas in Kashmir will be entirely fruitless; and as the whole thing has first to be established as coming from a creditable source, the attempt will also be a little too early. How are Mother Church and Father Pope and where? How are you ladies, young and old? Going on with the old game with more zest now that one has fallen off the ranks? How is the lady that looks like a certain statue in Florence? (I have forgotten the name)! always bless her arms when I think of the commarison.

Ah! Mary, if you could see Kashmir—only Kashmir is the marvellous lakes full of lotuses and swans (there are no swans but geese—poetic licence) and the big black bee trying to settle on the wind-shaken lotus (I mean the lotus nods him off refusing a kiss—poetry), then you could have a good conscience on your death-bed. As his is earthly paradice and as logic asys one bird in the hand is equal to two in the bush, a glumpse of this is wiser, but economically the other better; no trouble, no labour, no expense, a little namby-pamby dolly life and laker, that is all.

why do you talk so much about me in your oneletter-a-year and so little about the four witches mumbling Mantras over the boiling pot in a corner of Chicago?

Did you come across Max Müller's new book. Ramakrishna: His Life and Sayings?

they have been doing splendid in Australia and elsewhere; the same old "fellies" little changed if any. I
wish you could come to visit India—that will be some
day in the future. By the by, Mary, I heard a few months
ago, when I was rather worrying over your long silence,
that you were just hooking a "Willy," and so busy with
your dancers and parties; that explained of course your
inability to write. But "Willy" on on "Willy," I must
have my money, don't forget, Harriet is discreetly silent
since she got her boy; but where is my money, please?
Remind her and her husband of it. If she is Woolley,
I am greasy Bengali, as the English call us here—Lord.

where is my money?

I have got a monastery on the Ganges now, after allthanks to American and English friends. Tell Mother to
look sharp I am going to deluge your Yankee land with
idolatrous missionaires.

Tell Mr. Woolley he got the sister but has not paid the brother yet. Moreover, it was the fat black queerly dressed apparition smoking in the parlour that frightened many a temptation away, and that was one of the causes which secured Harriet to Mr. Woolley : therefore, I want to be paid for my great share in the work etc., etc. Plead strong, will you?

I do so wish I could come over to America with Joe for this summer; but man proposes and who disposes? Not God surely always. Well, let things slide as they will. Here is Abhayananda, Marie Louise you know, and she has been very well received in Bombay and Madras. She will be in Calcutta tomorrow, and we are going to give her a good reception too.

My love to Miss Howe, Mrs Adams, to Mother Church, and Father Pope and all the rest of my friends across the seven oceans. PORT SAID, 14th July, 1899

MY DEAR STURDY,

I got your letter all right just now. I have one from

M. Nobel of Paris too. Miss Noble has several from America.

M. Nobel writes to me to defer my visit to him at Paris to some other date, from London, as he will have to be away for a long time. As you know sure, I shall not have many friends staying now in London, and Miss MacLeod is so desirous I should come. A stay in England under these circumstances is not advisable. Moreover, I do not have much life left. At least I must go on with that supposition. I mean if anything has to be done in America, it is high time we bring our scattered influence in America to a head—if not organise regularly. Then I shall be free to return to England in a few months and work with a will till I return to India.

I think you are absolutely wanted to gather up, as it were, the American work. If you can, therefore, you ought to come over with me. Turiysnands is with me. Saradananda's brother is going to Boston. . . . In case you cannot come to America, I ought to go, ought I not?

Yours. Vivekananda.

I have recovered quite a bit by the voyage. It was bromson storms tumbling the exercise on the dumb-bells and monsoon storms tumbling the steamer about the waves. Queer, isn't it? Hope it will remain. Where is our Mother, the Wortshipful Brahmini cow of India? She is with you in New York, I think.

Sturdy is away, Mirs, Johnson and everybody Margo is rather worried at that. She cannot come to U. S. till next month. Already I have come to love the sea. The fish Avatāra is on me. I am afreid—good deal of him in me, I am sure, a Benealt.

How is Alberta, . . . , the old folks and the rest of them? I had a beautiful letter from dear Mrs. Brer Rabbit; she could not meet us in London, ahe started before we arrived.

It is nice and warm here ; rather too much, they say I have become for the present a Shunyavadi, a believer in nothingness, or void. No plans, no afterthought, no attempt, for anything, laissez faire to the fullest. Well, Joe, Margo would always take your side on board the steamer, whenever I criticised you or the Divine cow. Poor child, she knows so little! The upshot of the whole is. Joe, that there cannot be any work in London, because you are not here. You seem to be my fate! Grind onold lady; it is Karma and none can avoid. Say, I look several years younger by this voyage. Only when the heart gives a lurch, I feel my age. What is this osteopathy, anyway? ### To Miss Marie Halboister

C/O MISS NOBLE, 21A HIGH STREET, WIMBLEDON, August, 1899.

MY DEAR MARIE.

I am in London again. This time not busy, not hustling about but quietly settled down in a corner-wait ing to start for the U.S. America on the first opportunity. My friends are nearly all out of London in the country and elsewhere, and my health not sufficiently strong,

So you are happy in the midst of your lakes and gardens and seclusion in Canada. I am glad, so glad to know that you are up again on top of the tide. May

you remain there for ever!

You could not finish the Raia-Yoga translation yet-all right, there is no hurry. Time and opportunity must come if it is to be done you know, otherwise we vainly strive. Canada must be beautiful now, with its short but

vigorous summer, and very healthy.

I expect to be in New York in a few weeks, and don't know what next. I hope to come back to England next spring. I fervently wish no misery ever came near any one;

yet it is that alone that gives us an insight into the depths of our lives, does it not? In our moments of anguish gates barred for ever

seem to open and let in many a flood of light.

We learn as we grow. Alas! we cannot use our

knowledge here. The moment we seem to learn, we are hurried off the stage. And this is Mâyâ!

This toy world would not be here, this play could not go on, if we were knowing players. We must play blind-folded. Some of us have taken the part of the rogue of the play, some heroic—never mind it is all play. This is the only consolation. There are demons and Jions and figers and what not on the stage, but they are all muztled They snap but cannot blie. The world cannot touch our souls. If you want, even if the body be torn and bleeding, you may enjoy the greatest peace in your mind.

And the way to that is to attain hopelessness. Do you know that? Not the imbecile attitude of despair, but the contempt of the conqueror for things he has attained, for things he struggled for and then throws saide as beneath his worth.

This hopelessness, desirelessness, aimlessness, is just the harmony with nature. In nature there is no harmony, no reason, no sequence; it was chaos before, it is so still.

The lowest man is in consonance with nature in his earthy-headness; the highest the same in the fullness of knowledge. All three aimless, drifting, hopeless—all three happy.

You want a chatty letter, don't you? I have not much to chat about. Mr. Sturdy came last two days He goes home in Wales tomotrow.

I have to book my passage for N Y, in a day or two.

None of my old friends have I seen yet except Miss

Souter and Max Gysic, who are in London. They have been very kind, as they always were.

I have no news to give you, as I know nothing of London yet, I don't know where Gestrude Orchard is, else would have written to her. Miss Kate Steel is also away. She is coming on Thursday or Saturday.

I had an invitation to stay in Paris with a friend, a

very well educated Frenchman, but I could not go this time I hope another time to live with him some days.

expect to see some of our old friends and say good day to them.

I hope to see you in America sure. Either I may unexpectedly turn up in Ottawa in my peregrinations or you come to N. Y.

Good-bye, all luck be yours.

Ever yours in the Lord. VIVEKANANDA.

LONDON. 10th August, 1899.

My DEAR RAKHUL.

I got a lot of news from your letter. My health was much better on the ship, but, after landing, owing to flatulence it is rather bad now. . . . There is a lot of difficulty here-all friends have gone out of town for the summer. In addition my health is not so good, and there is a lot of inconvenience regarding food etc. So in a few days I leave for America. Send an account to Mrs. Bull as to how much was spent on purchase of land, how much on buildings. how much on maintenance etc.

Sarada writes that the magazine is not going well. . . . Let him publish the account of my travels, and thoroughly advertise it beforehand-he will have subscribers rushing in. Do people like a magazine if three-fourths of it are filled with pious stuff? Anyway pay special attention to the magazine. Mentally take it as though I were not. Act independently on this basis. "We depend on the elder brother for money, learning, everything -such an

attitude is the road to ruin. If all the money even for the magazine is to be collected by me and all the articles too are from my pen-what will you all do? What are our Sahibs then doing? I have finished my part. You do what remains to be done. Nobody is there to collect a single penny, nobody to do any preaching, none has brains enough to take proper care of his own affairs. none has the capacity to write one line, and all are saints for nothing ! . . . If this be your condition, then for six months give everything into the hands of the boys -magazine, money, preaching work, etc. If they are also not able to do anything, then sell off everything, and returning the proceeds to the donors go about as mendicants. I get no news at all from the Math. What is Sharst doing? I want to see work done. Before dying, I want to see that what I have established as a result of my lifelong struggle. 18 put in a more or less running condition. Consult the Committee in every detail regarding money matters. Get the signatures of the Committee for every item of expenditure. Otherwise you also will be in for a bad name This much is customary that people want some time or other an account of their donations. It is very wrong not to have it ready at every turn. . . . By such letharmy in the beginning, people finally become cheats. Make a commutee of all those who are in the Math, and no expenditure will be made which is not countersigned by them-none at all! I want work, I want vigour-no matter who lives or dies. What are death and life to a Sannyasin?

MY DEAR STURDY.

I have simply been taking rest at the Leggetts' and doing nothing. Abhedananda is here. He has been working hard.

He goes in a day or two to resume his work in different places for a month. After that he comes to New York to work. I am trying to do something in the line you suggested, but don't know how far an account of the Hindus will be appreciated by the Western public when it comes from a Hindu.

Mrs. Johnson is of opinion that no spiritual person ought to be ill. It also seems to her now that my smoking is simful etc., etc. That was Miss Muller's reason for leaving me, my illness. They may be perfectly right, for aught I know—and you too—but I am what I am In lodis, the same defects plus eating with Europeans, have been taken exception to by many I was driven out of a private temple by the owners for eating with Europeans I with I were malleable enough to be moulded into what ever one desired, but unfortunately I never saw a man who could satisfy every one. Nor can any one who has to go to different places possibly satisfy all

When I first eame to America, they ill treated me if I had not trousers on Next I was forced to west euffs and collars, else they would not touch me etc., etc. They thought me safully funny if I did not eat what they offered etc., etc.

In India the moment I landed they made me shave my head, and wear "Kaupin." (foin cloth) with the result that I got diabetes etc. Saradananda never gave up his underwear—this saved his life, with just a touch of sheumatism and much comment from our people.

Of course, it is my Karms and I am glad that it is so For, though it smarts for the time, it is another great experience of life, which will be useful, either in this or in the next.

As for me, I am always in the modst of ebbs and flows, I knew it always and preached always that every bit of pleasure will bring its quota of pain, if not with compound interest. I have a good deal of love given to me by the world: I deserve a good deal of batted there fore. I am glad it is so—as it proves my theory of

"Every wave having its corresponding dip" on my own

person. As for me. I stick to my nature and principle-once

a friend, always a friend-also the true Indian principle of looking subjectively for the cause of the objective.

I am sure that the fault is mine, and mine only, for every wave of dislike and hatred that I get. It could not be otherwise. Thanking you and Mrs. Johnson for thus calling me once more to the internal.

My DEAR OPTIMIST,

I received your letter and ann thankful that something has come to force optimistic lesses fare into action. Your questions have tapped the very source of pessimism, however. British rule in modern ledies has only one redeeming feature, though unconscious; it has brough ladie out once more on the stage of the world, it has forced upon it the contact of the outside world. It it had been done with an eye to the good of the people concerned, as circumstances favoured Japan with, the results rould have been more wonderful for India. No

has been a good increase of population, but not yet what it was when the country was entirely independent-that ia, before the Mohammedan rule. Indian labour and produce can support five times as many people as there are now in India with comfort, if the whole thing is not taken off from them. This is the state of things-even education will no more be permitted to spread; freedom of the press stopped already. (of course we have been disarmed long ago) the bit of self-government granted to them for some years is being quickly taken off. We are watching what next! For writing a few words of innocent criticism men

MY DEAR STURDY.

Your last letter reached me after knocking about a little through insufficient address.

It is quite probable that very much of your criticism is just and correct. It is also possible that some day you may find that all this spiings from your dislike of certain persons, and I was the scapegoal

There need be no bitterness, however, on that a content as I don't think I ever posed for anything but what I am. Nor is it ever possible for me to do so, as an hour's contact is enough to make everybody see through my smoking, bad temper, etc. "Every meeting must have a separation"—this is the nature of things. I carry no feeling of disappointment even. I hope you will have no bitterness. It is Karma that brings us together and Karma separates.

I know how shy you are, and how loathe to wound others feelings. I perfectly understand months of torture in your mind, when you have been struggling to work with people who were so different from your ideal. I could not guess it before at all, else I could have saved you a good deal of unnecessary mental trouble. It is

After all I decide to come to Cambridge just now I must finish the stories I began. The first one I don't think was given back to me by Margo.

My clothes will be ready the day after tomorrow and then I shall be ready to start; only my fear as it will be for the whole winter a place for becoming nervous and not for quicting of nerves, with constant parties and lectures. Well, perhaps you can give me a room somewhere, where I can hide myself from all the goings on in the place. Again I am so nervous of going to a place where indirectly the Indian Math will be. The very name of these Math people is enough to frighten me. And they are determined to kill with these letters etc.

Anyhow, I come as soon as I have my clothes—this week. You need not come to New York for my sake, If you have business of your own, that is another matter. I had a very kind invitation from Mrs. Wheeler of Montclair. Before I start for Boston, I will have a turn-in in Montclair for a few hours at least

I am much better and am all right; nothing the matter with me except my worry, and now I am sure to throw that all overboard.

Only one thing I want—and I am afraid I cannot get it of you—there should be no communication about me in your letters to India even indirect. I want to hide for a time or for all time. How I eurse the day that brought me celebrity.

MY DEAR BRAHMANANDA.

The accounts are all sight. I have handed them over to Mrs. Bull who has taken charge of reporting the different parts of the accounts to different donors. Never mind what I have said in previous hamb letters. They would do you good. Firstly, they will make you business like in the future to keep regular and clear accounts and get the brethren into it. Secondly, if these scolding don't make you breve, I shall have no more hopes of you. I want to see you die even, but you must make a fight. Die in obeying commands like a soldier, and go to Nivana. but no cowardice.

It is necessary that I must disappear for some time. Let not any one write me or seek me during that time, it is absolutely necessary for my health. I am only nervous, that is all, nothing more

All blessings follow you. Never mind my harshness. You know the beart always, whatever the lips asy. All blessings on you. For the last year or so I have not been in my senses at all. I do not know why. I had to pass through this hell—and I have. I am much better—well, in fact, Lord help you all. I am going to the Himalayas soon to retire for ever. My work is done.

## To Mrs Ole Bull

22nd December, 1899.

MY DEAR DHIRA MATA,

I have a letter from Calcutta today, from which I learn your cheques have arrived; a great many thanks and grateful words also came.

Miss Souter of London sends me a printed New Year's greetings. I think she must have got the accounts you sent her by this time.

Kindly send Saradananda's letters that have come to your care.

As for me, I had a slight relapse of late, for which the healer has rubbed several inches of my skin off.

Just now I am feeling it, the smart. I had a very hopeful note from Margo. I am grinding on in Pasadenn : hope some result will come out of my work here. Some people here are very enthusiastic : the Raia-Yogs book did indeed great services on this coast. I am mentally very well; indeed I never really was so calm as of late. The lectures for one thing do not disturb my sleep, that is some gain. I am doing some writing too. The lectures here were taken down by a stenographer, the people here want to print them.

I learn they are well and doing good work at the Math-from Swami S.'s letter to loe. Slowly as usual plans are working ; but Mother knows, as I say, May She give me release and find other workers for Her plans. By the by, I have made a discovery as to the mental method of really practising what the Gita teaches, of working without an eye to results. I have seen much light on concentration and attention and control of concentration, which if practised will take us out of all anxiety and worry. It is really the science of bottling up our minds whenever we like. Now what about yourself. poor Dhira Mata I This is the result of motherhood and its penalties; we all think of ourselves, and never of the Mother. How are you? How are things going on with you? What about your daughter? about Mrs. Briggs?

I hope Turiyananda is completely recovered now and working. Poor man, suffering is the lot ! Never mind : there is a pleasure in suffering even, when it is for others, is there not? Mrs. Leggett is doing well : so is Joe : Ithey say I- too, am. May be they are right. I work anyway and want to die in harness : if that be what Mother wants. I am quite content.

> Ever your son. VIVEKANANDA.

BELOVED DHIRA MATA.

An eventful and happy New Year to you and many such returns !

I am much better in health-able enough to work once more. I have started work already, and have sent to Saradananda some money-Rs. 1,300 already-as expenses for the law suit. I shall send more, if they need it. I had a very had dream this morning and had not any news of Saradananda for three weeks Poor boys! How hard I am on them at times Well, they know in spits of all that, I am their best friend.

Mr. Leggett has got a little over £500 ) had with Sturdy on account of Raja-Yoga and the Maharaja of Khetri. I have now about a thousand dollars with Mr. Leggett. If I die, kindly send that money to my mother. I wired to the boys three weeks ago that I was perfectly cured. If I don't get any worse, this much health as I have now will do well enough. Do not worry at all on my account ; I am up and working with a will.

I am sorry I could not write any more of the stories. I have written some other things and mean to write something almost every day,

I am very much more peaceful, and find that the only Way to keep my peace is to teach others. Work is my only safety valve.

only want some clear business head to take care of he details as I push onwards and work on I am afraid t will be a long time to find such in India, and if there

are any, they ought to be educated by somebody from the West.

Again. I can only work when thrown completely or my own feet. I am at my best when I am alone. Mother seems to arrange so. Joe believes great things are brewing—in Mother's cup; hope it is so.

Joe and Margot have developed into actual prophets, it seems. I can only say, every blow I had in this life, every pang, will only become joyful sacrifice if Mother becomes propitious to India once more,

Miss Greenstidel writes a beautiful letter to me, about you most of it. She thinks a lot about Turiyananda too. Give Turiyananda my love. I am sure he will work well. He has the pluck and stamina.

I am going soon to work in California; when I leave I shall send for Turiyananda and make him work on the Pacific coast. I am sure here is a great field. The Reid-Yoga book seems to be very well known here. Miss Cerenstidel has found great peace under your roof and is very happy. I am so glad it is so. May things go a little better with her every day. She has a good business head and practical sense.

Joe has unearthed a magnetic healing woman. We are both under her treatment. Joe thinks she is pulling me up splendidly. On her has been worked a miracle, she claims. Whether it is magnetic healing. California ozone, or the end of the present spell of bad Karma. I am improving. It is a great thing to be able to walk three miles, even after a heavy dinner.

All love and blessings to Olea. My love to Dr. James and other Boston friends.

MY DEAR MARY.

Merry Christmas and Happy New Year and many, many glorious returns of such for your brithday All these wishes, prayers, greetings in one breath. I am cured, you will be glad to know It was only indigestion and no beart or kidney affection, quoth the healers. And I am walking three miles a day—after a heavy dinner.

- Say—the person healing me insisted on my smoking to Say—the person healing me incely and am all the better for it. In plain English the nervousness etc was all due to dyspepsia and nothing more
- hard; but I don't care and I want to make money this time. Tell this to Margot, especially the pipe busines. You know who is healing me? No physician, no Christian Science healer, but a maguetic healing woman who skins me every time she treats me Wonders—she performs operations by rubbing—internal operations too, her patients tell me.
- It is getting late in the night I have to give up witing separate letters to Margot, Harriet, Isabelle, and Mother Chun, Wish is half the work They all know bow! I ove them dearly, passonately; so you become the medium for my spirit for the time, and carry them my New Year's messages.

It is exactly like Northern Indian winter here, only some days a little warmer; the roses are here and the beautiful palms. Barley is in the fields, roses and many other flowers round about the cottage where I live. Mrs Blodgett, my host, is a Chicago lady—fat, old, and extremely witty. She heard me in Chicago and is very motherly.

I am so sorry the English have caught a Tartar in South Africa. A soldier on duty outside a camp bawled out that he had caught a Tartar. "Brigh him in," was the order from inside the tent. "He will not come," replied the sentry. "Then you come yourself," range the order again. "He will not let me come cither." Hence the phrase "to catch a Tartar." Don't you catch any.

I am happy just now and hope to remain so for all the rest of my life. Just now I am Christian Science no evil, and "love is a drawing card."

I shall be very happy if I can make a lot of money. I am making some. Tell Margot I am going to make a lot of money and go home by way of Japan, Honolulu. China, and Java. This is a nice place to make money quick in; and San Francisco is better, I hear. Has she made any?

You could not get the millionaire. Why don't you start for half or one-fourth million? Something is better than nothing. We want money: he may go into Lake Alichigan, we have not the least objection. We had a bit of an earthquake here the other day. I hope it has gone to Chicago and raised Isabelle's mud-puddle up. It is getting late. I am yawning, so here I quit.

Good-bye; all blessings, all love. VIVEKANADA.

### To Mrs Ole Bull

My DEAR DHIRA MATA.

I received yours with the endosires for Sarada nanda; and there was some good news. I hope to get some more news this week. You did not write anything about your plans I had a letter from Miss Greenstadel expressing her deep gratitude for your kindness-and who does not? Turiyananda is getting well by this time. I hope.

I have been able to remit Rs 2,000 to Saradananda. with the help of Miss MacLeod and Mrs Leggett Of course they contributed the best part. The rest was got by lectures. I do not expect anything much here or anywhere by lecturing. I can acarcely make expenses No. not even that; whenever it comes to paying, the people are nowhere. The field of lecturing in this country has been overworked; the people have outgrown that

I am decidedly better in health. The healer thinks am now at liberty to go anywhere I choose, the process will go on and I shall completely recover in a few months. She insists on this, that I am cured already, only nature will have to work out the rest

Well, I came here principally for health. I have got it ; in addition I got Rs 2,000 to defray the law expenses Good.

490 exactly what the great Shankaracharva himself had to do! He had to go back to his mother in the last few days of her life! I accept it. I am resigned. I am calmer than ever. The only difficulty is the financial part. Well, the Indian people owe something. I will try Madras. and a few other friends in India. Anyhow, I must try, as I have forebodings that my mother has not very many years to live. Then again, this is coming to me as the greatest of all sacrifices to make, the sacrifice of ambition, of leadership, of fame. I am resigned and must do the penance. The one thousand dollars with Mr. Leggett, and if a little more is collected, will be enough to fall back upon in case of need. Will you send me back to India? I am ready any time. Don't go to France without accing me. I have become practical at least compared to the visionary dreams of Joe and Margot. Let them work their dreams out for me-they are not more than dreams. I want to make out a trust-deed of the Meth in the names of Saradananda, Brahmananda, and yourself. I will do it as soon as I get the papera from Saradananda. Then I am quits, I want rest, a meal, a few books, and I want to do some scholarly work. Mother shows this light vividly now. Of course you were the one to whom She showed it first. I would not believe it then. But then, it is now shown that-leaving my mother was a great renunciation in 1884-it is a greater renunciation to go back to my mother now. Probably Mother wants me to undergo the same that She made the great Acharya undergo in old days. Is it? I am surer of your guidance than of my own. Joe and Margot are great souls, but to you Mother is now sending the

light for my guidance Do you see light? What do you advise? At least do not go out of this country without sending me home I am but a child, what work have I to do? My powers I passed over to you I see It. I cannot any

more tell from the platform. Don't tell it to anyoneplot even to Joe. I am glad. I want rest: not that I am tired, but the next phase will be the miraculous touch and not the tongue—like Ramaknishna is. The word has gone to you and the voice to Margo. No more it is in me, I am glad. I am resigned, Only get true out to India, Worlt woul Worlter will make you do it, I am sure.

You sheady know all about the work. I have not done much work, but my heart is growing stronger every day, physically and mentally. Some days I feel I can bear verything and suffer everything. There was nothing of note inside the bundle of papers sent by Miss Miller. I did not write her, not knowing her address. Then sazin, I am afraid.

PASADENA. 20th February, 1900.

MY DEAR MARY.

Your letter bearing the sad news of Mr. Hale's passing away reached me yesterday. I am sorry, because in spite of monastic training the heart lives on; and then Mr. Hale was one of the best souls I met in life. Of course you are sorry, miserable, and so is Mother Church and Harriet and the rest, especially as this is the first grief of its kind you have met, is it not? I have lost many, suffered much, and the most curious cause of suffering when somebody goes off is the feeling that I was not good enough to that person. When my father died it was a pang for months, and I had been so disobedient. You have been very dutiful; if you feel anything like

that, it is only a form of sorrow.

Just now I am afraid life begins for you, Mary, in earnest. We may read books, hear lectures and talk miles, but experience is the one teacher, the one eyepener. It is best as it is. We learn, through smiles and ears we learn. We don't know why, but we see it is so : nd that is enough. Of course Mother Church has the place of her religion. I wish we could all dream ndisturbed good dreams.

You have had shelter all your life I was in the are burning and panting all the time. Now for a oment you have caught a glimpse of the other side y life is made up of continuous blows like that, and ndred times worse, because of poverty, treachery, and own foolishness! Pessimism! You will understand how it comes. Well, well, what shall I say to you y? You know all the talks , only I say this and it is if it were possible to exchange gnef. and had I a erful mind, I would exchange mine for your grief ever always. Mother knows best

I wish I had rest and peace for a few days at least, which I am sure I can get with the sisters at Chicago. Well, Mother knows best, as I say always. She knows best. The last two years have been specially bad. I have been living in mental hell. It is partially lifted now, and I hope for better days, better states. All blessings on you and the sisters and Mother. DEAR DHIRA MATA

I have not had a word from you for a monh I am in Frisco. The people here have been prepared by my writings beforehand and they come in big enough. But it remains to be seen how much of that enthusism endures when it comes to paying at the door. Rev. Penjamin Fay Mills invited me to Oakland and gave me.

big crowds to preach to. He and his wife have been reading my works and keeping track of my movements all the time. I sent the letter of introduction from Miss Thursby to Mrs. Hearst. She has invited me to one of her musicals Sunday next

My health is about the same, don't find much difference; it is improving, perhaps, but very impercepably, I can use my voice, however, to make 3,000 people hear me as I did twice in Oakland and get good

sleep too after two hours of speaking

I learn Margot is with you. When are you sailing for France? I will leave here in April and go to the East. I am very desirous of getting to England in May if I can Must not go home before trying England once more

I had nice letters from Brahmananda and Saradananda; they are all doing well. They are trying to bring the municipality to its senses; I am glad In this world of Maya one need not injure, but "apread the hood, without striking." That is enough

Thinga must get round; if they don't, it is all right. I have a very nice letter from Mrs. Sevier too. They are doing fine in the mountains. How is Mrs. Vaughan? When is your conference to close? How is Turiyananda?

With everlasting love and gratitude.

To Mrs. Ole Bull

1502 JONES STREET, SAN FRANCISCO. 7th March. 1900.

Dear Dhira Mata,

Your letter, enclosing one from Saradananda only and the accounts, came. I am very much reassured by all the news I since received from India. As for the accounts and the disposal of the Rs. 30,000 do just what you please.

I have given over the management to you, the Master will show you what is best to do. The money is Rs. 35,000; the Rs. 5,000, for building the cottage on the Gangea, I wrote to Saradananda not to use just now. I have already taken Rs. 5,000 of that money. I am not going to take more. I had paid back Rs. 2,000 or more of that Rs. 5,000 in India. But it seems, Brahmanands, wanting to show as much of the Rs. 35,000 intend as the could, drew upon my Rs. 2,000; so I owe them Rs. 5,000 still on that score. Anyway, I thought I could make money here in California and pay them up quietly.

Now I have entirely failed in California financially. It is worse here than in Los Angeles. They come in crowds when there is a free lecture and very few when there is something to pay. I have some hopes yet in England. It is necessary for me to reach England in May. There is not the least use in breaking my health in San Francisco for nothing. Moreover, with all Joe's enthusiasm, I have not yet found any real benefit from the magnetic healer, except a few red patches on my chest from scratching! Platform work is nigh gone for me, and forcing it is only hastering the end. I leave here very soon, as soon as I can make money for a passage. I have 300 dollars in hand, made in Los Angeles. I will lecture here next week and then I stop-As for the Math and the money, the sooner I am released of that burden the hetter.

I am ready to do whatever you advise me to do. You have been a real mother to me. You have taken up one of my great burdens on yourself—I mean my poor count. I feel quite satisfied. As for my mother. I am going back to her—for my last days and hers. The thousand dollars I have in New York will bring Rs. 9 a month; then I have in New York will bring Rs. 9 a month; then I

bought for her a bit of land which will bring about Rs. 6: and her old house—that will bring, say, Rs. 6. I leave the house under litigation out of consideration. as I have not got it. Myself, my mother, my grandmother, and my brother will live on Rs. 20 a mouth easy. I would star jist now, if I could make money for a passage to India, without touching the L000 dollars in New York

Anyhow I will acrape three or four hundred dollars—
400 dollars will be enough for a second class passage and
for a few weeks' stay in London. I do not sak you to do
anything more for me: I do not want it. What you have
done is more, ever so much more than I deserve I have
given my place solemnly to you in Shri Ramakushna's
work. I am out of it. All my life I have been a torture
to my poor mother. Her whole life has been one of
cantinuous misery. If it be possible, my last attempt
should be to make her a little happy. I have planned
it all out. I have served the Mother all my life. It is
done; I refuse now to grind Her axe. Let Her find other
workers—I solute to

You have been one friend with whom 5hn Ramishaha has become the goal of hie—shat is the secret of my trust in you. Others love me personally. But they little dream that what they love me for is Ramishaha leaving Him 1 am only a mass of fooths willish motions. Anyway this stress as ternible, thurking of what may come nest, withing what ought to come nest I am unequal to the responsibility: I am found wanting I must give up this work. If the work has not hie in at, fet it de.

If it has, it need not wait for poor workers the enyel!

Now the money, Rs. 30,000, as an my name, in Government Securities. If they are sold now, we shall be fearfully, on account of the war, then, how can they be sent over here without being sold there? To sell them here I must sign them. I do not know how all this is

Many thanks for your kind note. You are correct that I have many other thoughts to think besides Indian people but they have all to go to the background before the all absorbing mussion—my Master's work.

I would that this sacrifice were pleasant. It is not, and naturally makes one bitter at times; for know, Mary. I am yet a man and cannot wholly forget myself; hope I shall some time. Fary for me.

Of course I am not to be held responsible for Miss MacLeod's or Miss Noble's or anybody else's views regarding myself or anything else, am 1) You never found me smart under criticism.

I am glad you are going over to Europe for a long period. Make a long tour, you have been long a housedove.

As for me, I am tired on the other hand of eternal tramping; that is why I want to go back home and be quiet, I do not want to work any more. My nature is the retirement of a scholar. I never get it! This is to let you know "I am very happy." Not that I am getting into a shadowy optimism. but my power of suffering is increasing. I am being fifted up above the pestilential missurs of this world's joys and sorrows, they are losing their meaning. It is a land of dreams: it does not matter whether one enjoys or weeps; they are but dreams, and as such must break sooner or later. How are things going on with you folks there? Harriet is going to have a good time at Paris. I am sure to meet her over there and parler français! I am getting by heart a French dictionnaire! I am making some money too; hard work morning and evening; yet better for all

504

that. Good sleep, good digestion, perfect irregularity.

You are going to the East. I hope to come to
Chicago before the end of April. If I can't, I will surely
meet you in the East before you go.

What are the McKindley girls doing? Eating grapefruit concoctions and getting plump? Go on, life is but a dream. Are you not glad it is so? My! They want an eternal heaven! Thank God nothing is eternal except Himself. He alone can bear it. I am sure. Eternity of nontense!

Things are beginning to hum for me; they will preently roar I shall remain quiet, though, all the same. Things are not humming for you just now. I am so sorry, that is, I am trying to be, for I cannot be sorry for anything any more. I am attaining peace that passift understanding, which is neither joy nor sorrow, but something above them both. Tell Mother that. My passing through the valley of death, physical, mental, lut two years, has helped me in this. Now I am nearing that Peace, the eternal silence. Now I mean to see things as they are, everything in that peace, perfect in its way. He whose joy is only in himself, whose desires are only in himself, he has learned his lesson. This is the great lesson that we are here to learn through myriads of

lesson that we are here to learn through mytiads of hirds and heavens and hells—that there is nothing to be asked for, desured for, beyond one's Self. "The greatest thing I can obtain is my Self." "I am free," therefore I require none else for my happinese. "Alone through eternity, because I was free, am free, and will remain free for ever." This is Vedantism. I preached the theory so long, but oh, joy! Mary, my dear sister, I am realising it now every day. Yes, I am "I am free," "Alone, alone, I am the one without a second"

> Ever yours in the Sat-Chit-Ananda, VIVEKANANDA

PS. Now I am going to be truly Vivekananda Did you ever enjoy evil! Ha! ha! you silly girl, all is good! Nonsense, Some good, some evil, I enjoy the good and I enjoy the evil. I was Jesus and I was Judas Iscariot; both my play, my fun. "So long as there are two, fear shall not leave thee " Ostrich method? Hide your heads in the sand and think there is nobody sceing you! All is good! Be brave and face everything, come good, come evil, both welcome, both of you my play I have no good to attain, no ideal to clench up to, no ambition to fulfil : I, the diamond mine, am playing with pebbles, good and evil , good for you, evil, come ; good for you, good, you come too. If the universe tumbles round my ears, what is that to me? I am Peace that passeth understanding : understanding only gives us good or evil. I am beyond, I am peace.

MY DEAR JOE.

Many thanks for the prompt sending of the books. They will sell quick, I believe. You have become worse than me in changing your plans, I see. I wonder why I have not got any Awakened India yet. My mail is getting so knocked about. I am afraid.

I am working hard-making some money-and am getting better in health. Work morning and evening, go to bed at 12 p.m. after a heavy supper !- and trudge all over the town! And get better too!

So Mrs. Milton is there, give her my love, will you? Has not Turiyananda's leg got all right?

I have sent Margot's letter to Mrs. Bull as she wanted. I am so happy to learn of Mrs. Leggett's gift to her. Things have got to come round; anyway, they are bound to, because nothing is eternal.

I will be a week or two more here if I find it paying.

My DEAR JOE,

Just a line before you start for France. Are you going via England? I had a beautiful letter from Mrs. Sevier in which I find that Miss Muller sent simply a paper without any other words to Kali who was with her in Dariceling.

Congreave is the name of her nephew, and he is in the Transvaal war; that is the reason she underlined that, to show her nephew fighting the Boers in Transvaal. That was all. I cannot understand it any more now than then, of course

I am physically worse than at Los Angeles, mentally much better, stronger, and peaceful. Hope it will continue to be so.

I have not got a reply to my letter to you; I expect

One Indian letter of mine was directed by mistake to Mrs. Wheeler, it came all right to me in the end. I had nice notes from Saradananda; they are doing beaufiully over there. The boys are working up; well, scolding has both sides, you see; it makes them up and doing.

We Indians have been so dependent for so long that it requires, I am sorry, a good lot of tongue to make them active. One of the laziert fellows had taken charge of the Anniversary this years and pulled it through. They have planned and are successfully working famine works

### To Mrs Ole Bull

1719 TURK STREET, SAN FRANCISCO, Lat April, 1900.

DEAR DIRRA MATA.

Your kind note came this morning I am so happy to learn that all the New York friends are being cured by Mrs. Milton. She has been very unsuccessful, it seems, in Los Angeles, as all the people we introduced tell me. Some are in a worse state than before the skin paring. Kindly give Mrs. Milton my love; her rubbings used to do me good at the time at least. Poor Dr. Hiller! We sent him over post-haste to Los Angeles to get his wife cured. You ought to have seen him the other morning and heard him too! Mrs. Hiller, it appears, is many times worse for all the rubbings given; and she is only a few bones; and, above all, the doctor had to spend 500 dollars in Los Angeles. That makes him feel very bad. I, of course, would not write this to loe: she is happy in her dreams of having done so much good to poor sufferers. But oh, if she could hear the Los Angeles folks and this old Dr. Hiller, she would change her mind at once and learn wisdom from an old adage not to recommend medicine to any one. I am so glad I did not write of old Dr. Hiller's alacrity in getting over to Los Angeles when he heard of this cure from Joe. She ought to have seen the old man dance about my room, with greater alacrity! 500 dollars was too much for the old man ; he is a German ; he dances about, slaps his pockets and says, "You can'th have goth the five hundred, buth for this silly cure !"

Then there are poor people who paid her three dollars a rubbing sometimes and now complimenting Joe and myrell. Don't rell this to loc. You and she can afford to lose money on any one. So also the old German doctor, but the poor boy finds it a bit hard. The old doctor is now persuaded that some derois are insarranging his affairs of late. He has counted on so much to have me as his guest, and his wife inglited, but he had to run to Los Angeles and that upset the whole plan: and now, though he tries his best to get me in as his guest. I fight shy, not of him, but of his wife and sister-in-law. He is sure. Therila must be in it? In has been a Theosophical student, I told him to write to Miss MacLeod to hunt up a devil-driver somewhere so that he might run with his wife and spend another five hundred! Doing good is not always amouth!

As for me. I get the fun out of it—as long as Joe pays—bone-caker, or skin-paer, or any aystem whatever. But this was not lair of Joe—after having got in all these people to get rubbed down, to run off and let me bear all the compliments I am glad she is not introducing any outsiders to be skinned. Otherwise Joe would be gone to Paris, leaving poor Mr Leggett to collect the compliments. I sent in a Christian Scienco hester to Dr. Hiller as a make-up of Joe's middlements, but his wife slammed the door in her face and would have nothing to do with outer healing.

Anyhow I aincerely hope and pray Mra. Leggett will be well this time. Did they analyse the sting?

I hope the will will arrive soon, I am a bit anxious about it. I expected to get a draft trust-deed also by this mail from India: no letters came, not even Awakened India, though I find Awakened India has reached San Francisco.

I read in the papers the other day of 500 deaths in one week of plague in Calcutta! Mother knows what is good. So Mr. Leggett has got the V. Society up. Good. How is Olea? Where is Margot? I wrote her a letter the other day to 21 W. 34, N. Y. I am so happy that she is making headway. With all love,

Ever your son. Vivekananda.

PS. I am getting all the work I can do and more. I will make my passage, anyhow. Though they cannot pay me much, yet they pay some, and by constant work I will make enough to pay my way and have a few hundred in the pocket anyhow. So you needn't be the least anxious about me. V.

him out al New York, etc. He awaits my orders. I have told him to trust you in everything, and remain in New York till I come.

I think as things stand in New York they require my presence Do you? In that case I shall come over toon

I have been making enough money to pay my passage I will stop on my way at Chicago and Detroit,

Of course by that time you will be off. A- has done good work so far : and, of course, you know I do not meddle with my workers at all.

The man who can work has an individuality of his own and resists any pressure there. That is my reason in leaving workers entirely free. Of course you are on the spot and know best. Advise me what to do.

The remittance to Calcutta has duly reached. I got news of it by this mail. My cousin sends her respects and thanks, but she is sorry she cannot write English,

I am getting better every day, and even walking uphill. There are falls now and then, but the duration is decreasing constantly. My thanks to Mrs. Milton-

I had a little note from Siri Gryanander. Poor girl. she is so thankful to be trusted. That is just like Mrs. Leggett-good, good, good. Money is not evil after all -in good hands. I hope fervently Siri will completely recover, poor child.

I will leave here in about two weeks. I go to a place called Star Klon and then start for the East. It may be I may go to Denver also. With all love to Joe,

Ever your son, VIVEKANANDA.

PS. I do not any more doubt my ultimate cure; you ought to see me working like a steam engine, cooking, eating anything and everything, and, all the same, sleeping well and keeping well!

I have not done any writing—no time. I am so glad Mrs. Leggett is much better and walking about naturally. I expect her complete recovery soon and pray for it.

PS. I had a nice letter from Mrs Sevier: they are going on splendidly with the work. Plague has broken out severely at Calcutta, but no bullabaloo over it this time, V.

DEAR JOE.

There is a squabble in New York, I see I got a letter from A— stating that he was going to leave New York. He thought Mrs. Bull and you have written lots against him to me. I wrote him back to be patient and wait, and that Mrs. Bull and Aliss MacLeod wrote only good things about him.

Well, Joe Joe, you know my method in all these tows: to leave all rows alone! "Mother" sees to all such things. I have finished my work. I am retired. Joe. "Mother" will work now Herself. That is all.

Now, as you say, I am going to send all the money

I have made here. I could do it today but I am waiting to make it a thousand. I expect to make a thousand in Frisco by the end of this week. I will buy a draft on New York and send it or ask the bank the best way to do it.

I have plenty of letters from the Math and the Himalayan centre. This morning came one from Swarupananda, Yesterday one from Mrs. Seviet.

I told Mrs. Hansborough about the photos. You tell Mr. Leggett from me to do what is best about the Vedanta Society matter,

The only thing I see is that in every country we have to follow its own method. As such, if I were you, I would convene a meeting of all the members and sympathisers and ask them what they want to do. Whether they want to organise or not, what sort of organisation they want to organise or not, what sort of organisation they want if any, etc. But Lordy, do it on your own hook. I am quits. Only if you think my presence would be of any help I can come in fifteen days. I have finished my work here; only, out of San Francisco, Stockton is a little city I want to work a few days in; then I go East. I think I should rest now, although I can have \$100 a week average in this city, all along. This time I want to let upon New York the charge of the Light Brigade.

With all love.

ALAMEDA, CALIFORNIA, 20th April, 1900.

My DEAR JOE.

Received your note today. I wrote you one yesterday but directed it to England thinking you will be there.

I have given your message to Mrs. Betts. I am so sorry this little quarrel came with A—. I got also his letter you sent. He is correct so far as he says. "Swami wrote me. 'Mr. Leggett is not interested in Vedanta and will not help any more. You stand on your own feet." It was as you and Mrs. Leggett desired me to write him from Los Angeles about New York—in reply to his asking me what to do for funds.

Well, things will take their own shape, but it seems in Mrs. Bull's and your mind there is some idea that in Mrs. Bull's and your mind there is some idea that ought to do something. But in the first place I do not know anything about the difficulties. None of you write me anything about what that is for, and I am no thought-reader.

You simply wrote me a general idea that A—wanted to keep things in his hands. What can I understand from it? What are the difficulties? Regarding what the differences are about, I am as much in the dark as about the exact date of the Day of Destruction!

dark as about the exact date of the Day of Destruction!

And yet Mrs. Bull's and your letters show quite an

amount of vexation!

These things get complicated sometimes, in spite of

ourselves. Let them take their shape.

I have executed and sent the will to Mr. Leggett so

desired by Mrs. Bull.

I am going on, sometimes well and at other times III
I cannot say, on my conscience, that I have been the

least benefited by Mrs. Milton. She has been good to me, I am very thankful. My love to her. Hope she will benefit others.

For writing to Mrs. Bull this fact, I got a four page sermon, as to how I ought to be grateful and thankful, etc., etc.

All that is, aure, the outcome of this A---

Sturdy and Mrs. Johnson got disturbed by Margot, and they fell upon me Now A disturbs Mrs. Bull and, of course, I have to bear the brunt of it. Such is life!

You and Mrs. Leggett wanted me to write him to be free and independent and that Mr. Leggett was not going to help them. I wrote st-now what can I do?

If John or Jack does not obey you, am I to be hanged for it? What do I know about this Vedanta Society? Did I start it? Had I any hand in it?

Then again, nobody condescends to write me anything about what the affair is!

Well, this world is a great fun.

I am glad Mrs. Leggett is recovering fast. I pray ery moment for her complete recovery. I start for Chicago on Monday. A kind lady has given me a pass up to New York to be used within three months. The Mother will take care of me She is not going to strand me now after goarding me all my life.

Ever yours gratefully,

I ought to have started today but circumstances so

liappened that I cannot forgo the templation to be in a camp under the huge red-wood trees of California before I leave. Therefore I postpone it for three or four days. Again after the incessant work I require a breath of God's free air before I start on this bone-breaking journey of four days.

Margot insists in her letter that I must keep my promise to come to see Aunt Mary in fifteen days. It will be kept—only in twenty days instead of fifteen. By that I avoid the nasty snowstorm Chicago had lately and get a little strength too.

Margot is a great partisan of Aunt Mary it seems, and other people besides me have nieces and cousins and aunts.

I start tomorrow to the woods. Woof! get my lungs full of ozone before getting into Chicago. In the meanwhile keep my mail for me when it comes to Chicago and don't send it off here like a good girl as you are.

I have finished work. Only a few days' rest, my friends insist—three or four—before facing the railway. I have got a free pass for three months from here to New York; no expense except the sleeping car; so, you see, free, free!

My Dear Mary,

It is true I am much better, but not yet completely recovered; anyway, the complexion of the mind is one belonging to everyone that suffers. It is neither gas nor anything else.

Kâli worship is not a necessary step in any religion.
The Upanishads teach us all there is of religion. Kali
worship is my special fad; you never heard me preach

it, or read of my preaching it in India. I only preach what is good for universal humanity. If there is any curious method which applies entirely to me, I keep it a secret and there is ends. I must not explain to you what Kali worship is, as I never taught it o anyholdy.

You are entirely mistaken if you think the Boses are ejected by the Hindu people The English rulers want o push him into a corner They don't of course like hat sort of development in the Indian race. They make hot for him, that is why he seeks to go elsewhere

By the "anglicised" are meant people who by their sancers and conduct show that they are ashamed of us or, old type Hindus 1 am not ashamed of my race my birth or nationality. That such people are not ed by the Hindus. I cannot wonder

Ceremonials and symbols etc. have no place in our ligion, which is the doctrine of the Upanishads, pure and uple. Many people think the ceremonial etc. help im in realising religion. I have no objection.

Religion is that which does not depend upon books teachers or prophets or saviours, and that which does make us dependent in this or in any other lives upon ers. In this sense Advaltism of the Upanishads in the religion. But saviours, books, prophets, ecretials, etc. have their places They may help many, Call worship helps me in my secular wort. They are some.

The Guru, however, is a different idea. It at the relabetives the insansities and the receiver of forcehic power and knowledge Each nation is a type

from others only to work it out into its type, that is,
the national line. The time has not come for the

#### DEAR TUREYANANDA.

I received a letter from Mrs. Hansborough telling me of your visit to her. They like you immensely, and I am sure you have found in them genuine, pure, and absolutely unselfish freeds.

I am starting for Paris tomorrow. Things all turn that way. Kali is not here. He is rather worried at my going away, but it has got to be.

Address your next letter to me care of Mr. Leggett.

Give my love to Mrs. Wyckoff, Hansborough, and to Helm. Revive the clubs a but and ask Mrs. Hansborough to collect the dues as they fall and send them to India Sanda writes they are having rather hot times. My kind regards for Miss Boocke. With all bows.

### DEAR---

I had a letter from you several days ago, but I could not reply earlier. Mr. Sevier speaks well of you in his letter, I am very pleased at this.

Write to me in minute detail who all are there, and what each one is doing. Why don't you write letters to your mother? What is this? Devotion to the mother is the root of all welfare. How is your brother getting on with his studies at Calcutta? The Sannyasin-names of those there escape my memory-how to address each? Give my love to all conjointly. I got the news that Khagen has now fully recovered This is happy news. Write to me whether the Seviers are attending to your comforts and other details I am glad to know that Dinu's health is all right. The boy Kali has a tendency to become fat : but this will all surely go away by constantly elimbing up and down the hills there. Tell Swarup that I am very much pleased with his conducting of the paper. He is doing aplendid work. Give to all others also my love and blessings. Tell everybody that my health is now all right. From here I shall go to England and from there to India very shortly.

> With all blessings. VIVEKANANDA.

I got your letter from California. So three person are getting spiritual trances; well, it is not bad. Even out of that much good will come. Shri Ramakrishi knows! Let things happen as they will. His work He knows, you and I are but servents and nothing else.

I am sending this letter to San Francisco—care of Mrs. C. Panel. Just now I got some news from New York. They are well, Kali is on tour. Write in detail about your health and work in San Francisco. And don't be indifferent to the question of sending money to the Math. See that money goes certainly every month. from Loa Aneyles and San Francisco.

I am on the whole doing well I am shortly starting for England. I get news of Sharat Recently he had an attack of dysentery. The creat are all well. This time few got malaria; nor is it so prevatent on the banks of the Ganges. This year owing to scarcity of rain there is fear of famine in Bengal also.

By the grace of Mother, go on doing work, brother. Mother knows and you know—but I am off! Now I am going to take a rest

### DEAR BROTHER HARL

Now I am staying on the seacoast of France. The session of the Congress of History of Religions is over. It was not a big affair, some twenty scholars chattered a lot on the origin of the Shâlagrama and the origin of Jehovah, and similar topics. I also said something on the occasion.

My body and mind are broken down: I need rest badly. In addition, there is not a single person on whom I can depend, on the other hand so long as I live, all will become very selfish depending upon me for everything.

Dealing with people entails constant mental uneasiness . I have cut myself off by a will. Now I am writing to say that nobody will have sole power. All will be done in accordance with the view of the majority. . . . If a trust-deed on aimilar lines can be executed, then I am free. . . .

What you are doing is also Guru Mahatal's work. Continue to do it. Now I have done my part. Don't write to me any more about those things; do not even mention the subject. I have no opinions whatever to give on that subject. . . .

#### Y DEAR HARL

I learnt everything from your letter. Earlier I had inkling of some trouble between the full-fledged dantist and the Home of Truth-someone wrote that. Things do occur, wisdom consists in carrying on work by cleverly keeping all in good humour

For some time now I have been living mongrato. It stay with the French to pick up their language I somewhat freed from wornies; that is to say, I have ted the trust-deed and other things and sent them to tutta. I have not reserved any right or owner-thip for elf. You now possess everything, and will manage work by the Master's grace.

I have no longer any desire to kill myself by touring, the present I feel like settling down somewhere and ding my time among books I have somewhat ered the French language; but if I stay among the ch for a month or two, I shall be able to carry on conversation well. If one can master this language and German sufficiently, one can virtually become well acquainted with European learning. The people of France are mere intellectualists, they run after worldly things and firmly believe God and souls to be superstitions, they are extremely loath to talk on such subjects. This is a truly materialistic country! Let me see what the Lord doer. But this country is at the head of Western culture, and Paris is the capital of that culture.

Brother, free me from all work connected with preaching. I am now aloof from all that, you manage it yourselves. It is my firm conviction that Mother will get work done through all of you a hundredfold more than through me.

Many days ago I received a letter from Kali. He must have reached New York by now. Miss Waldo sends news now and then.

I keep sometimes well and sometimes bad. Of late I am sgain having that massage treatment by Mrs. Milton, who says, "You have already recovered!" This much I see—whatever the flatulence, I feel no difficulty in moving, walking or even climbing. In the morning I take vigorous exercise, and then have a dip in cold water.

Yesterday I went to see the house of the gralleman whom I shall stay. He is a poor scholar, has his room filled with books and fives in a flat on the fifth floor. And as there are no lefts in this country as in America, one has to climb up and down. But it is no longer trying to me.

There is a beautiful public park round the house.

God bless you at each step, my dear Christine, such is my constant prayer!

Your letter, so beautiful and so calm, has given me that fresh energy which I am often losing

I am happy, yes, I am happy, but the cloud has not left me entirely. It sometimes comes back, unfortunately.

but it no longer has the morbidity it used to have. I am staying with a famous French writer, M Julea Bois. I am his guest. As he is a man making his living with his pen, he is not rich; but we have many great ideas in common and feel happy together.

He discovered me a few years ago and has already translated some of my pamphlets into French. We shall in the end find what we are looking for, ien't it?

Thus, I shall travel with Madame Calvé, Miss MacLeod, and M. Jules Bois I shall be the guest of Madame Calvé, the famous singer,

We shall go to Constantinople, the Near East, Greece, and Egypt. On our way back, we shall visit Venice It may be that I shall give a few lectures in Paris

after my return, but they will be in English with an interpreter.

I have no time any more, nor the power to study a new language at my age. I am an old man, isn't it?

Mrs. Funke is ill I think she works too hard. She already had some nervous trouble. I hope she will soon be well

There is no knowing where my next stop will be This much I can say that I am trying to be free from care.

I received a letter from Kali, too, today. I shall send him a reply tomorrow. The body is somehov rolling on. Work makes it ill, and rest keeps it well-that is all. Mother knows. Nivedita has gone to England. She and Mrs. Bull are collecting funds. She has a mind to run a school at Kishengarh with the girls ahe had there. Let her do what she can. I do not intervene any more in any motter in any matter—that is all.

My love to you. But I have nothing more to advise as regards work.

Yours in service, VIVEKANANDA.

DEAR JOE.

The steamer was late; so I am waiting Thank goodness, it entered the Canal this morning at Port Said. That means it will arrive some time in the evening if everything goes right.

Of course it is like soltary imprisonment these two days and I am holding my soul in patience

But they say the change is thrice dear Mr. Caze's agent gave me all wrong directions. In the first place there was nobody here to tell me a thing, not to speak of receiving me. Secondly, I was not told that I had to change my Gaze's ticket for a steamer one at the agent's office, and that was at Suez, not here

It was good one way, therefore, that the steamer was late; so I went to see the agent of the steamer and he told me to exchange Gaze's pass for a regular ticket.

I hope to board the steamer some time tonight | am well and happy and am enjoying the fun immensely VIII-35

I am sending all the money I earned in America India. Now I am firer, the begung monk as before, have also resigned from the fireductiship of Monastery. Thank God, I am fired! It is no more me to carry such a responsibility. I am so nervous a so weak.

"As the birds which have slept in the branches a tree wake up, singing when the dawn comes, and su up into the deep blue sky, so is the end of my life."

I have had many difficulties, and also some very gre successes. But all my difficulties and suffering count in nothing, as I have succeeded. I have attained my air I have found the peat for which I dived into the oceof life. I have been teawded. I am pleased.

Thus it seems to me that a new chapter of my li is opening. It seems to me that Mother will now lea me slowly and softly. No more effort on roads full obstacles, now it is the bed prepared with birds' down Do you understand that? Believe me, I feel quit sure.

The experience of all my life, up to now, has taught thank God, that I always find what I am looking for with eagerness. Sometimes it is after much suffering but it does not matter! All is forgotten in the softness of the reward. You are also going through troubles, my friend, but you shall have your reward. Alas! What you now find is not a reward but an additional affliction.

As to myself, I see the cloud lifting, vanishing, the cloud of my bad Karma. And the sun of my good Karma rites—shining, beautiful, and powerful. This will also be the case for you, my friend. My knowledge of this language has not the power to express my emotion. But which language can really do so?

My DEAR MODIER.

Three days ago I reached here. It was quite unexpected—my visit, and everybody was so surprised.

Things here have gone better than I expected during my absence, only Mr. Sevier has passed away. It was a tremendous blow, sure, and I don't know the future of the work in the Himalayas. I am expecting daily a letter from Mrs. Sevier who is there atill.

How are you? Where are you? My affairs here will be straightened out shortly, I hope, and I am trying my best to straighten them out.

The remittance you send my cousin should henceforth be sent to me direct, the bills being drawn in my name. I will cash them and send her the money. It is better the money goes to her through me.

Satsdanada and Brahmanada are much better and this year there is very little malaria here. This narrow strip on the banks of the river is always free from malaria. Only when we get a large supply of pure water the conditions will be perfected here.
